Paper 1 Theory

For Examination from 2016

SPECIMEN PAPER

2 hours

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name in the spaces at the top of this page and any additional pages you use.

Write in dark blue or black pen.

Do not use staples, paper clips, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

No marks will be awarded for using brand names of software packages or hardware.

Answer all questions.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The syllabus is accredited for use in England, Wales and Northern Ireland as a Cambridge International Level 1/Level 2 Certificate.

1	Several items of data are input to a computer using direct data entry methods. Write down most appropriate input device to input each item of data.	the				
	(a) data written in special ink at the bottom of bank cheques					
		[1]				
	(b) information on the label of a supermarket product					
		[1]				
	(c) shaded in boxes on a student's examination answer sheet					
		[1]				
	(d) debit card details input at an ATM					
		[1]				
2	Circle two items which are used as output devices.					
	bar code reader joystick laser printer multimedia projector					
	PIN pad scanner temperature sensor touch pad	[2]				
3	Tick true or false next to each of these statements.					
	true false					
	Computer programs are examples of hardware.					
A Command Line Interface is a form of operating system.						
	A tablet computer is larger than a desktop computer.					
	A compiler is an example of applications software.					
		[2]				

4 A new computer system storing examination results out of 20 is to be tested using a range of test data. Tick whether each of the marks is an example of **normal** data, **abnormal** data or **extreme** data.

	normal	abnormal	extreme

9	type	nann is going on holiday to a different country. He will need to take his passport. He has a r e of passport which has an RFID chip in it. He will be passing through automated passp atrol gates.	
	(a)	Describe what an RFID chip consists of.	
			[2]
	(b)	Describe how RFID will be used as he passes through passport control.	
			[3]
			1

10 A holiday company uses spreadsheets to organise the holidays they offer for scuba divers. In the first two columns, there is a list of holiday codes together with the accommodation offered.

Also in the spreadsheet, there are formulae to manipulate the data stored elsewhere in the spreadsheet.

There is also space to calculate the number of weeks and days each type of holiday has been booked for.

(a)	Explain what the formula in cell D2 does. (Do not refer to column headings.)	
		[3]
(b)	What type of holiday would you expect to see in D5?	
		[1]

Explain what the formula in cell F2 does. (Do not refer to column headings.)	
	[3]
What value would you expect to see in F5?	
	[1]
What formula would you expect to see in G2?	
=	[2]
What formula would you expect to see in H2?	
=	[2]
Tick three appropriate features of spreadsheet software which make it suitable for creati and using computer models.	ng
