1 Anna and James have formed a business partnership. They own an ice cream shop on the main street in Capital city. The shop has 3 part-time employees and sells high quality ice cream to a niche market. Anna and James gain feedback by asking customers to complete questionnaires. Customers do not like the long queues and poor customer service. Anna thinks these problems are caused by the shop always being busy. James has suggested moving to a larger shop in a different location in Capital city.

2 GXC produces car components in country X using imported raw materials. This year, GXC has invested in new machinery. This has resulted in the redundancy of 100 employees, 30% of its workforce. Some stakeholder groups were unhappy about this decision. GXC uses flow production and benefits from economies of scale. It sells the components to car manufacturers based in country Y. The exchange rate of country X's currency has recently appreciated. GXC's Managing Director is worried about this.

- 3 Sachin's business manufactures cricket bats for the mass market. He advertises in a national newspaper every two weeks. Demand for the cricket bats has rapidly increased since the business started two years ago. His 30 employees now produce 3 million cricket bats per year. A summary of costs and selling price is shown in Table 1. Sachin is finding it difficult to manage the business on his own. His friend has suggested delegating some tasks, such as marketing and production decisions, to employees.

**Table 1: Summary of costs and selling price (\$)**
