UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE O Level

MARK SCHEME for the May/June 2006 question paper

5090 BIOLOGY

5090/02 Paper 2 maximum raw mark 80

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were initially instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2006 question papers for most IGCSE and GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Section A

1	(a)	mark awarded only if structure is in a plausible position						
		(i)	nucleus/cytoplasm/(shown in both cells)	;				
		(ii)	Any 2 from: chloroplast/wall/(cell) sap/membrane	,	[3]			
	(b)	(i)	photosynthesis	;				
			manufactures or stores CHO/sugar/glucose/cellulose	;	[2]			
		(ii)	liver/muscle	;				
			*storage/cells contain	;				
			*glycogen (*mark separately from liver/muscle mark)	;	[3]			
		(iii)	muscles largely protein/contain fat	;				
			skin largely protein	;				
			animal cells/tissues/skin stores fat	;				
			fat insulates against heat loss	;	[max 3]			
2	(a)	hormones ;						
		targ	;	[2]				
	(b)	1. (C/blood glucose rises	;				
		2. I	E/heart beat increases	;	[2]			
	(c)	(i)	I (or otherwise identified)	;				
			greatest control over sugar level/smallest fluctuations AW	;				
			at lowest (blood glucose) level	;				
		(ii)	Н	;				
			greatest fluctuations/little control over sugar levels	;	[max. 4]			
	(d)	lung	gs	;				
	á	alveoli/air sacs ;						
	<u>(</u>	<u>diffusion</u> ;						
	i	nto <u>capillaries</u> ;						

			GOL O Level — danc 2000	7 0000 1 1	<u> </u>
3	(a)	poll	<u>en</u>	;	[1]
	(b)	by i	·,		
		grai	;	[2]	
	(c)	fusi	on AW	;	
		mal	e and female	;	
		gan	;		
		ferti	;		
		ref.	,		
		mito	osis/growth	,	
		eml	pryo development	,	[max 4]
	(d)	(see	ed) dispersal (ignore refs. to wind)	;	[1]
4	(a)	-	2 from : urination/exhaling or breathing out/faeces/eding or crying or vomiting		[2]
	(b)	(i)	higher when walking (or v.v.)/quoted figures	;	
			more energy/heat released/raises body temperature	;	[2]
		(ii)	lower when clothed (or v.v.)/quoted figures	;	
			greater humidity next to skin/(v.v.) less skin exposed/ clothes deflect or absorb heat AW	;	[2]
		(iii)	higher in sun (or v.v.)/quoted figures higher temperatures in direct sunlight/higher rate of evap	poration ;	[2]
	(c)	moı	;		
		mus	;	[2]	
5	(a)	(i)	105	•	[1]
		(ii)	genes/alleles (A any given pair of contrasted characters)	;	[1]
		(iii)	to prevent choice/bias/so results are random	;	[1]
	(b)	(i)	red + W	;	[1]
		(ii)	ref. both cubes and both flowers being the same/heteroz the only way to produce both colours of offspring/gives a genetic combinations AW		[1]

	rea	ction s	stops					•	
	sub	strate	no longe	r fits active sit	e			;	
	key	no lo	nger fits lo	ock				;	[max 5]
								[To	tal = 10]

7	(a)	nar	med e.g. of bacterial disease	;	
		nar	med method of administration	;	
		ant	ibiotics kill only bacteria	;	
		mu	st continue with course until all bacteria are eliminated	;	
		nar	med antibiotic	;	[max 3]
	(b)	ferr	menter/vat/large container	;	
		cult	ture medium	;	
		ado	dition of organism (fungus or bacterium)	;	
		cor	ntrolled temperature	;	
		pro	vision of oxygen	;	
		cor	nditions optimum/controlled for maximum production	;	
		ext	raction of antibiotic	;	
		pur	;	[max 7]	
				[To	otal = 10]
8	Ε	(a)	traps/harnesses/absorbs	;	
			sunlight	;	
			energy	;	
			for photosynthesis	;	
			which makes carbohydrate AW	;	[max 4]
		(b)	large surface area	;	
			for maximum/rapid	;	
			uptake of water	;	
			by osmosis/diffusion	;	
			of ions/salts/minerals	;	
			by active transport	;	
			oxygen	;	
			for root respiration	;	[max 6]
				[To	otal = 10]
