

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS
International General Certificate of Secondary Education

MARK SCHEME for the May/June 2012 question paper
for the guidance of teachers

**0417 INFORMATION AND COMMUNICATION
TECHNOLOGY**

0417/22

Paper 2 (Practical Test A), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

I was proud of what I had achieved and expect I would still be there but for two things. One was the education I gave to my children and the other was the launch of the Lola Micro range of cars.

servicing and repairs.

It was pressure from them that made me... finance, technology and modern cars. Nothing in my old firm was computerised and I still don't like to rely... However, the new generation have shown that a modern company cannot exist without electronic communications and services. My nephew designs our web site and maintains overall strategies for computers in the firm.

- Body text format 14 pt, serif, Single ls and fully justified 1 mark
- Consistent paragraph spacing 1 mark

I have four children and I can be really proud of their educational successes. My eldest is Sanjeev and he followed a business studies course at the university. When he got his degree, he went on to study for an MBA. He has become my international business development director in the new franchises we have gained from Lola Motor Corporation. It was he who saw the potential of the

Sales was able to get the franchise to sell the Micro range. This car is so well placed to match the market desires that we continue to expand our sales franchises.

The Lola Motor Corporation introduced this range of small cars to meet the aspirations of families who have so far not become car owners and did not expect to be able to afford their own car. They are so well built and environmentally friendly that they are really popular with our new customers.

We started with one showroom in the town where I had my second hand car sales. We soon found that we had plans to expand into other countries and have just opened our latest sales base in Madrid. We now have sales outlets in five major cities across Europe.

Two new technologies that Lola have developed are hybrid cars using electric power with small petrol engines and fully electric cars which are suitable for running round town. Many new charging points are being installed in town centres so that your car can be recharged while you are shopping. Future plans, at present only concepts, include hydrogen power with the main emission being water.

Here is the range of Micro cars we sell.”
