

CAMBRIDGE INTERNATIONAL EXAMINATIONS
International General Certificate of Secondary Education

MARK SCHEME for the May/June 2014 series

0452 ACCOUNTING

0452/23

Paper 2, maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

[Total: 22]

- 3 (a) (i) The straight line method of depreciation uses the same amount of depreciation each year. [1]
- (ii) This method is used where each year is expected to benefit equally from the use of the asset. [1]
- (b) (i) The reducing balance method of depreciation uses the same percentage rate of depreciation each year, but it is calculated on the book value at the end of each year. [1]
- (ii) This method is used where the greater benefits from the use of the asset will be gained in the early years of its life. [1]
- (c) 1 Computer equipment – reducing balance method (1)
2 Buildings – straight line method (1)
3 Motor vehicle – reducing balance method (1) [3]
- (d) (i) The asset is valued at the end of each year and the difference between the opening and closing value is the depreciation for the year. [1]
- (ii) This method is used where it is impractical or difficult to maintain detailed records of the asset. [1]
- (iii) Loose tools, packing cases, small items of equipment
Or other suitable example

Page 8	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2014	0452	23

6 (a)

Ratio	Year ended 31 March 2014
percentage of gross profit to revenue (sales)	31.11 % (2)
percentage of profit for the year to revenue (sales)	7.78 % (2)OF
current ratio	1.09 : 1 (2)
quick ratio	0.69 : 1 (2)

[8]

Calculations

Percentage of gross profit to revenue

$$\frac{450000 - 310000 (1)}{450000} \times \frac{100}{1} = 31.11\% (1)$$

Percentage of profit for the year to revenue

$$\frac{140000 \text{ O/F} - 105000 (1) \text{ OF}}{450000} \times \frac{100}{1} = 7.78\% (1) \text{ OF}$$

Current ratio

$$(21500 + 100 + 37400) : (36800 + 12200 + 5000) (1) = 1.09 : 1 (1)$$

Quick ratio

$$(100 + 37400) : (36800 + 12200 + 5000) (1) = 0.69 : 1 (1)$$

(b) Increase in selling price

Reduction in trade discount allowed to customers

Selling at a higher mark-up

Decrease in cost price

Increase in trade discount allowed by suppliers

Taking advantage of bulk buying

Or other suitable reason based on answer to (a)**Any 2 reasons (1) each**

[2]

(c) Year ended 31 March 2013 (1)

In 2013 the expenses were 17.85% of revenue: in 2014 the expenses were 23.33% of revenue. (2)

Or suitable answer based on answers to (a)

[3]

Page 9	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2014	0452	23

(d)

	Increase	Decrease	No effect
Cheque paid to credit supplier			✓ (1)
Goods taken for own use		✓ (1)	
Purchase of non-current asset on credit		✓ (1)	

[3]

(e) Unsatisfied (1)

The ratio of liquid assets to current liabilities has fallen from 0.90:1 to 0.69:1. (1)

She cannot pay immediate liabilities from liquid assets. (1)

Or suitable answer based on answer to (a)

[3]

[Total: 19]
