Paper 2 Case Study

**May/June 2020**

MARK SCHEME

Maximum Mark: 80

---

**Published**

Students did not sit exam papers in the June 2020 series due to the Covid-19 global pandemic.

This mark scheme is published to support teachers and students and should be read together with the question paper. It shows the requirements of the exam. The answer column of the mark scheme shows the proposed basis on which Examiners would award marks for this exam. Where appropriate, this column also provides the most likely acceptable alternative responses expected from students. Examiners usually review the mark scheme after they have seen student responses and update the mark scheme if appropriate. In the June series, Examiners were unable to consider the acceptability of alternative responses, as there were no student responses to consider.

Mark schemes should usually be read together with the Principal Examiner Report for Teachers. However, because students did not sit exam papers, there is no Principal Examiner Report for Teachers for the June 2020 series.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the June 2020 series for most Cambridge IGCSE™ and Cambridge International A & AS Level components, and some Cambridge O Level components.

---

This document consists of **14** printed pages.

### Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

#### GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

#### GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

#### GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

#### GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

#### GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

#### GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

| Question | Answer  | Marks |
|----------|---|-------|
| 1(a)     | <p><b>Explain <u>one</u> benefit and <u>one</u> problem for ES of taking over other businesses.</b></p> <p>Award 1 mark for each relevant benefit/problem (maximum of two):</p> <p>Relevant benefits might include:</p> <ul style="list-style-type: none"> <li>• Assets already set up for use – can use existing scooter factories and skilled employees</li> <li>• Makes it quicker to grow – as the existing production facilities can be used to increase the output of scooters – faster than setting up own factories</li> <li>• Have access to ready trained/skilled staff</li> </ul> <p>Relevant problems might include:</p> <ul style="list-style-type: none"> <li>• High cost of buying other business – may need to sell additional shares on the stock exchange</li> <li>• May be difficult integrating the two companies – as the way of working may be very different in the smaller scooter businesses – and employees may not like the changes – leading to less efficiency</li> <li>• More difficult to control larger business – many more skilled employees in the business – possible diseconomies of scale</li> </ul> <p>Award a maximum of 3 additional marks for each explanation of the benefits and problems of growing by taking over other businesses – <b>one of which must be applied to this context.</b></p> <p>For example:</p> <p>The cost of buying other companies is high (1) and ES will have to raise large amounts of funds to allow them to do this (1). As a public limited company (app), it could sell additional shares to raise the finance, but this may lead to the existing shareholders losing some control over the business (1).</p> | 8     |

| Question | Answer   |       |  | Marks |
|----------|--|-------|--|-------|
| 1(b)     | <b>Consider the financial information in Appendix 1. Which company should ES take over? Justify your answer using appropriate ratios.</b>  |       |  | 12    |
| Level    | Description  | Marks |  |       |
| 3        | <p>Sound application of knowledge and understanding of relevant business concepts using appropriate terminology.</p> <p>Detailed discussion of <b>both</b> companies.</p> <p>Well-justified recommendation.</p> <p>Candidates discussing both companies in detail, in context and with well-justified recommendation including why the alternative company was rejected should be rewarded with the top marks in the band.</p> | 9–12  |  |       |
| 2        | <p>Sound application of knowledge and understanding of relevant business concepts using appropriate terminology.</p> <p>Detailed discussion of at least <b>one</b> company.</p> <p>Judgement with some justification/some evaluation of choice made.</p> <p>Candidates discussing both companies in detail and applying it to the case should be rewarded with the top marks in the band.</p>                                  | 5–8   |  |       |
| 1        | <p>Limited application of knowledge and understanding of relevant business concepts.</p> <p>Limited ability to discuss each company with little/no explanation.</p> <p>Simple judgement with limited justification/limited evaluation of choice made.</p> <p>Candidates outlining both companies in context should be rewarded with the top marks in the band.</p>   | 1–4   |  |       |
| 0        | No creditable response.  | 0     |  |       |

| Question       | Answer  | Marks       |  |             |   |                |   |  |
|----------------|---|-------------|--|-------------|---|----------------|---|--|

| Question | Answer   | Marks |
|----------|--|-------|
| 3(b)     | <p>Relevant points might include:</p> <ul style="list-style-type: none"> <li>• Job rotation – moves workers around the production line to carry out different tasks so <b>makes the job less boring</b> – but the actual tasks may still be monotonous.</li> <li>• Job enlargement – adds tasks to the job and therefore the job becomes more interesting – worker may feel more important as trained to carry out additional tasks –but worker may not feel able to carry out the additional task – may not want extra responsibility.</li> <li>• Increased wage rates – <b>even higher than the legal minimum wage than they are at present</b> - Taylor states that increased wages will increase motivation as ‘money is the main motivator’ – however, Herzberg would argue it is only a temporary motivator and increased motivation will not last.</li> <li>• Introduce piece rate – wages paid will increase the higher the output, so workers will be motivated to increase their output – however, if work is rushed quality might suffer leading to a poor reputation for the company.</li> <li>• Pay a bonus – may be paid individually or as a team – higher pay if the production team increase output – may cause disagreements if only some of the team are working hard – may be seen as unfair.</li> </ul> <p>Judgement might include:</p> <ul style="list-style-type: none"> <li>• Higher pay will only motivate production workers for a short time as the <b>job is still boring</b> on the <b>flow production line</b>. It might be better to use job enlargement to add tasks to the job the job of <b>making scooters</b> to make it more interesting and maintain increased motivation for a longer period of time. It may also cost less as may only need additional training and not higher wages to be paid</li> </ul> |       |

| Question | Answer  | Marks |
|----------|---|-------|
| 4(a)     | <p><b>Explain how the following <u>four</u> legal controls may affect ES.</b></p> <ul style="list-style-type: none"> <li>• <b>Control over misleading promotion</b></li> <li>• <b>Control over faulty products</b></li> <li>• <b>Control over location decisions</b></li> <li>• <b>Control over pollution</b></li> </ul> <p>Award one mark for each effect (maximum of four).</p> <p>Relevant legal controls might include:</p> <ul style="list-style-type: none"> <li>• Misleading promotion: restrictions on claims in adverts about the speed scooters can go or fuel consumption</li> <li>• Faulty products: consumers have the right to return them to have your money back if the scooter engine has a fault</li> <li>• Location – restrictions on where to expand the scooter factory</li> <li>• Pollution – emissions from scooters may mean production has to change</li> </ul> <p>Award a maximum of 1 additional mark for each effect applied to this context.</p> <p>For example:<br/>Environmental laws may restrict pollution from exhaust fumes (1) this may mean ES has to change the engines of its scooters which may increase costs (app).</p> | 8     |
