9709/61

Paper 6 Probability & Statistics 1 (S1)

May/June 2013

1 hour 15 minutes

Additional Materials: Answer Booklet/Paper
 Graph Paper
 List of Formulae (MF9)

READ THESE INSTRUCTIONS FIRST

If you have been given an Answer Booklet, follow the instructions on the front cover of the Booklet.

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

Answer **all** the questions.

Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place in the case of angles in degrees, unless a different level of accuracy is specified in the question.

The use of an electronic calculator is expected, where appropriate.

You are reminded of the need for clear presentation in your answers.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The total number of marks for this paper is 50.

Questions carrying smaller numbers of marks are printed earlier in the paper, and questions carrying larger numbers of marks later in the paper.

This document consists of **3** printed pages and **1** blank page.

- 1 A summary of 30 values of x gave the following information:

$$\Sigma(x - c) = 234, \quad \Sigma(x - c)^2 = 1957.5,$$

where c is a constant.

- (i) Find the standard deviation of these values of x . [2]
- (ii) Given that the mean of these values is 86, find the value of c . [2]
- 2 Assume that, for a randomly chosen person, their next birthday is equally likely to occur on any day of the week, independently of any other person's birthday. Find the probability that, out of 350 randomly chosen people, at least 47 will have their next birthday on a Monday. [5]
- 3 The following back-to-back stem-and-leaf diagram shows the annual salaries of a group of 39 females and 39 males.

	Females			Males	
(4)	5 2 0 0	20	3		(1)
(9)	9 8 8 7 6 4 0 0 0	21	0 0 7		(3)
(8)	8 7 5 3 3 1 0 0	22	0 0 4 5 6 6		(6)
(6)	6 4 2 1 0 0	23	0 0 2 3 3 5 6 7 7		(9)
(6)	7 5 4 0 0 0	24	0 1 1 2 5 5 6 8 8 9		(10)
(4)	9 5 0 0	25	3 4 5 7 7 8 9		(7)
(2)	5 0	26	0 4 6		(3)

Key: 2 | 20 | 3 means \$20 200 for females and \$20 300 for males.

- (i) Find the median and the quartiles of the females' salaries. [2]
- You are given that the median salary of the males is \$24 000, the lower quartile is \$22 600 and the upper quartile is \$25 300.
- (ii) Represent the data by means of a pair of box-and-whisker plots in a single diagram on graph paper. [3]
- 4 (a) The random variable Y is normally distributed with positive mean μ and standard deviation $\frac{1}{2}\mu$. Find the probability that a randomly chosen value of Y is negative. [3]
- (b) The weights of bags of rice are normally distributed with mean 2.04 kg and standard deviation σ kg. In a random sample of 8000 such bags, 253 weighed over 2.1 kg. Find the value of σ . [4]
