Paper 1 Short Answer and Data Response

October/November 2022

MARK SCHEME

Maximum Mark: 80

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2022 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of **22** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct / valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**Social Science-Specific Marking Principles
(for point-based marking)**

1 Components using point-based marking:

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require *n* reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

Question	Answer	Marks	Notes
1(e)	<p>Explain <u>two</u> ways a business in the primary sector might contribute to sustainable development. Which do you think is the best way? Justify your answer.</p> <p>Award up to 2 marks for identification of relevant ways.</p> <p>Award up to 2 marks for relevant development of points.</p> <p>Award 2 marks for a justified decision as to which is the best way for a business in the primary sector to contribute to sustainable development.</p> <p>Points might include:</p> <ul style="list-style-type: none"> • Reduce / limit the number of raw materials extracted / harvested [k] so more left for future use [an] but could reduce potential sales [an] • Buy energy efficient machinery / electric vehicles [k] but high initial cost [an] which the business might not be able to afford [an] • Use renewable energy [k] as this will conserve finite (limited) resources [an] • Recycle [k] which helps reduce number of materials needed / less waste [an] • Reuse materials [k] • Replant trees / restore land to nature after use [k] <p>Other appropriate answers should also be credited.</p> <p>Justification might include:</p> <p>Businesses could reduce the number of raw materials extracted [k] so more left for future use [an]. Alternatively, it could use electric vehicles [k] but these are expensive to buy [an]. I think electric vehicles are better because harvesting less could be difficult for sectors such as farming who need to provide sufficient food to meet people's basic needs [eval]. Whereas changing to electric vehicles can still mean fewer finite resources are gathered but helping the current population survive. [eval]</p>	6	<p>This is a general question so there are no marks for application.</p> <p>Some points could be [k] or [an] or can be used as development for more than one way but do not award the same point twice.</p>

However, I think type of product [k] is more important because if the product is unique then do not need to produce on large scale [an]. Then the business has limited choice about the method it can use [eval] and if the business cannot produce a product that meets customer needs, the size of market doesn't really matter. [eval]</p>	6	<p>This is a general question so there are no marks for application.</p> <p>Some analysis could be used as development for more than one point but do not award the same point twice as this is repetition.</p>

3(e)	<p>Explain <u>two</u> stages of the recruitment and selection process that businesses use. Which stage do you think is more important? Justify your answer.</p> <p>Award up to 2 marks for identification of relevant points.</p> <p>Award up to 2 marks for relevant development of points.</p> <p>Award 2 marks for a justified decision as to which stage of the recruitment and selection process is more important.</p> <p>Points might include:</p> <ul style="list-style-type: none"> • Job analysis [k] helps work out whether need to recruit someone / tasks and duties can be given to someone else [an] • Job description [k] provides a clear idea of what job involves [an] so can help avoid applications from people who cannot do the job [an] • Person / job specification [k] identifies qualifications / skills / experience needed [an] • Advertising the vacancy [k] which raises awareness of the job [an] increasing the number of potential applicants [an] • Shortlisting / screening [k] allows business to reduce the number of candidates who will be interviewed [an] • Interview [k] allows you to find out more about the candidate (in terms of abilities / skills) [an] but this may be time consuming [an] <p>Other appropriate responses should also be credited.</p> <p>Justification might include:</p> <p>A job description [k] is helpful as it sets out the roles and responsibilities of job [an]. Another stage is advertising the vacancy [k] which helps make people aware about the jobs [an]. I think the job description is more important because without knowing what you want the person to do, the business is unlikely to know if it has found a suitable candidate [eval]. This means that the money spent on advertising may not be cost effective. [eval]</p>	6	<p>This is a general question so there are no marks for application.</p> <p>The focus of the answer should focus on the business and not employees.</p>

Question	Answer	Marks	Notes

Award one mark for a partial definition.</p> <p>A small, usually specialised, segment of a much larger market [2]</p> <p>Partial definition e.g. small part / segment of a (large) market [1]</p> <p>OR Part of the market with specific needs / characteristics [1]</p>	2	
4(b)	<p>Identify <u>two</u> impacts of legal controls on marketing strategy.</p> <p>Award 1 mark per impact (max 2).</p> <p>Points might include:</p> <ul style="list-style-type: none"> • Cannot make misleading / false claims in advertisements / adverts may have to be changed or withdrawn / influence where / when / who it can be advertised • Increase costs / time spent on marketing • May have to change what is written on packaging / ensure product description is accurate on packaging / make sure information promotion / packaging is not misleading • Cannot sell underweight goods • Cannot charge less than minimum price set / cannot charge more than maximum price set / cannot fix prices (with competitors) <p>Other appropriate responses should also be credited.</p>	2

Another factor is access to customers [k]. Overall, I think customers is likely to be more important as a business has limited influence over the cost of rent whereas it can influence its sales [eval]. If it locates where there are many customers, the business has a better chance to gain enough revenue to pay its rent even if this is higher than in quieter locations. [eval]</p>	6	<p>This is a general question so there are no marks for application.</p> <p>Some points of analysis could apply to several points but only award once.</p>
