## CAMBRIDGE INTERNATIONAL EXAMINATIONS

## MARK SCHEME for the October/November 2014 series

## 5090 BIOLOGY

5090/21
Paper 2 (Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.
Cambridge is publishing the mark schemes for the October/November 2014 series for most Cambridge IGCSE ${ }^{\circledR}$, Cambridge International A and AS Level components and some Cambridge O Level components.

| :---: | :---: | :---: | :---: |
|  | Cambridge O Level - October/November 2014 | 5090 | 21 |

Mark schemes will use these abbreviations:
;
()

R
A
AW
AVP
ORA
underline
max
$+$
separates marking points
alternatives
contents of brackets are not required but should be implied
reject
accept (for answers correctly cued by the question, or guidance for examiners)
alternative wording (where responses vary more than usual)
alternative valid point (where a greater than usual variety of responses is expected)
or reverse argument
actual word underlined must be used by candidate (grammatical variants excepted)
indicates the maximum number of marks that can be given
statements on both sides of the + are needed for that mark

| Question | Expected Answer | Mark | Additional Guidance |
| :---: | :---: | :---: | :---: |
| 1 (a) (i) | stem; | [1] |  |
| (ii) | phloem ; | [1] |  |
| (b) | (photosynthesis) produces glucose/sugar/starch/carbohydrates ; changed into sucrose ; <br> passes down the phloem/tissue A ; <br> concentration (of sucrose) varies ; <br> highest when photosynthesis rate is highest / AW ; | [max. 4] |  |
| (c) | (sucrose/sugar turned to) glucose ; used for respiration ; to release energy ; amino acids ; used to make protein ; for growth / repair ; | [max. 4] | R produce/make |
|  |  | [Total: 10] |  |

|  | Cambridge O Level - October/November 2014 | 5090 | 21 |

| Question | Expected Answer | Mark | Additional Guidance |
| :---: | :---: | :---: | :---: |
| 2 (a) | $\begin{aligned} & \mathrm{B}=\text { protein } /(\text { poly)peptide; } \\ & \mathrm{C}=\text { protease or named*; } \\ & \mathrm{D}=\text { amino } \text { acids }^{*} ; \\ & \mathrm{E}=\text { glycogen ; } \\ & \mathrm{F}=\text { urea; } \end{aligned}$ | [5] | *A ecf for incorrect substrate *A ecf for incorrect substrate <br> $R$ urine |
| (b) (i) | broken down / converted / changed ; (role of) glucagon / adrenaline ; to glucose ; made soluble ; | [max. 2] |  |
| (ii) | respiration; | [1] |  |

|  | Cambridge O Level - October/November 2014 | 5090 | 21 |

| Question | Expected Answer | Mark | Additional Guidance |
| :---: | :---: | :---: | :---: |
| 3 (a) (i) | deeper voice / hair on face or named body part / stronger muscles / sperm production / larger genitalia ; | [1] | A broadening of shoulders |
| (ii) | testosterone ; | [1] |  |
| (iii) | testes ; | [1] | A testicles / gonads |
| (b) (i) | $F$ - oestrogen ; <br> G - progesterone ; | [2] |  |
| (ii) | ovulation / release of egg or ovum ; | [1] |  |
| (c) | line drawn at 3 weeks $\pm 2$ squares; uterus (lining) increasing in thickness ; in preparation for receiving (fertilised) ovum/egg ; ref. time + menstruation ; | [4] | A zygote / embryo |
|  |  | [Total: 10] |  |

|  | Cambridge O Level - October/November 2014 | 5090 | 21 |

| Question | Expected Answer | Mark | Additional Guidance |
| :---: | :---: | :---: | :---: |
| 4 (a) | 0.3-0.4 minutes ; | [1] | A 18-24 s |
| (b) | aerobic respiration ; | [1] |  |
| (c) | $\mathrm{O}_{2}$ curve not as high at start/finish ; <br> $\mathrm{O}_{2}$ curve drops more quickly / ORA ; <br> damage to alveoli ; <br> less surface area for $\mathrm{O}_{2}$ absorption ; <br> less $\mathrm{O}_{2}$ to blood/muscles ; <br> lactic acid curve rises sooner/higher / takes longer to return to normal ; <br> shorter period of aerobic / longer period anaerobic respiration ; <br> more lactic acid build-up ; | [max. 5] | A uptake / diffusion |
|  |  | [Total: 7] |  |

| Question | Expected Answer | Mark | Additional Guidance |
| :---: | :--- | :---: | :---: |
| 5 (a) | Incisor / canine ; | [1] |  |
| (b) | blood vessels or named ; <br> nerves / nerve endings ; | $[2]$ |  |
| (c) | sugar ; <br> ref. bacteria ; <br> (converted) to acid ; <br> dissolves enamel ; <br> teeth not cleaned / build-up of plaque/tartar ; <br> weak enamel / ref. lack of Ca/F/vit. D; <br> reduction in tooth decay ; | [max. 4] |  |
| (d) (i) | fluoride occurs naturally / addition in toothpaste ; <br> diet with less carbohydrate ; <br> better education / teeth cleaned more often ; <br> genetic differences / teeth less prone to acid attack ; | [max. 3] |  |
|  |  | [Total: 11] |  |
