CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Ordinary Level

MARK SCHEME for the October/November 2013 series

5090 BIOLOGY

5090/31

Paper 3 (Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

3 (a) (i)

type	length	no.	surface	root
incisor	-	8	chisel/flat/straight/even/AW;	-
canine	-	-	pointed /sharp;	single;
premolar	-	8	-	single;
molar	-	-	uneven /rough/cusped;	double /triple

All 8 correct = 3 6 or 7 correct = 2 4 or 5 correct = 1

- (ii) incisors cutting and biting; molars – crushing and grinding;
 R. chewing for incisor
 A. chewing for molar
- (b) (i) more/38 v 32/19 v 16; canines larger/AW; canines more pointed/sharper; more premolars; more premolars in lower than upper jaw + same no. in humans; premolars of different sizes/shapes + similar in humans; molars of different sizes/shapes + similar in humans; last molar is smaller than others + same size in humans; (dog) molars have double (or single) roots + human molars have triple (or double); some premolars(dog) have double roots + human premolars have single; crowns different heights/more uneven (in dogs) + similar height/even in humans/AW; molars in dogs are uneven/pointed/AW + flatter/AW in humans; max [3]

A. rough/rougher = uneven

- (ii) piercing/holding/gripping/killing/tearing/ripping;
- (c) More than one area of shading between teeth/shading at boundary of gum;
 A. shading around sides of teeth/boundary of gum with *lighter* shading over surface

R. if all fully shaded
