

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Ordinary Level

**MARK SCHEME for the May/June 2010 question paper
for the guidance of teachers**

5070 CHEMISTRY

5070/31

Paper 3 (Practical Test), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – May/June 2010	5070	31

1 (a) Titration

Accuracy 8 marks

For the two best titres give:

4 marks for a value within 0.2 cm³ of supervisor2 marks for a value within 0.3 cm³ of supervisor1 mark for a value within 0.4 cm³ of supervisorConcordance 3 marks

Give:

3 marks if all the ticked values are within 0.2 cm³2 marks if all the ticked values are within 0.3 cm³1 mark if all the ticked values are within 0.4 cm³Average 1 mark

Give 1 mark if the candidate calculates a correct average (error not greater than 0.05) of all the ticked values. [12]

Assuming a 25 cm³ pipette and a titre of 24.8 cm³.(b) moles of sodium hydroxide in 25 cm³ of P

$$= \frac{25 \times 0.3}{1000}$$

$$= 0.0075$$

[1]

(c) concentration in mol/dm³ of organic acid in Q

$$= \frac{18.0}{120}$$

$$= 0.15$$

[1]

(d) moles of organic acid in average titre of Q

$$= \frac{24.8 \times 0.15}{1000}$$

$$= 0.00372$$

Answers should be correct to + or – 1 in the third significant figure.

[1]

(e) moles of sodium hydroxide which react with 1 mole of C₃H₄O₅

$$= \frac{0.0075}{0.00372}$$

$$= 2.02$$

[1]

(f) balanced equation for the reaction

left hand side of equation i.e. whole numbers consistent with (e) (1)

right hand side of equation i.e. correct formulae and overall equation balanced (1)

[2]

Page 3	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – May/June 2010	5070	31

2 R is sodium carbonate S is potassium iodide T is potassium chromate(VI)

Test	Notes
<p>General points For ppt Allow solid, suspension, powder</p> <p>For gases Name of gas requires test to be at least partially correct. Effervesces = bubbles = gas vigorously evolved (but not just gas evolved)</p> <p>Solutions Colourless not equivalent to clear, clear not equivalent to colourless</p>	
Solution R	
Test 1 4 marks (a) Effervescence (1) Gas turns limewater milky (1) Carbon dioxide (1) (b) No reaction (1)	Alternatively marks for test on gas and identification can be awarded in Test 2(b) or 3(c) .
Test 2 3 marks (a) Brown ppt (1) (b) Ppt disappears (1) Colourless solution (1)	Accept cream or yellow but not white. Alternatively this mark can be awarded in Test 3(b) .
Test 3 2 marks (a) White ppt (1) (b) Ppt disappears (1)

	GCE O LEVEL – May/June 2010	5070	31

Test	Notes
<p>General points For ppt Allow solid, suspension, powder</p> <p>For gases Name of gas requires test to be at least partially correct. Effervesces = bubbles = gas vigorously evolved (but not just gas evolved)</p> <p>Solutions Colourless not equivalent to clear, clear not equivalent to colourless</p>	
Solution S	
Test 1 2 marks (a) No reaction (1) (b) Solution turns red/brown or black solid formed (1)	
Test 2 2 marks (a) Yellow ppt (1) (b) Ppt remains (1)	
Test 3 1 mark No reaction (1)	Any indication of reaction in either (a) or (b) scores 0.

Page 5	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – May/June 2010	5070	31

Test	Notes
<p>General points For ppt Allow solid, suspension, powder</p> <p>For gases Name of gas requires test to be at least partially correct. Effervesces = bubbles = gas vigorously evolved (but not just gas evolved)</p> <p>Solutions Colourless not equivalent to clear, clear not equivalent to colourless</p>	
Solution T	
<p>Test 1 6 marks</p> <p>(a) Orange solution (1)</p> <p>(b) Blue solution (1) Effervescence (1) Gas relights a glowing splint (1) Oxygen (1) Green solution (1)</p>	
<p>Test 2 3 marks</p> <p>(a) Red or brown ppt (1)</p> <p>(b) Ppt disappears (1) Yellow or orange solution (1)</p>	Alternatively this mark can be awarded in Test 3(b) .
<p>Test 3 2 marks</p> <p>(a) Yellow ppt (1)</p> <p>(b) Ppt disappears (1)</p>	

[19]

R is CO_3^{2-} (carbon dioxide identified in test 1) (1)
S is I^- (test 1 correct or insoluble yellow ppt in test 2) (1)
T contains a transition metal (1)

[3]

Note: 25 marking points, maximum 22.
