CAMBRIDGE INTERNATIONAL EXAMINATIONS

General Certificate of Education Advanced Subsidiary and Advanced Level

MARK SCHEME FOR the June 2002 question papers

9706 ACCOUNTING

9706/2	Paper 2 (Structured Questions), maximum raw mark 90
9706/4	Paper 4 (Problem Solving), maximum raw mark 120

These mark schemes are published as an aid to teachers and students, to indicate the requirements of the examination. They show the basis on which Examiners were initially instructed to award marks. They do not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the June 2002 question papers for most IGCSE and GCE Advanced (A) and Advanced Subsidiary (AS) Level syllabuses.

(c) From Profit in 1999 to Loss in 2001.
No dividend by 2001.
Bank overdraft by 2001.
Net Current Assets considerably reduced by 2001.
Loan plus overdraft used to finance extra fixed assets.
Negative Profit & Loss balance by 2001.
Any ratios to support above.
Improved asset base
But generally bad news.
Etc 1 mark each to maximum **8**

	New Net Profit				20 750	1 of
	New Net Profit Ratio				7.40%	1 of
						(8)

(e) Janice reduced the selling price to such an extent that increased sales volume was not sufficient to allow for an increase in gross profit.
The lower expenses were not sufficient to bring the net profit back to its previous level.
Etc
One per statement to maximum **(3)**

(f) Altering methods of depreciation gives a false comparison from one year to the next.
Total expenses, and therefore profits, can easily be "massaged".
Prudence. Consistency. True and fair view.
Net book value of assets becomes meaningless.
Etc
One per statement to maximum **(3)**

3 DATA

Machine	X	Y
Hourly rate of production	160	250
Material cost per unit	$5.00	$4.60
Hourly labour rate	$10	$10
Number of operatives	4	5
Fixed costs per order	$200	$500
Variable unit costs	$2.40	$2.60

(a) ORDER FOR 800

	$	$	
Labour cost	200	160	2
Material cost	4000	3680	2
Variable costs	1920	2080	2
Fixed costs	200	500	2
Total costs	6320	6420	
Machine X costs least, or OF.			1

(9)

(b) ORDER FOR 1000

Labour cost	250	200	2
Material cost	5000	4600	2
Variable costs	2400	2600	2
Fixed costs	200	500	
Total costs	7850	7900	
Machine X costs least, or OF.			1

(7)

(c)

	Machine X $	
Total variable costs	6120	1
Total costs	6320	1
Sales = 125% of total costs	7900	1
Contribution = Sales - VC	1780	1

	Machine Y $	
Total variable costs	5920	1
Total costs	6420	1
Sales = 125% of total costs	8025	1
Contribution = Sales - VC	2105	1

(8)

(d) Rights issue

A Saves on expense of a full public share issue.

D May bring in less cash than a full public share issue.

etc.

www.dynamicpapers.com

Issues of shares to the public

A May be sold at a premium and bring in large cash fund.

D Costs a great deal of money and no guarantee that all will be sold.

etc.

Issue of debentures

A No control given to debenture holders.

D Interest must be paid even if business is making a loss.

etc.

One advantage and one disadvantage for each to maximum (6)
