**BUSINESS STUDIES**

**0450/23**

Paper 2 Case Study

**October/November 2021**

**MARK SCHEME**

Maximum Mark: 80

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2021 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

---

This document consists of **18** printed pages.

### Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

#### GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

#### GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

#### GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

#### GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

#### GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

#### GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

### Social Science-Specific Marking Principles (for point-based marking)

#### 1 Components using point-based marking:

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require  $n$  reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

#### 2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

#### 3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

**4 Annotation:**

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

Question	Answer	Marks
1(a)	<p><b>Explain how the following <u>four</u> users of MA's accounts might use the financial data in Appendix 1 to help make decisions:</b></p> <ul style="list-style-type: none"> <li>• <b>Shareholders</b></li> <li>• <b>Suppliers</b></li> <li>• <b>Employees</b></li> <li>• <b>Banks</b></li> </ul> <p>Award 1 mark for each relevant way the data in Appendix 1 might help make decisions (maximum of four marks).</p> <p>Award a maximum of 1 additional mark for each explanation of <b>how the data in Appendix 1</b> helps makes decisions.</p> <ul style="list-style-type: none"> <li>• Shareholders – to decide whether to keep or sell existing shares – sufficient ROCE of 5% for return on investment</li> <li>• Suppliers – to decide whether to keep supplying to MA – current ratio of 2 means MA is not likely to default on payments</li> <li>• Employees – to decide whether to remain working for MA or leave / whether to ask for a pay rise – \$20 million profit so may receive a wage increase</li> <li>• Banks – to decide whether to give loan to MA / decide if likely a loan will be repaid – revenue \$100 million is likely to be sufficient to repay a loan</li> </ul> <p>For example: Employees will have to decide whether they are likely to receive a wage increase and therefore not leave (1) the profit of \$20 million makes this likely (App)</p> <p><b>Application</b> might include: revenue \$100 million; profit \$20 million; profit margin 20%; ROCE 5%; current ratio 2.</p>	8

Question	Answer	Marks															
1(b)	<p><b>Consider the following <u>three</u> characteristics that may be required for entrepreneurs opening a shop located at the airport. Which is the most important characteristic for an entrepreneur to be successful? Justify your answer.</b></p> <ul style="list-style-type: none"> <li>• Risk taker</li> <li>• Creative</li> <li>• Optimistic</li> </ul> <table border="1"> <thead> <tr> <th>Level</th><th>Description</th><th>Marks</th></tr> </thead> <tbody> <tr> <td>3</td><td> <p>Sound application of knowledge and understanding of relevant business concepts using appropriate terminology.</p> <p>Detailed discussion of at least <b>two</b> characteristics.</p> <p>Well-justified conclusion.</p> <p>Candidates discussing all three characteristics in detail, in context and with a well-justified conclusion including why the alternative characteristics were rejected should be rewarded with the top marks in the band.</p> </td><td>9–12</td></tr> <tr> <td>2</td><td> <p>Sound application of knowledge and understanding of relevant business concepts using appropriate terminology.</p> <p>Detailed discussion of at least <b>one</b> characteristic.</p> <p>Judgement with some justification / some evaluation of choices made.</p> <p>Candidates discussing two or more characteristics in detail and applying them to the case should be rewarded with the top marks in the band.</p> </td><td>5–8</td></tr> <tr> <td>1</td><td> <p>Limited application of knowledge and understanding of relevant business concepts.</p> <p>Limited ability to discuss the characteristics with little/no explanation.</p> <p>Simple judgement with limited justification / limited evaluation of choices made.</p> <p>Candidates outlining all three characteristics in context should be rewarded with the top marks in the band.</p> </td><td>1–4</td></tr> <tr> <td>0</td><td>No creditable response.</td><td>0</td></tr> </tbody> </table>	Level	Description	Marks	3	<p>Sound application of knowledge and understanding of relevant business concepts using appropriate terminology.</p> <p>Detailed discussion of at least <b>two</b> characteristics.</p> <p>Well-justified conclusion.</p> <p>Candidates discussing all three characteristics in detail, in context and with a well-justified conclusion including why the alternative characteristics were rejected should be rewarded with the top marks in the band.</p>	9–12	2	<p>Sound application of knowledge and understanding of relevant business concepts using appropriate terminology.</p> <p>Detailed discussion of at least <b>one</b> characteristic.</p> <p>Judgement with some justification / some evaluation of choices made.</p> <p>Candidates discussing two or more characteristics in detail and applying them to the case should be rewarded with the top marks in the band.</p>	5–8	1	<p>Limited application of knowledge and understanding of relevant business concepts.</p> <p>Limited ability to discuss the characteristics with little/no explanation.</p> <p>Simple judgement with limited justification / limited evaluation of choices made.</p> <p>Candidates outlining all three characteristics in context should be rewarded with the top marks in the band.</p>	1–4	0	No creditable response.	0	12

Herzberg’s theory suggests that if working conditions are improved then other factors may then act as motivators. Factors such as praising the cleaners and giving them more responsibility may then act to increase their motivation.</li></ul>	
Motivation theory	How it could help managers motivate airport cleaners									
Taylor	‘Money is the main motivator for employees’ – based on workers in factories – manual workers – therefore increase wage rates and motivation will increase – as cleaners at the airport are manual staff cleaning <b>aeroplanes in between flights</b> – these employees may therefore respond well to an increase in wage rates									
Herzberg	Hygiene factors include good working conditions – needed to stop demotivation but they will not motivate employees – need to have achievement recognised, encourage personal growth, promotional opportunities – the work itself needs to be interesting – some airport cleaners of <b>aeroplanes</b> may like to have recognition of achievement by managers and opportunities for promotion encouraged									
Recommendation	<ul style="list-style-type: none"><li>As cleaning employees are low skilled jobs then Taylor’s theory might be the best one to use. It suggests that increasing the pay of cleaners should increase motivation and encourage them to clean each <b>aeroplane</b> faster. This will increase efficiency, as more <b>aeroplanes</b> would be cleaned in the same amount of time. Herzberg is less suitable as these employees are less likely to gain promotion because they are <b>low-skilled</b>, and it will be difficult to make the job more interesting.</li><li>Herzberg may be more important as <b>working conditions for cleaners are poor</b> and may be acting as a demotivator. Question	Answer			Marks
3(b)	Relevant points might include:			
		Advantages	Disadvantages	
	Online survey	<ul style="list-style-type: none"> <li>Faster with quicker replies than other forms of survey about <b>food purchased</b> at the airport</li> <li>Cheaper than interviews</li> <li>Convenient for participants making them more likely to complete the survey</li> <li>Data can be quickly analysed using IT tools</li> </ul>	<ul style="list-style-type: none"> <li>No interviewer to explain questions if not understood</li> <li>No interviewer to ask follow-up questions</li> <li>May have inaccurate answers if participant didn't take the survey about purchases seriously when <b>waiting for flights</b></li> </ul>	
	Sales data from existing shops at the airport	<ul style="list-style-type: none"> <li>Much cheaper way of gathering information about sales of <b>gifts shops</b> than primary market research as it already exists</li> <li>Sales data are likely to be accurate data as it has been gathered from the <b>gift shops</b> themselves</li> <li>Quicker to gather the information</li> </ul>	<ul style="list-style-type: none"> <li>May be out-of-date as it refers to past data</li> <li>No guarantee that trends of past <b>food sales</b> will continue in the future</li> <li>Not qualitative data – so does not gain information on customer wants in the future for shops in the airport</li> </ul>	
	Interviews at the airport	<ul style="list-style-type: none"> <li>Interviewer can explain the questions so results may be more accurate</li> <li>Interviewer can ask further questions to gain more in-depth answers from <b>business passengers</b></li> </ul>	<ul style="list-style-type: none"> <li>Interviewer bias – they can influence the <b>tourists</b> in their answers</li> <li>Expensive to carry out – in terms of time and money</li> <li>Limited number of people questioned at the airport compared to online surveys</li> </ul>	

Question	Answer		Marks
3(b)	Recommendation	<ul style="list-style-type: none"> <li>As MA wants to find out specific information about passenger wants it might be better to conduct an online survey. This will allow a larger sample of passengers to be asked than interviews and a broader range of answers from <b>business passengers and tourists</b> may be gathered. Sales data will be out-of-date, and interviews are too expensive.</li> <li>Sales data is best if the cost of gathering market research is most important. This will be much cheaper than the two alternative methods as the data already exists and the <b>gift shops</b> in the airport simply need to be asked for the information.</li> <li>In depth detailed opinions will be gained from interviews and this may be the best method as only information on the main types of shops <b>business passengers and tourists</b> want is required and will be gathered.</li> </ul>	

Question	Answer	Marks														
4(a)	<p><b>Explain <u>four</u> factors that might affect the source of finance a business decides to use.</b></p> <p>Award 1 mark for each relevant factor (maximum of four factors).</p> <p>Award a maximum of 1 additional mark for <b>each</b> explanation of the factor that will affect the choice of the source of finance for a business.</p> <p>Relevant factors might include:</p> <table><tr><th>Relevant factors</th><th>Ways the factor will affect the choice of source of finance</th></tr><tr><td>Size and legal form of business</td><td><ul style="list-style-type: none"><li>• An incorporated business can issue new shares whereas an unincorporated business cannot</li><li>• Large businesses can access sources of finance that small businesses cannot such as some specialist banks</li></ul></td></tr><tr><td>Amount required</td><td><ul style="list-style-type: none"><li>• A large amount may only be available as a bank loan rather than as an overdraft</li></ul></td></tr><tr><td>Length of time</td><td><ul style="list-style-type: none"><li>• If the finance required is for the short-term then only short-term sources should be considered such as trade credit or overdraft</li></ul></td></tr><tr><td>Existing loans</td><td><ul style="list-style-type: none"><li>• If the business already has loans, then it may be difficult to take out further loans – may need to find alternative sources of finance such as selling assets</li></ul></td></tr><tr><td>Purpose for using the finance</td><td><ul style="list-style-type: none"><li>• If the purpose is for expansion so long-term sources should be used as the business has a longer time to earn the revenue to repay the amount borrowed</li></ul></td></tr><tr><td>Control</td><td><ul style="list-style-type: none"><li>• The original owners may not want to lose control of the business. If shares are sold to other people or partners are added to a partnership, then more people will be investing in the business and the original owners may lose control.</li></ul></td></tr></table> <p>For example:</p> <p>The purpose for using the finance. (1) If the finance is required for expansion then a long-term source, such as a bank loan should be chosen (1).</p>	Relevant factors	Ways the factor will affect the choice of source of finance	Size and legal form of business	<ul style="list-style-type: none"><li>• An incorporated business can issue new shares whereas an unincorporated business cannot</li><li>• Large businesses can access sources of finance that small businesses cannot such as some specialist banks</li></ul>	Amount required	<ul style="list-style-type: none"><li>• A large amount may only be available as a bank loan rather than as an overdraft</li></ul>	Length of time	<ul style="list-style-type: none"><li>• If the finance required is for the short-term then only short-term sources should be considered such as trade credit or overdraft</li></ul>	Existing loans	<ul style="list-style-type: none"><li>• If the business already has loans, then it may be difficult to take out further loans – may need to find alternative sources of finance such as selling assets</li></ul>	Purpose for using the finance	<ul style="list-style-type: none"><li>• If the purpose is for expansion so long-term sources should be used as the business has a longer time to earn the revenue to repay the amount borrowed</li></ul>	Control	<ul style="list-style-type: none"><li>• The original owners may not want to lose control of the business. If shares are sold to other people or partners are added to a partnership, then more people will be investing in the business and the original owners may lose control.</li></ul>	8
Relevant factors	Ways the factor will affect the choice of source of finance															
Size and legal form of business	<ul style="list-style-type: none"><li>• An incorporated business can issue new shares whereas an unincorporated business cannot</li><li>• Large businesses can access sources of finance that small businesses cannot such as some specialist banks</li></ul>															
Amount required	<ul style="list-style-type: none"><li>• A large amount may only be available as a bank loan rather than as an overdraft</li></ul>															
Length of time	<ul style="list-style-type: none"><li>• If the finance required is for the short-term then only short-term sources should be considered such as trade credit or overdraft</li></ul>															
Existing loans	<ul style="list-style-type: none"><li>• If the business already has loans, then it may be difficult to take out further loans – may need to find alternative sources of finance such as selling assets</li></ul>															
Purpose for using the finance	<ul style="list-style-type: none"><li>• If the purpose is for expansion so long-term sources should be used as the business has a longer time to earn the revenue to repay the amount borrowed</li></ul>															
Control	<ul style="list-style-type: none"><li>• The original owners may not want to lose control of the business. If shares are sold to other people or partners are added to a partnership, then more people will be investing in the business and the original owners may lose control.</li></ul>
