Paper 3 Case Study

May/June 2018

MARK SCHEME

Maximum Mark: 100

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2018 series for most Cambridge IGCSE™, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

IGCSE™ is a registered trademark.

This document consists of **14** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer			Marks																
1	<p>Analyse the likely benefits to RW of introducing Total Quality Management (TQM).</p> <table border="1" data-bbox="308 349 1321 786"> <thead> <tr> <th data-bbox="308 349 422 432">Level</th> <th data-bbox="422 349 722 432">Knowledge 3 marks</th> <th data-bbox="722 349 1023 432">Application 2 marks</th> <th data-bbox="1023 349 1321 432">Analysis 5 marks</th> </tr> </thead> <tbody> <tr> <td data-bbox="308 432 422 584">2</td> <td data-bbox="422 432 722 584">3 marks Two or more relevant points made about benefits</td> <td data-bbox="722 432 1023 584">2 marks Points made are applied to RW</td> <td data-bbox="1023 432 1321 584">4–5 marks Good use of theory to explain benefits</td> </tr> <tr> <td data-bbox="308 584 422 736">1</td> <td data-bbox="422 584 722 736">1–2 marks One or two relevant points made about benefits</td> <td data-bbox="722 584 1023 736">1 mark Some application to RW</td> <td data-bbox="1023 584 1321 736">1–3 marks Some use of theory to explain benefits</td> </tr> <tr> <td data-bbox="308 736 422 786">0</td> <td colspan="3" data-bbox="422 736 1321 786">No creditable content</td> </tr> </tbody> </table> <p><i>Note to examiners:</i></p> <ul style="list-style-type: none"> • Disadvantages should not be rewarded • Benefits should relate to RW, not e.g. to employees or other stakeholders • If no specific knowledge of TQM demonstrated, only benefits of improving quality then L1 all skills – max 6 <p><i>Answers could include:</i></p> <p>Knowledge</p> <ul style="list-style-type: none"> • TQM is a holistic approach to quality that involves all employees in ensuring best possible processes and outcomes Inc. quality chains, quality circles, internal customers, kaizen. • Checking for quality at every stage can be accepted as knowledge of TQM, but not checking quality at the end of the process. <p>Application</p> <ul style="list-style-type: none"> • Many faults in servicing and repair • Workshop manager responsible • Lack of involvement by employees. <p>Analysis</p> <ul style="list-style-type: none"> • Problems identified early saving costs of correction • Little need for final inspection, saving costs • Easier to trace reasons for faults, leading to lower costs • Responsibility for quality identified, accountability improved • More opportunities for employee responsibility so greater motivation • Less wastage of materials and time so saving costs • Better customer relations so more repeat business 			Level	Knowledge 3 marks	Application 2 marks	Analysis 5 marks	2	3 marks Two or more relevant points made about benefits	2 marks Points made are applied to RW	4–5 marks Good use of theory to explain benefits	1	1–2 marks One or two relevant points made about benefits	1 mark Some application to RW	1–3 marks Some use of theory to explain benefits	0	No creditable content			10
