#### UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

## MARK SCHEME for the October/November 2011 question paper

## for the guidance of teachers

# 0455 ECONOMICS

0455/21

Paper 2 (Structured Questions), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Ра	ge 2	Mark Scheme: Teachers' version	Syllabus 0455	Paper
			IGCSE – October/November 2011	0455	21
1	(a)	<ul> <li>an i</li> <li>time</li> <li>an i</li> <li>an i</li> </ul>	nic growth: increase in the total output of goods and services e ncrease in national income ncrease in real Gross Domestic Product (GDP) ncrease in the productive capacity/potential of an e		ver a period o
	(b)	<ul><li>prof</li><li>for t</li><li>a fir</li></ul>	aximisation: fit is the reward to business owners or entrepreneur taking the risk of setting up a firm m which does not make a profit may be forced to cl ined profit is an important source of finance for firm	ose down	[4]
	(c)	<ul> <li>ban</li> <li>idea</li> <li>this</li> <li>this</li> <li>but</li> <li>imp</li> </ul>	nce of bank lending by commercial banks: k lending in China up by 34% in 2009 a of greater liquidity in the banking system will enable firms and private individuals to finance e will lead to higher employment and incomes there are potential problems – it could be inflation orts, affecting the balance of payments ted funds will involve an opportunity cost.		-
		A maxim	num of 4 marks if only positive aspects are describe	d.	[6]
	(d)	<ul> <li>a ris</li> <li>can</li> <li>Potentia</li> <li>can</li> <li>cou</li> </ul>	al advantages: se in national output; more goods and services prod lead to a rise in standards of living. al disadvantages: cause external costs, such as pollution ld reduce quality of life, e.g. less leisure time. num of 5 marks for a one-sided answer.	luced	[8]
2	(a)	<ul> <li>mar</li> <li>mac</li> <li>peo</li> <li>2 marks</li> <li>2 marks</li> </ul>	ation of factors: nagers – accept managers as either labour or enter chinery – capital ple – labour. for the identification of 2 or 3 factors. for the explanation of 2 or 3 factors. accept land.	prise	[4]
	(b)	(i) Hor	izontal integration:	an of a good combi	

- when firms engaged in the same stage of production of a good combine
- examples of car firms that have combined, e.g. Tata Motors and Jaguar. [4]

	V	www.uynanncpapers.com	
Page 3	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – October/November 2011	0455	21

- (ii) Vertical integration:
  - when firms engaged in different stages of production combine
  - forward integration involves going forward to a retail outlet, e.g. where a car producer owns/controls dealerships

www.dvnamicnaners.com

• backward integration involves going backward to the supply of raw materials, e.g. where a car producer owns/controls supplies of raw materials/parts. [4]

The benefits will relate to the possible advantages of economies of scale in reducing the costs of production.

A maximum of 3 marks in each of (i) and (ii) for an answer which makes no explicit reference to the car industry.

- (c) Reasons for differences in remuneration:
  - skills/training
  - education/qualifications
  - experience
  - level of responsibility
  - geographical area
  - trade union membership
  - demand factors (idea of derived demand)
  - supply factors.

Answers which make no reference to the demand for, or the supply of, labour can gain no more than 5 marks. Similarly, an answer which makes no reference to people in the car industry can gain no more than 5 marks. Answers which fail to address both of these aspects can gain no more than 4 marks. [8]

- **3** (a) Description of an indirect tax:
  - these are taxes on the expenditure on goods and services (1)
  - they are added to the price of goods and services and normally collected from those selling the goods or services (1).

Example:

• sales tax (e.g. VAT, GST), tariffs, excise duties (1).

[3]

[6]

- (b) Diagram:
  - correct labelling of P and Q axes and D and S curves (1)
  - shift of the supply curve to the left (1)
  - equilibrium price rises and equilibrium quantity falls (1).

Explanation of what is shown in the diagram (3).

(c) Po: • •	incre incre enco	benefits: ease in incomes ease in standards of living/quality of life ourages economic growth/increase in GDP		
•	redu	ces the amount of money spent on benefits		

- and releases this money for other types of spending (idea of opportunity cost)
- such as health or education
- brings in more revenue from taxation, both direct (from the incomes earned)
- and indirect (from the extra expenditure)
- helps reduce/eliminate a budget deficit
- reduces the extent of crime and social disorder
- encourages exports
- and helps reduce/eliminate a balance of payments deficit.

Possible disadvantages:

- inflationary effects
- effect on balance of payments.

A maximum of 6 marks for a one-sided discussion.

#### 6 (a) Possible reasons:

- birth rate
- death rate
- fertility rate
- net migration
- religious attitudes and beliefs
- knowledge about/availability of contraception
- standard of living/quality of life
- literacy rate
- average age of marriage.
- (b) (i) The geographical distribution of its population:
  - there is likely to be a move away from rural villages
  - to urban areas
  - and this increased urbanisation will be likely to place a greater burden on resources and available space. [2]

[10]

[6]

[4]

- (ii) The occupational distribution of its workforce:
  - continued reduction in the primary sector
  - initially an increase and then a reduction in the secondary sector
  - continued increase in the tertiary sector.
