| _ |

Students did not sit exam papers in the June 2020 series due to the Covid-19 global pandemic.

This mark scheme is published to support teachers and students and should be read together with the question paper. It shows the requirements of the exam. The answer column of the mark scheme shows the proposed basis on which Examiners would award marks for this exam. Where appropriate, this column also provides the most likely acceptable alternative responses expected from students. Examiners usually review the mark scheme after they have seen student responses and update the mark scheme if appropriate. In the June series, Examiners were unable to consider the acceptability of alternative responses, as there were no student responses to consider.

Mark schemes should usually be read together with the Principal Examiner Report for Teachers. However, because students did not sit exam papers, there is no Principal Examiner Report for Teachers for the June 2020 series.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the June 2020 series for most Cambridge IGCSE™ and Cambridge International A & AS Level components, and some Cambridge O Level components.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always whole marks (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit
 is given for valid answers which go beyond the scope of the syllabus and mark scheme,
 referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these
 features are specifically assessed by the question as indicated by the mark scheme. The
 meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

| Question | Answer | Marks |
|-----------|--|-------|
| 1(a)(i) | (secondary) road, | 1 |
| 1(a)(ii) | 250 metres, | 1 |
| 1(a)(iii) | church, | 1 |
| 1(a)(iv) | deciduous trees, | 1 |
| 1(a)(v) | high voltage line, | 1 |
| 1(b) | radial/meet in centre/meet in Ouffet, main road E–W and secondary road SSW–NNE, | 1 |
| 1(c)(i) | 8500 m, | 1 |
| 1(c)(ii) | east-south east, | 1 |
| 1(c)(iii) | 109–113, | 1 |
| 1(c)(iv) | 801890, | 1 |
| 1(d)(i) | correct position of river, correct position of Chat. De Renal, | 2 |
| 1(d)(ii) | section continuing to rise but not reaching 300m, | 1 |
| 1(e) | it is meandering, it has a flood plain of varying width, it is 50–100 m wide, | 3 |
| 1(f) | on valley floor,) on valley side,) in valley alone = 1 west side/east facing, road junction, bridge point, railway, services/2 named services, river for water, woodland for fuel, | 4 |

| Question | Answer | Marks |
|----------|---|-------|
| 2(a) | in north, in centre, inland, | 2 |
| 2(b)(i) | dense population, no sparse areas, no/few minerals, relies on manufacturing, | 3 |
| 2(b)(ii) | sparse population, centre very sparse/<0.1/ km², very large area, rich in minerals but exports, | 3 |

| Question | Answer | Marks |
|-----------|---|-------|
| 3(a)(i) | different threshold populations, different frequency of purchase, | 1 |
| 3(a)(ii) | hospital supermarket school local shop, | 1 |
| 3(a)(iii) | some people inefficient/don't go to nearest supermarket, people may prefer different goods from different supermarkets, other reasons for going to towns, | 2 |
| 3(b) | extends along road, quicker/easier transport to town, upland sparsely populated, fewer services, bigger area needed for threshold population, influence of other settlement/supermarket (to south west), | 4 |

| Question | Answer | Marks |
|----------|---|-------|
| 4 | Fig. 4.1 flat floor/flood plain second mark for flat area between lakes, steep sides concave slope, straight valley, wide valley/floor, delta, U-shaped, Fig. 4.2 V-shaped (look at V in valley), steep sides, narrow valley/floor, interlocking spurs, straight slopes, Reserve 3 marks for each photograph. | 8 |

| Question | Answer | Marks |
|-----------|--|-------|
| 5(a) | they are within 20° of the Equator, they all reach a coastline, | 2 |
| 5(b) | there is a low annual range of temperature, temperatures are high throughout the year, there are two wetter seasons, | 3 |
| 5(c)(i) | canopy, | 1 |
| 5(c)(ii) | drip tips, | 1 |
| 5(c)(iii) | buttress (roots), | 1 |
