Paper 2 Case Study

May/June 2022

MARK SCHEME

Maximum Mark: 80

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2022 series for most Cambridge IGCSE, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

This document consists of **17** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Social Science-Specific Marking Principles (for point-based marking)

1 Components using point-based marking:

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require n reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

0450/7115/0086 Business Studies – Paper 2 Annotations

Annotation	Description	Use
Tick	Tick	Indicates a point which is relevant and rewardable (used in part (a) questions).
Cross	Cross	Indicates a point which is inaccurate/irrelevant and not rewardable.
BOD	Benefit of doubt	Used when the benefit of the doubt is given in order to reward a response.
TV	Too vague	Used when parts of the answer are considered to be too vague.
REP	Repetition	Indicates where content has been repeated.
NAQ	Not answered question	Used when the answer or parts of the answer are not answering the question asked.
APP	Application	Indicates appropriate reference to the information in the context.
OFR	Own figure rule	If a mistake is made in a calculation, and the incorrect figure that results from the mistake is used for subsequent calculations.
SEEN	Noted but no credit given	Indicates that content has been recognised but not rewarded.
L1	Level 1	Used in part (b) questions to indicate where a response includes limited knowledge and understanding.
L2	Level 2	Used in part (b) questions to indicate where a response has a more detailed discussion and contains some evidence of justification.
L3	Level 3	Used in part (b) questions to indicate where a response includes a well-justified recommendation.

Question	Answer	Marks
1(a)	<p>Explain <u>two</u> ways TT could grow.</p> <p>Award 1 mark for each relevant way (maximum of two marks).</p> <p>Award a maximum of 3 additional marks for each explanation of the way TT could grow – one of which must be applied to this context.</p> <p>Relevant reasons might include:</p> <p>Internal growth such as:</p> <ul style="list-style-type: none"> • TT grows its existing operations – often by using retained profits from its existing business – to set up a new factory abroad producing a new toy for children up to the age of 5 • Develop new products – to increase sales • Entering new markets – e.g. produce products for a different age group • Diversification <p>External growth such as:</p> <ul style="list-style-type: none"> • TT takes over another toy manufacturer – this is horizontal integration where TT takes over a competitor – TT wants to expand into country Z and could take over a toy manufacturer already located in that country • Mergers • Vertical integration – takes over a supplier or retailer • Joint ventures • Licensing <p>For example: Internal growth (1) as TT decides to expand by opening its own new factory (1). This could be in country Z where TT plans to expand sales (app). This is a less risky way to grow than taking over another business, even though it is quite slow if it has to use its own funds (1).</p> <p>Application could include: manufacture toys; toys/toys for under 5's; older children/children; expanding into new markets abroad; existing economies of scale; toy shops; cost \$10m; multinational company; specialist new equipment; flow production.</p>	8

Question	Answer	Marks															
1(b)	<p>Consider how TT might benefit from the following <u>three</u> economies of scale as it continues to grow. Which is likely to have the greatest effect on TT's profit? Justify your answer.</p> <ul style="list-style-type: none"> • Purchasing • Technical • Financial <table border="1"> <thead> <tr> <th>Level</th><th>Description</th><th>Marks</th></tr> </thead> <tbody> <tr> <td>3</td><td> <p>Sound application of knowledge and understanding of relevant business concepts using appropriate terminology.</p> <p>Detailed discussion of two or more economies of scale.</p> <p>Well-justified conclusion.</p> <p>Candidates discussing all three economies of scale in detail, in context and with a well-justified conclusion including why the alternative economies of scale were rejected should be rewarded with the top marks in the band.</p> </td><td>9–12</td></tr> <tr> <td>2</td><td> <p>Sound application of knowledge and understanding of relevant business concepts using appropriate terminology.</p> <p>Detailed discussion of at least one economy of scale.</p> <p>Judgement with some justification / some evaluation of choice made.</p> <p>Candidates discussing two or more economies of scale in detail and applying them to the case should be rewarded with the top marks in the band.</p> </td><td>5–8</td></tr> <tr> <td>1</td><td> <p>Limited application of knowledge and understanding of relevant business concepts.</p> <p>Limited ability to discuss the economies of scale with little/no explanation.</p> <p>Simple judgement with limited justification / limited evaluation of choice made.</p> <p>Candidates outlining all three economies of scale in context should be rewarded with the top marks in the band.</p> </td><td>1–4</td></tr> <tr> <td>0</td><td>No creditable response.</td><td>0</td></tr> </tbody> </table>	Level	Description	Marks	3	<p>Sound application of knowledge and understanding of relevant business concepts using appropriate terminology.</p> <p>Detailed discussion of two or more economies of scale.</p> <p>Well-justified conclusion.</p> <p>Candidates discussing all three economies of scale in detail, in context and with a well-justified conclusion including why the alternative economies of scale were rejected should be rewarded with the top marks in the band.</p>	9–12	2	<p>Sound application of knowledge and understanding of relevant business concepts using appropriate terminology.</p> <p>Detailed discussion of at least one economy of scale.</p> <p>Judgement with some justification / some evaluation of choice made.</p> <p>Candidates discussing two or more economies of scale in detail and applying them to the case should be rewarded with the top marks in the band.</p>	5–8	1	<p>Limited application of knowledge and understanding of relevant business concepts.</p> <p>Limited ability to discuss the economies of scale with little/no explanation.</p> <p>Simple judgement with limited justification / limited evaluation of choice made.</p> <p>Candidates outlining all three economies of scale in context should be rewarded with the top marks in the band.</p>	1–4	0	No creditable response.	0	12

		Benefits	Possible drawbacks	
	Labiba	<ul style="list-style-type: none"> Well qualified so has the capacity to learn new skills Has experience of the job as an Assistant Marketing Manager so will understand what the job involves Speaking 2 languages will be suitable to work in another country Already works for TT and so will understand the toy products and the way TT works TT trains its staff and so will probably be well trained for existing job Other TT employees may be more motivated as they see the promotional opportunities within the business – may be less likely to leave 	<ul style="list-style-type: none"> Experience is as an assistant so she may not have the necessary experience to run a department Labiba may find it difficult to settle in country Z It may cause jealousy from other employees at TT if Labiba is promoted 	
	Shahin	<ul style="list-style-type: none"> The best qualified of all the applicants with a degree in business management and therefore might be a quick learner Already experienced as a marketing manager and will understand what the role involves Is already based in country Z and so will not need to move there – already understands the culture of country Z 	<ul style="list-style-type: none"> The experience has not been in a toy company and therefore may not understand TT's market No experience of working in large company as has only been working in a small food company

3(b)		Benefits	Possible drawbacks	
	Samihah	<ul style="list-style-type: none">• Speaks more languages than the other applicants – more likely to be able to speak to employees in country Z• The most experienced as has worked in a large toy company so will be more familiar with the requirements of a toy company• Works for a competitor of TT and may bring additional ideas to TT to improve the marketing of the new toy	<ul style="list-style-type: none">• Lowest qualified of the three applicants• Works for a competitor and may have very different working practices – may not fit in well to TT• Samihah may find it difficult to settle in country Z	
	Recommendation	<ul style="list-style-type: none">• Labiba is the best applicant as she already works for TT and TT knows how well Labiba works. Her boss can give an accurate assessment of Labiba’s capabilities, which is likely to be more accurate than outside references. Labiba already understands the toy market and will be better than Shahin who only has experience of a small company. Samihah may not fit into the culture of TT as the competitor may have very different ways of operating.• Shahin is the best applicant as she is already a marketing manager and is the only applicant already based in country Z. Shahin will have the best understanding of the market in country Z even though their experience is with food and Shahin does not need to move to another country unlike the other two applicants.• Samihah is the best applicant as she has the most experience of the three, as is already a marketing manager and understands what the role involves, unlike Labiba. Samihah’s experience has been in a large toy company similar to TT and is likely to bring new ideas to the marketing of the new toy.

4(b)	<p>Relevant points might include:</p> <table><tr><th>Benefits</th><th>Drawbacks</th></tr><tr><td><ul style="list-style-type: none">It creates jobs – lowering unemployment as it has been rising in country Z – raising incomes in the country and helping to increase economic growth/GDPIncreased investment – the new factory will create jobs to build it and new infrastructure may be built also benefiting local businessesTT could export from county Z – improving its balance of payments – earns foreign currency for country Z to purchase more importsTT may pay taxes to the government – increases tax revenue to provide more services for its population of 200 millionIncreased consumer choice – more competition and more toys available to buy and the new toy is unique</td><td><ul style="list-style-type: none">The jobs created may be unskilled and low paidThere may be reduced sales for the three local toy businesses as their costs may be higherProfits may be sent back to country Y – loss of government tax revenue in country ZScarce resources may be used up quickly by the multinational business leaving few non-renewable resources remaining when the multinational has leftThe multinational business could have a lot of political influence and gain concessions such as grants that could have been spent on local businessesIncreased noise and air pollution when the factory is being built – may cause damage to the environment and health of the local population</td></tr></table> <p>Conclusion:</p> <ul style="list-style-type: none">Allowing TT to locate in the country has more benefits for country Z than it has drawbacks. The jobs created when unemployment is increasing will help the country develop and may benefit from a technology transfer from TT to other businesses in the country. This may increase their efficiency and improve their productivity – so many other local businesses may benefit which outweighs the drawbacks to the three local toy companies that may not be able to compete with TT.The government in country Z should not allow TT to build a factory there as it may not gain tax revenue if the government of country Z has to make concessions to attract TT to locate there. As TT's production is quite automated few jobs will be created and these may not increase incomes much so there will be little gain to the economy.	Benefits	Drawbacks	<ul style="list-style-type: none">It creates jobs – lowering unemployment as it has been rising in country Z – raising incomes in the country and helping to increase economic growth/GDPIncreased investment – the new factory will create jobs to build it and new infrastructure may be built also benefiting local businessesTT could export from county Z – improving its balance of payments – earns foreign currency for country Z to purchase more importsTT may pay taxes to the government – increases tax revenue to provide more services for its population of 200 millionIncreased consumer choice – more competition and more toys available to buy and the new toy is unique	<ul style="list-style-type: none">The jobs created may be unskilled and low paidThere may be reduced sales for the three local toy businesses as their costs may be higherProfits may be sent back to country Y – loss of government tax revenue in country ZScarce resources may be used up quickly by the multinational business leaving few non-renewable resources remaining when the multinational has leftThe multinational business could have a lot of political influence and gain concessions such as grants that could have been spent on local businessesIncreased noise and air pollution when the factory is being built – may cause damage to the environment and health of the local population
