GCE Biology (6BI08) Paper 6B
Practical Biology and Investigative Skills

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information, please call our GCE line on 0844 576 0025, our GCSE team on 0844 576 0027, or visit our qualifications website at www.edexcel.com.

For information about our BTEC qualifications, please call 0844 576 0026, or visit our website at www.btec.co.uk.

If you have any subject specific questions about this specification that require the help of a subject specialist, you may find our Ask The Expert email service helpful.

Ask The Expert can be accessed online at the following link:

<http://www.edexcel.com/Aboutus/contact-us/>

Alternatively, you can contact our Science Subject Advisor directly by sending an email to ScienceSubjectAdvisor@EdexcelExperts.co.uk.

You can also telephone 0844 576 0037 to speak to a member of our subject advisor team.

(If you are calling from outside the UK please dial + 44 1204 770 696 and state that you would like to speak to the Science subject specialist).

Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

Question Number	Answer	Mark
1(a)	<ol style="list-style-type: none"> 1. suitable dependent variable identified e.g. oxygen consumption ; 2. suitable method for measuring dependent variable e.g. (rate of) movement of ink in (respirometer) tube ; 3. idea of time measurement to obtain rate e.g. time to move a set distance ; 4. at least five suitable temperatures compared ; 5. description of how temperature will be controlled for each measurement e.g. thermostatically controlled water bath, water bath set at a temperature ; 6. recognition of need to absorb the carbon dioxide produced /eq ; 7. specific detail of how to set up {respirometer / seeds / apparatus} provided ; 8. idea of replicates at each temperature ; 9. indication of thought behind selection of seeds e.g. age, same plant ; 10. some consideration of need for equilibration / compensation for pressure changes/ eq ; 11. suitable control described ; 	(5)

Question Number	Answer	Mark
1(b)(i)	<ol style="list-style-type: none"> 1. {type /source /eq} of seeds ; 2. {mass / number / eq} of seeds ; 3. age of seeds / eq ; 4. pH ; 5. reference to equilibration e.g. time left before measuring ; 6. moisture / humidity / water / eq ; 7. any other appropriate variable ; 	(2)

Question Number	Answer	Mark
1(b)(ii)	<ol style="list-style-type: none"> 1. suitable control method for variable described ; 2. description of likely effect on the dependent variable ; 	(2)

Question Number	Answer	Mark
1(c)	<ol style="list-style-type: none"> 1. {no / less} movement of the {liquid / eq } in the {respirometer /eq} / eq ; 2. {no / less} change in { volume / pressure } of the gas /eq ; 3. idea of effect on {aerobic /anaerobic} respiration ; 4. Idea that anaerobic respiration produces {less / no / eq} carbon dioxide ; 	(3)

Question Number	Answer	Mark
2(a)	Idea that there will be no significant {difference / correlation} in the heart rate (of the Daphnia) in different concentrations of caffeine /eq ;	(1)

Question Number	Answer	Mark
2(b)	<ol style="list-style-type: none"> 1. simple nervous system / invertebrate / eq ; 2. idea of reduced {awareness of pain/ stress / eq} ; <p>OR</p> <ol style="list-style-type: none"> 3. abundant in nature / eq ; 4. idea of no threat to {its (species) / dependent species / food chain / eq} survival ; <p>OR</p> <ol style="list-style-type: none"> 5. bred for fish food / eq ; 6. will thus die anyway / eq ; 	(2)

Question Number	Answer	Mark																
2(c)	<table border="1" data-bbox="397 338 1142 663"> <thead> <tr> <th data-bbox="397 338 719 427">Concentration of caffeine (%)</th> <th data-bbox="719 338 1142 427"><i>Daphnia</i> mean heart rate / bpm</th> </tr> </thead> <tbody> <tr> <td data-bbox="397 427 719 461">0.00</td> <td data-bbox="719 427 1142 461">178 / 178.4</td> </tr> <tr> <td data-bbox="397 461 719 495">0.01</td> <td data-bbox="719 461 1142 495">241 / 240.8</td> </tr> <tr> <td data-bbox="397 495 719 528">0.10</td> <td data-bbox="719 495 1142 528">257 / 256.8</td> </tr> <tr> <td data-bbox="397 528 719 562">0.50</td> <td data-bbox="719 528 1142 562">261 / 261.2</td> </tr> <tr> <td data-bbox="397 562 719 595">1.00</td> <td data-bbox="719 562 1142 595">267 / 267.2</td> </tr> <tr> <td data-bbox="397 595 719 629">2.00</td> <td data-bbox="719 595 1142 629">275 / 275.2</td> </tr> <tr> <td data-bbox="397 629 719 663">5.00</td> <td data-bbox="719 629 1142 663">281 / 280.8</td> </tr> </tbody> </table> <p data-bbox="357 696 1038 864"> 1. units correct ; 2. consistent use of decimal places e.g. none or 1 ; 3. all means correct ; </p>	Concentration of caffeine (%)	<i>Daphnia</i> mean heart rate / bpm	0.00	178 / 178.4	0.01	241 / 240.8	0.10	257 / 256.8	0.50	261 / 261.2	1.00	267 / 267.2	2.00	275 / 275.2	5.00	281 / 280.8	(3)

Question Number	Answer	Mark
2(e)	<p>ALLOW error carried forward from 2(c) for means and from 2 (d) units</p> <p>A axes correct orientation and continuous linear scale with units and labels ;</p> <p>F data plotted as{ x y scatter graph / line graph} ;</p> <p>P points plotted correctly ;</p>	(3)

Question Number	Answer	Mark
2(f)	<ol style="list-style-type: none"> 1. (critical value) is 0.79 ; 2. the value is greater than the critical value (at the 95% confidence level) ; 3. idea that there is a (positive) correlation between the concentration of caffeine and the heart rate of the <i>Daphnia</i> / eq ; 4. idea that low concentrations have a large effect, higher concentrations produce a smaller increase / eq ; 5. explanation provided e.g. caffeine is a stimulant / effect on nervous system ; 	(4)

Question Number	Answer	Mark
3(a)	<p>Any two from:</p> <ol style="list-style-type: none"><li data-bbox="405 367 1166 434">1. tissue culture may provide good growing conditions for {bacteria / fungi} / eq ;<li data-bbox="405 465 1222 533">2. possibility of an {allergic / irritant / eq} reaction to the {plant growth regulators / plant material} / eq ;<li data-bbox="405 564 979 598">3. release of GMOs into environment / eq ;<li data-bbox="405 629 852 663">4. use of sharp instruments / eq ;<li data-bbox="405 694 708 728">5. other sensible risk ;	(2)

Question Number	Answer	Mark
3(b)	<ol style="list-style-type: none"> 1. practise proposed method / see if proposed method will work / eq ; 2. determine appropriate dependent variable / eq ; 3. check most suitable conditions for growth of plant tissue / eq ; 4. select suitable timescale for measuring growth rates / eq ; 5. consider what {other / named} variable needs to be taken into account / eq ; 6. check if the type of {plant / tissue /eq} used is affected / eq ; 7. check for (suitable) range of concentrations of plant {growth regulator / hormone / eq} to be used ; 	(3)

Question Number	Answer	Mark
3 (c)	<ol style="list-style-type: none"> 1. clear statement of dependent variable i.e. exactly what is to be measured stated (e.g. percentage change in mass of plant tissue / eq) ; 2. clear statement of independent variable concentration of plant {growth regulator / hormone / eq} ; 3. reference to at least 5 concentrations ; 4. and 5. specific descriptions of plant tissue culture provided (e.g. need to grow on nutrient gel, aseptic conditions, antibiotics in gel to prevent growth of microorganisms, etc) ;; 6. some clear consideration of time period over which the growth will be measured / eq ; 7.and 8. identification of up to 2 other variables that could affect growth ;; 9. and 10. Description of how those 2 identified variables can be controlled ;; 11. clear reference to need for repeats (at each concentration) ; 12. control of source of plant tissue e.g. use of same plant/leaf ; 	<p>(8) + 2 SPG (see below)</p>

SPG award up to 2 marks

level	Mark	Descriptor
Level 1	0	The account is very disorganised and is very difficult to follow. Scientific vocabulary is very limited with many spelling and grammatical errors.
Level 2	1	There is some disorganisation in the account which is not always in the correct sequence. Some relevant scientific vocabulary is used. The account is not always in continuous prose and there are grammatical errors and some important spelling mistakes.
Level 3	2	The account is well organised with no undue repetition and a correct sequence. There is good use of scientific vocabulary in the context of the investigation described. The account is written in continuous prose which is grammatically sound with no major spelling errors.

Question Number	Answer	Mark
3(d)	<ol style="list-style-type: none"> 1. clear table which matches method described with headings and units ; 2. change in growth calculated e.g. by measuring percentage change in mass ; 3. means calculated from repeat data ; 4. {scatter/line} graph format with correctly labelled axes / bar chart of calculated means / eq ; 5. reference to an appropriate statistical test e.g. use of correlation test (Spearman's Rank / eq) / suitable test to compare specific concentrations and rates of growth (t-test/ Mann-Whitney U test/ Chi – squared / eq) ; 	(4)

Question Number	Answer	Mark
3(e)	<ol style="list-style-type: none"> 1. difficult to control all {variables / factors /eq} affecting tissue growth ; 2. example of uncontrolled variable e.g. exposure to bacteria ; 3. damage to plant tissue during preparation may affect growth / eq ; 4. another variable may be acting as a limiting factor for plant tissue growth / eq ; 5. idea of need for more than one type of {plant growth regulator / hormone / eq} for effective growth (of new plantlets) ; 6. suitable reference to difficulty of proposed technique ; 	(3)
