Paper 2 Algorithms, Programming and Logic

October/November 2024

1 hour 45 minutes

You must answer on the question paper.

No additional materials are needed.

INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- Calculators must **not** be used in this paper.

INFORMATION

- The total mark for this paper is 75.
- The number of marks for each question or part question is shown in brackets [].
- No marks will be awarded for using brand names of software packages or hardware.

This document has **16** pages. Any blank pages are indicated.

1 Tick (✓) **one** box to show which check is used for verification when data is input.

- A length check
- B range check
- C type check
- D visual check

[1]

2 Tick (✓) **one** box to identify which option is used to show the inputs and output of a Boolean expression.

- A flowchart
- B trace table
- C truth table
- D variable

[1]

3 **Four** operators and **three** types of operator are shown.

Draw **one or more** lines from each operator to its correct operator type.

Operator	Operator type
>=	Boolean
AND	Arithmetic
DIV	Logical
+	

[4]

4 Identify **three** stages of the program development life cycle from the following list of words.

analysis

decomposition

design

input

pseudocode

testing

variable

1

2

3

[3]

5 Describe **three** methods that are used to design and construct a solution to a problem.

Method 1

.....

.....

.....

Method 2

.....

.....

[6]

DO NOT WRITE IN THIS MARGIN

6 An incomplete algorithm has been written in pseudocode to count the number of zeros stored in an array and total the non-zero values.

```

01 DECLARE A[1:50] : INTEGER
02 DECLARE C : INTEGER
03 DECLARE I : INTEGER
04 DECLARE T : INTEGER
05 I ← 0
06 .....
07 FOR C ← 1 TO 50
08     IF A[C] .....
09     THEN
10         T ← T + 1
11     ELSE
12         I ← I + A[C]
13     ENDIF
14 .....

```

- (a) Complete the given pseudocode algorithm. [3]
- (b) Write the pseudocode to display, with suitable messages, the number of zeros stored in the array and the total of the non-zero values.

.....

.....

.....

.....

.....

.....

..... [3]

(c) Meaningful identifiers have **not** been used in the algorithm. Suggest suitable meaningful identifiers for:

The array:

A

The variables:

T

C

I

7 Consider the logic circuit:

(a) Write a logic expression for the given logic circuit. Do **not** attempt to simplify the logic expression.

W =

..... [3]

(b) Complete the truth table from the given logic circuit.

X	Y	Z	Working space	W
0	0	0		
0	0	1		
0	1	0		
0	1	1		
1	0	0		
1	0	1		
1	1	0		
1	1	1

8 A programmer is designing a program to check the length of a password and to check if the password input is the same as the stored password.

The program requirements are:

- input the password, `Password`
- check if there are at least 8 characters in the password
- check that the password is **not** the same as the stored password `OldPass`
- output 'accepted' if both tests are completed successfully
- otherwise, output 'rejected'.

Use the variable names given.

(a) Complete the flowchart for the program.

(b) The accepted password, Password, is to be written to the file MyPassword.txt

Write pseudocode to:

- open the file
- write the accepted password to the file
- close the file.

.....

.....

.....

.....

..... [3]

(c) Explain why the accepted password needs to be stored in a file.

.....

.....

.....

..... [2]

- 9 An algorithm has been written in pseudocode to check if a temperature is in a given range. The temperature values used in the algorithm are correct.

```

01 REPEAT
02     OUTPUT "Please enter temperature "
03     INPUT Temp
04     IF Temperature = 999
05         THEN
06             IF Temperature > 38.0
07                 THEN
08                     OUTPUT "Temperature too high"
09             ENDIF
10             IF Temperature < 35.0
11                 THEN
12                     OUTPUT "Temperature too low"
13             ENDIF
14             IF Temperature >= 35.0 OR Temperature <= 38.0
15                 THEN
16                     OUTPUT "Temperature normal"
17             ENDIF
18     ENDIF
19 WHILE Temperature = 999

```

- (a) Identify the line numbers of **four** errors in the pseudocode and suggest a correction for each error.

Error 1 line number

Correction

.....

Error 2 line number

Correction

.....

Error 3 line number

Correction

.....

Error 4 line number

Correction

.....

10 A shop that sells cheese has set up a new database table called CheeseStock to store details of the cheeses available for sale. Part of this table is given.

ChNo	Name	InStock	SupplierCode	PricePerKg	WeightKg
CH01	American	Yes	XYZ	4.50	20.0
CH02	Brie	Yes	XYZ	7.50	21.0
CH03	Burrata	No	IMP	13.75	0.0
CH04	Camembert	No	ABC	16.85	0.0
CH05	Cheddar	Yes	ABC	5.00	50.0
CH06	Comté	No	SPC	7.35	0.0
CH07	Cottage	Yes	XYZ	4.50	3.0
CH08	Cream	Yes	XYZ	5.50	6.5
CH12	Emmental	Yes	IMP	2.75	1.5
CH15	Feta	Yes	IMP	12.75	12.0
CH16	Fontina	Yes	SPC	15.99	1.2
CH17	Gorgonzola	Yes	SPC	15.25	0.3
CH19	Gouda	Yes	SPC	7.99	2.5
CH21	Gruyère	No	SPC	16.75	0.0
CH22	Halloumi	Yes	IMP	4.75	15.0
CH23	Havarti	No	SPC	6.75	0.0
CH27	Manchego	No	IMP	13.99	0.0
CH30	Manouri	No	IMP	18.50	0.0
CH31	Mascarpone	No	SPC	12.99	0.0

(a) State the number of records in this part of the database table.

..... [1]

(b) (i) Give the name of the field that would be used for the primary key.

..... [1]

(ii) State the reason for choosing this field for the primary key.

.....

(c) Write the output from this structured query language (SQL) statement.

```

SELECT ChNo, WeightKg
FROM CheeseStock
WHERE SupplierCode = 'ABC';

```

.....

.....

..... [2]

(d) (i) Complete this SQL statement to display only the name of all the cheeses that are out of stock.

```

SELECT .....
FROM .....
WHERE ..... ;

```

[3]

(ii) Explain how **one** of the lines in your statement in part (d)(i) could be changed to display the same information.

.....
