Paper 2 Data Response

October/November 2019

MARK SCHEME

Maximum Mark: 60

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2019 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of **21** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer	Marks																										
1(a)(i)	<p>Define the term ‘training’ (line 27).</p> <table><tr><th>Knowledge</th><th>Marks</th></tr><tr><td>A correct definition</td><td>2</td></tr><tr><td>A partial, vague or unfocused definition</td><td>1</td></tr><tr><td>No creditable content</td><td>0</td></tr></table> <p><i>Note: this is a definition question so there are no marks for examples of training, i.e. on-the-job, off-the-job and induction.</i></p> <p>Content A correct definition should include the following elements:</p> <ul style="list-style-type: none">• The teaching/development of skills/knowledge (1)• To perform a task, become more efficient, increase productivity, meet organisation/departmental/job objectives, etc. (1) <table><tr><th>Exemplar</th><th>Marks</th><th>Rationale</th></tr><tr><td>Training involves developing skills so that workers can do their job more efficiently</td><td>2</td><td>Both elements covered</td></tr><tr><td>Making an employee better at doing their job</td><td>1</td><td>‘Better at doing their job’ is enough for one mark</td></tr><tr><td>Helping an employee to develop skills</td><td>1</td><td>‘Developing skills’ is enough for one mark</td></tr><tr><td>The person who is employed by an organisation to do a job who needs experience before they can do their job</td><td>0</td><td>NAQ – describing a trainee</td></tr><tr><td>Training can be on the job or off the job</td><td>0</td><td>No marks for an example as this is a definition question</td></tr></table>	Knowledge	Marks	A correct definition	2	A partial, vague or unfocused definition	1	No creditable content	0	Exemplar	Marks	Rationale	Training involves developing skills so that workers can do their job more efficiently	2	Both elements covered	Making an employee better at doing their job	1	‘Better at doing their job’ is enough for one mark	Helping an employee to develop skills	1	‘Developing skills’ is enough for one mark	The person who is employed by an organisation to do a job who needs experience before they can do their job	0	NAQ – describing a trainee	Training can be on the job or off the job	0	No marks for an example as this is a definition question	2
Knowledge	Marks																											
A correct definition	2																											
A partial, vague or unfocused definition	1																											
No creditable content	0																											
Exemplar	Marks	Rationale																										
Training involves developing skills so that workers can do their job more efficiently	2	Both elements covered																										
Making an employee better at doing their job	1	‘Better at doing their job’ is enough for one mark																										
Helping an employee to develop skills	1	‘Developing skills’ is enough for one mark																										
The person who is employed by an organisation to do a job who needs experience before they can do their job	0	NAQ – describing a trainee																										
Training can be on the job or off the job	0	No marks for an example as this is a definition question																										

Question	Answer	Marks								
1(a)(ii)	<p>Briefly explain the term ‘entrepreneur’ (line 3).</p> <p>Award one mark for each point of explanation:</p> <table><tr><th>Rationale</th><th>Marks</th></tr><tr><td>Three characteristics of an entrepreneur</td><td>1</td></tr><tr><td>Two characteristics of an entrepreneur</td><td>1</td></tr><tr><td>One characteristic of an entrepreneur</td><td>1</td></tr></table> <p>Content Allow any reasonable characteristic of an entrepreneur, for example:</p> <ul style="list-style-type: none">• Risk taking• Innovative• Multi-skilled• Leader• Resilience/able to bounce back• Sets up a business• Passion• Self-confidence• Ambition• Hardworking• Persuasive• Aiming for profit (do not allow ‘get rich’ – too vague)• Makes decisions• One of the factors of production (entrepreneurship)• Organises the factors of production• An example of an entrepreneur (do not allow Seojun) <p><i>Only reward each characteristic once.</i></p>	Rationale	Marks	Three characteristics of an entrepreneur	1	Two characteristics of an entrepreneur	1	One characteristic of an entrepreneur	1	3
Rationale	Marks									
Three characteristics of an entrepreneur	1									
Two characteristics of an entrepreneur	1									
One characteristic of an entrepreneur	1									

Question	Answer	Marks																		
1(a)(ii)	ARA																			
	<table><tr><th>Answer</th><th>Marks</th><th>Rationale</th></tr><tr><td>An entrepreneur is a risk-taker (1) who tries to make a profit (1) by organising the factors of production (1)</td><td>3</td><td>Three characteristics</td></tr><tr><td>Someone who makes decisions (1) about factors of production (1) to make a profit (1)</td><td>3</td><td>Three characteristics</td></tr><tr><td>An entrepreneur works hard (1) and has confidence (1)</td><td>2</td><td>Two characteristics</td></tr><tr><td>Someone who organises the land that a business needs (1). They also organise the amount of workers a business needs and they also organise the capital that a business may need</td><td>1</td><td>Only one mark for 'organising' the factors of production – do not keep rewarding the same characteristics</td></tr><tr><td>An entrepreneurship is one of the factors of production</td><td>0</td><td>NAQ</td></tr></table>	Answer	Marks	Rationale	An entrepreneur is a risk-taker (1) who tries to make a profit (1) by organising the factors of production (1)	3	Three characteristics	Someone who makes decisions (1) about factors of production (1) to make a profit (1)	3	Three characteristics	An entrepreneur works hard (1) and has confidence (1)	2	Two characteristics	Someone who organises the land that a business needs (1). They also organise the amount of workers a business needs and they also organise the capital that a business may need	1	Only one mark for 'organising' the factors of production – do not keep rewarding the same characteristics	An entrepreneurship is one of the factors of production	0	NAQ	
	Answer	Marks	Rationale																	
	An entrepreneur is a risk-taker (1) who tries to make a profit (1) by organising the factors of production (1)	3	Three characteristics																	
	Someone who makes decisions (1) about factors of production (1) to make a profit (1)	3	Three characteristics																	
	An entrepreneur works hard (1) and has confidence (1)	2	Two characteristics																	
	Someone who organises the land that a business needs (1). They also organise the amount of workers a business needs and they also organise the capital that a business may need	1	Only one mark for 'organising' the factors of production – do not keep rewarding the same characteristics																	
An entrepreneurship is one of the factors of production	0	NAQ																		
1(b)(i)	Refer to Table 1.1. Calculate the percentage change in profit from Year 1 to Year 2.	4																		
	<table><tr><th>Rationale</th><th>Marks</th></tr><tr><td>Correct answer with or without correct working or %</td><td>4</td></tr><tr><td>Correct calculation of the change in profit</td><td>3</td></tr><tr><td>Correct calculation of Year 1 and Year 2 profit</td><td>2</td></tr><tr><td>Formula or correct calculation of Year 1 or Year 2 profit</td><td>1</td></tr><tr><td>No creditable content</td><td>0</td></tr></table>	Rationale	Marks	Correct answer with or without correct working or %	4	Correct calculation of the change in profit	3	Correct calculation of Year 1 and Year 2 profit	2	Formula or correct calculation of Year 1 or Year 2 profit	1	No creditable content	0							
	Rationale	Marks																		
	Correct answer with or without correct working or %	4																		
	Correct calculation of the change in profit	3																		
	Correct calculation of Year 1 and Year 2 profit	2																		
	Formula or correct calculation of Year 1 or Year 2 profit	1																		
No creditable content	0																			
Content Profit = TR – TC Year 1 profit = 120 000 – (70 000 + 20 000) = 30 000 Year 2 profit = 240 000 – (110 000 + 40 000) = 90 000 Change in profit = 60 000 $\% \text{ change} = \frac{60\,000}{30\,000} \times 100 = 200\% \text{ (increase)}$ Correct answer – 200%																				

Question	Answer	Marks																											
1(b)(i)	<p>OFR*</p> <p>Common incorrect answers</p> <table> <tr> <th>Answer</th><th>Marks</th><th>Rationale</th></tr> <tr> <td>200 (no working)</td><td>4</td><td>Candidate does not need to include the % sign</td></tr> <tr> <td>$\frac{60\,000}{30\,000} = 2$</td><td>3</td><td>Correct calculation of the change in profit (60 000) but not calculated the percentage change</td></tr> <tr> <td>2 (no working)</td><td>0</td><td>An incorrect answer with no working to understand where the answer comes from</td></tr> <tr> <td>$\frac{60\,000}{90\,000} \times 100 = 67\%$</td><td>3</td><td>Correct calculation of the change in profit (60 000) but incorrectly calculated the percentage change</td></tr> <tr> <td>60 000 (no working)</td><td>3</td><td>Correct calculation of the change in profit</td></tr> <tr> <td>30 000 (no working)</td><td>1</td><td>Correct calculation of Year 1 profit</td></tr> <tr> <td>90 000 (no working)</td><td>1</td><td>Correct calculation of Year 2 profit</td></tr> <tr> <td>$\frac{90\,000}{30\,000} \times 100 = 300\%$</td><td>2</td><td>Correctly identified the two profit figures, but no attempt to find the difference</td></tr> </table> <p><i>*OFR means the use of the own figure rule – this aims to reward a candidate for the stages of a calculation that are correct, even if an earlier stage or figure used is incorrect. An early mistake, for example, would create all following calculations to have wrong answers, but these are still rewardable (if correct when using a candidate's own figures) Therefore the candidate cannot gain marks for the stage that was incorrect, but can gain all the subsequent marks.</i></p>	Answer	Marks	Rationale	200 (no working)	4	Candidate does not need to include the % sign	$\frac{60\,000}{30\,000} = 2$	3	Correct calculation of the change in profit (60 000) but not calculated the percentage change	2 (no working)	0	An incorrect answer with no working to understand where the answer comes from	$\frac{60\,000}{90\,000} \times 100 = 67\%$	3	Correct calculation of the change in profit (60 000) but incorrectly calculated the percentage change	60 000 (no working)	3	Correct calculation of the change in profit	30 000 (no working)	1	Correct calculation of Year 1 profit	90 000 (no working)	1	Correct calculation of Year 2 profit	$\frac{90\,000}{30\,000} \times 100 = 300\%$	2	Correctly identified the two profit figures, but no attempt to find the difference	
Answer	Marks	Rationale																											
200 (no working)	4	Candidate does not need to include the % sign																											
$\frac{60\,000}{30\,000} = 2$	3	Correct calculation of the change in profit (60 000) but not calculated the percentage change																											
2 (no working)	0	An incorrect answer with no working to understand where the answer comes from																											
$\frac{60\,000}{90\,000} \times 100 = 67\%$	3	Correct calculation of the change in profit (60 000) but incorrectly calculated the percentage change																											
60 000 (no working)	3	Correct calculation of the change in profit																											
30 000 (no working)	1	Correct calculation of Year 1 profit																											
90 000 (no working)	1	Correct calculation of Year 2 profit																											
$\frac{90\,000}{30\,000} \times 100 = 300\%$	2	Correctly identified the two profit figures, but no attempt to find the difference

How has the data been gathered (K)	Seojun has only been in the market for two years, so may not have enough experience to know (APP)																					
The market might have changed (K)	Very competitive market (APP)																					

Question	Answer				Marks
1(c)	Analyse <u>two</u> problems with the job description created by Seojun in Table 1.2.				8
	Level	Knowledge and Application (4 marks)	Marks	Analysis (4 marks)	Marks
	2b	Shows understanding of two characteristics of a job description in context	4	Good analysis of an effect <u>on the business</u> of two problems with the job description	4
	2a	Shows understanding of one characteristics of a job description in context	3	Good analysis of an effect <u>on the business</u> of one problem with the job description	3
	1b	Shows knowledge of two characteristics of a job description	2	Limited analysis of two problems of a job description	2
	1a	Shows knowledge of one characteristic of a job description	1	Limited analysis of one problem of a job description	1
	0	No creditable content			0
Content A job description describes the tasks, or functions, and responsibilities of a role within an organisation.					
Problems:					
<ul style="list-style-type: none">• ‘As soon as possible’ – with no date on the description, some potential workers may think this is out of date and not apply• Salary should not be based on age – this suggests age discrimination. May be illegal and the business could face sanctions. May only attract older workers (for the perceived higher wage)• Why would this role need A-Levels? This is likely to put off potentially good workers because they do not have the qualifications. In some countries A-Levels are uncommon, so this might be a very unlikely qualification. This is unlikely to get a good range of applicants• Qualifications should appear on the person specification rather than the job description – may confuse potential applicants• ‘Workman’ – this is sexist and may lead to sanctions on the business. Also, may miss out on good female applicants• ‘Local business’ – local to where – with no address applicants may assume it is local to them, wherever they are• Experience is essential, but full training will be given – too ambiguous – if full training is given why is experience needed?<ul style="list-style-type: none">– Experience should appear on the person specification– How many applicants is QF likely to receive if Seojun requires experience of both building and repairing?					

Question	Answer			Marks
1(c)	ARA			
	Example of an aspect of a job description (K)	Examples of application/context (APP)	Examples of possible analysis (AN + DEV)	
	A job description contains the experience needed (K)	In this case experience of building and repairing fences is essential (APP).	This might mean that Seojun might not get any people applying (AN) which may mean QF cannot grow in the future (DEV)	

Question	Answer				Marks
1(d)	Recommend suitable promotion methods which would help Seojun to achieve his objectives.				11
	Knowledge and Application (4 marks)	Marks	Analysis and Evaluation (7 marks)	Marks	
			Justified recommendation based on argument in context	7	
			Developed recommendation based on argument in context	6	
			An evaluative statement/recommendation based on argument in context	5	
	Shows understanding of two (or more) promotion methods in context	4	Argument based on two promotion methods in context	4	
	Shows understanding of one promotion method in context	3	Argument based on one promotion method in context	3	
	Shows knowledge of two promotion methods	2	Limited analysis of two promotion methods	2	
	Shows knowledge of one promotion method	1	Limited analysis of one promotion method	1	
	<i>Note: If the candidate has attempted to analyse more than two promotion methods, then annotate the one that gain the most marks for the candidate.</i>				
Content <ul style="list-style-type: none">• Posters – cost effective and could be effective in the local area• Local TV/radio/newspaper – reach a large local audience – mass market product (many people may have access to a garden)• Other forms of local advertising – buses, roadside, etc.					

Question	Answer	Marks														
1(d)	<ul style="list-style-type: none">• Garden centres/alongside complementary products• Direct promotion – door to door sales, especially if a ‘bad’ fence is spotted• Word of mouth – likely to be essential in this industry, but difficult to control• Internet – many recommendation websites – social media promotion – can be cheap and targeted, but do many people hire services this way? <i>Allow the benefit of internet promotion allowing more online bookings.</i>• Promotional pricing is a valid method – but only if it is specifically linked to promotion, e.g. BOGOF. Do not reward pricing strategies/changes on their own <p><i>Note: Allow above-the-line and below-the-line as promotion methods. Also allow two different types of advertising (i.e. newspaper and TV) as different methods of promotion.</i></p> <p>ARA</p> <p>An example of how an answer could develop and how it should be annotated.</p> <table><tr><th>K</th><th>APP</th><th>AN</th><th>DEV</th><th>EVAL</th></tr><tr><td>Internet</td><td>There is a growing need for online bookings</td><td>By promoting using the internet, Seojun can drive customers to book online</td><td>Which can lead to increased revenue for QF</td><td rowspan="2">Overall newspaper advertising is most likely to target Seojun's current target customers (EVAL) because he can advertise his telephone number and that is how most customers book (EVAL), however if he really wants to develop his online bookings then the internet may be best (EVAL)</td></tr><tr><td>Newspaper advertising</td><td>He can target higher income people in City X who are more likely to own houses with gardens</td><td>This would be an efficient way to target his customers</td><td>Which reduces the costs for QF</td></tr></table> <p><i>Note: fully reward candidates who do not make a choice between their chosen methods – it is just as acceptable to recommend more than one method.</i></p>	K	APP	AN	DEV	EVAL	Internet	There is a growing need for online bookings	By promoting using the internet, Seojun can drive customers to book online	Which can lead to increased revenue for QF	Overall newspaper advertising is most likely to target Seojun's current target customers (EVAL) because he can advertise his telephone number and that is how most customers book (EVAL), however if he really wants to develop his online bookings then the internet may be best (EVAL)	Newspaper advertising	He can target higher income people in City X who are more likely to own houses with gardens	This would be an efficient way to target his customers	Which reduces the costs for QF	
K	APP	AN	DEV	EVAL												
Internet	There is a growing need for online bookings	By promoting using the internet, Seojun can drive customers to book online	Which can lead to increased revenue for QF	Overall newspaper advertising is most likely to target Seojun's current target customers (EVAL) because he can advertise his telephone number and that is how most customers book (EVAL), however if he really wants to develop his online bookings then the internet may be best (EVAL)												
Newspaper advertising	He can target higher income people in City X who are more likely to own houses with gardens	This would be an efficient way to target his customers	Which reduces the costs for QF

This means that the business has chosen to invest in technology (A) rather than people	2	A and B – no further/good understanding	Where large amounts of capital have been used as opposed to labour (B)	1	Use of the word ‘capital’ is a tautology – however B can still be awarded	Production where large amounts of money need to be invested in machinery (A). This would allow the business to operate 24 hours a day and be more productive	1	A only – C cannot be awarded without B	When a business uses capital intensively	0	Tautology	3
	Rationale	Marks																																	
C	Example or some other way of showing further/good understanding, e.g. Car manufacturing, Transport (airports, railways), could be more efficient than labour intensive, could demotivate, increased costs	1																																	
B	As opposed to labour/workers, etc.	1																																	
A	Use of machinery, technology plant & machinery, IT systems, buildings, vehicles, offices, equipment, etc.	1																																	
Answer	Mark	Rationale																																	
Machinery (A) not labour (B) which allows a business to operate 24 hours a day (C)	3	All three elements – allow any point which shows further/good understanding for the C mark																																	
A good example of capital intensive is the car industry (C) because it uses robots (A) to make cars rather than people (B)	3	All three elements – the order of the points does not matter																																	
Capital intensive is the opposite of labour intensive (B). This means that the business has chosen to invest in technology (A) rather than people	2	A and B – no further/good understanding																																	
Where large amounts of capital have been used as opposed to labour (B)	1	Use of the word ‘capital’ is a tautology – however B can still be awarded																																	
Production where large amounts of money need to be invested in machinery (A). This would allow the business to operate 24 hours a day and be more productive	1	A only – C cannot be awarded without B																																	
When a business uses capital intensively	0	Tautology

2(b)(i)	Common incorrect answers			
	Answer	Marks	Rationale	
	2.5	2	Correct answer – no % sign required	
	$\frac{61.5}{60} \times 100 = 102.5$	1	Worked out as a ratio	
	1.5 (no working)	1	Correct calculation of the change in market size – no \$ sign needed	
	$\frac{1.5}{61.5} \times 100 = 2.4\%$	1	Candidate has used the wrong base figure – one error (OFR)	
	$\frac{60}{61.5} \times 100 = 97.56$ $100 - 97.56 = 2.44\%$	1	Figures used the wrong way round in formula – one error (OFR)	
	$\frac{1.5}{60} = 0.025$	1	Not turned into a percentage – one error	
	0.025 (no working)	0	Without working this is a meaningless number – do not reward	
	$\frac{\text{Year 2}}{\text{Year 1}} \times 100$ $= 102.5\%$	1	A mistake in the formula, but correct use of numbers

Question	Answer	Marks						
2(b)(ii)	<p>ARA</p> <p>Example of how responses should be marked</p> <table><tr><th>Identification of a way (K)</th><th>Explanation of a way in context (APP)</th></tr><tr><td>The packaging might need to be different (K)</td><td>So that the ingredients are translated into different languages (APP)</td></tr><tr><td>The product may need to change (K)</td><td>So that different flavours can be used in different countries (APP)</td></tr></table> <p><i>Note: using the words ‘candy’ or ‘sweets’ is not enough for APP – however words such as ‘flavour’ and ‘ingredients’ and ‘taste’ do show contextual understanding and can be awarded with APP</i></p>	Identification of a way (K)	Explanation of a way in context (APP)	The packaging might need to be different (K)	So that the ingredients are translated into different languages (APP)	The product may need to change (K)	So that different flavours can be used in different countries (APP)	
Identification of a way (K)	Explanation of a way in context (APP)							
The packaging might need to be different (K)	So that the ingredients are translated into different languages (APP)							
The product may need to change (K)	So that different flavours can be used in different countries (APP)							

Question	Answer				Marks
2(c)	Analyse one internal source of finance and one external source of finance which CP could use for the new machinery.				8
	Level	Knowledge and Application (4 marks)	Marks	Analysis (4 marks)	Marks
	2b	Shows understanding of one internal and one external source of finance	4	Good analysis of one internal and one external source of finance in context	4
	2a	Shows understanding of one internal or one external source of finance in context	3	Good analysis of one internal or one external source of finance in context	3
	1b	Shows knowledge of one internal and one external source of finance	2	Limited analysis of one internal and one external source of finance	2
	1a	Shows knowledge of one internal or one external source of finance	1	Limited analysis of one internal or one external source of finance	1
	0	No creditable content			0
<p><i>Note: Do not accept retained earnings or bank loan as contextual. These can gain K and AN but not APP and DEV.</i></p> <p><i>Annotate the internal source of finance in the left-hand margin and the external source of finance in the right-hand margin. If the candidate has attempted to analyse more than one internal or external source of finance, then annotate the one that gains the most marks for the candidate.</i></p> <p>Content</p> <p>Internal:</p> <ul style="list-style-type: none">• Sale of unwanted assets – old machinery that is of no use• Sale and leaseback of non-current assets – unlikely to have many current assets that could be leased• Working capital – CP has a good working capital position <p>External:</p> <ul style="list-style-type: none">• Share capital – CP is a plc so can sell shares, but will this devalue the share price? <i>Note: only accept share capital as an EXTERNAL source unless it is explicitly stated that the shares are being issued to existing shareholders</i>• New partners – not a partnership so not contextual• Venture capital – more likely for a newer business – VC is likely to require a high return and/or equity in the business• Overdrafts – surely too much for an overdraft• Leasing – possible advantages of maintenance and no need for initial sum but likely to be more expensive long term					

Question	Answer	Marks															
2(c)	<ul style="list-style-type: none"> • Hire purchase – as above • Mortgages – suitable for properties so unlikely to be contextual • Debentures – securing a debenture on the machinery may make a financial institution/individual more likely to lend the money • Micro-finance – likely to more suitable for new businesses/ventures • Crowd funding – likely to more suitable for new businesses/ventures • Government grants <p><i>If a candidate has mis-categorised a source of finance (internal and external) then do not award any marks for that source of finance, e.g. share capital as internal</i></p> <p>ARA</p> <table border="1"> <thead> <tr> <th>Example of an internal source of finance (K)</th><th>Examples of application/context (APP)</th><th>Examples of possible analysis (AN + DEV)</th></tr> </thead> <tbody> <tr> <td>Sale of assets (K)</td><td>CP has 20 separate production lines which would involve a lot of machinery to sell (APP)</td><td>By selling these machines, CP would gain the cash from the sale to be able to finance the new machinery. However, this may leave CP without any means of producing Candy, leading to a loss of revenue (DEV)</td></tr> </tbody> </table> <table border="1"> <thead> <tr> <th>Example of an external source of finance (K)</th><th>Examples of application/context (APP)</th><th>Examples of possible analysis (AN + DEV)</th></tr> </thead> <tbody> <tr> <td>Sell shares (K)</td><td>CP is a public Limited Company (APP)</td><td>So by selling shares this can release cash to finance the purchase of the machinery (AN), however this may lead to a loss of control by the current owners (DEV)</td></tr> <tr> <td>Lease (K)</td><td>Because CP cannot use a bank loan they might need to lease the machinery (APP)</td><td>This does not require an initial large amount (AN) and allows CP to pay for the machinery each month (DEV)</td></tr> </tbody> </table>	Example of an internal source of finance (K)	Examples of application/context (APP)	Examples of possible analysis (AN + DEV)	Sale of assets (K)	CP has 20 separate production lines which would involve a lot of machinery to sell (APP)	By selling these machines, CP would gain the cash from the sale to be able to finance the new machinery. However, this may leave CP without any means of producing Candy, leading to a loss of revenue (DEV)	Example of an external source of finance (K)	Examples of application/context (APP)	Examples of possible analysis (AN + DEV)	Sell shares (K)	CP is a public Limited Company (APP)	So by selling shares this can release cash to finance the purchase of the machinery (AN), however this may lead to a loss of control by the current owners (DEV)	Lease (K)	Because CP cannot use a bank loan they might need to lease the machinery (APP)	This does not require an initial large amount (AN) and allows CP to pay for the machinery each month (DEV)	
Example of an internal source of finance (K)	Examples of application/context (APP)	Examples of possible analysis (AN + DEV)															
Sale of assets (K)	CP has 20 separate production lines which would involve a lot of machinery to sell (APP)	By selling these machines, CP would gain the cash from the sale to be able to finance the new machinery. However, this may leave CP without any means of producing Candy, leading to a loss of revenue (DEV)															
Example of an external source of finance (K)	Examples of application/context (APP)	Examples of possible analysis (AN + DEV)															
Sell shares (K)	CP is a public Limited Company (APP)	So by selling shares this can release cash to finance the purchase of the machinery (AN), however this may lead to a loss of control by the current owners (DEV)															
Lease (K)	Because CP cannot use a bank loan they might need to lease the machinery (APP)	This does not require an initial large amount (AN) and allows CP to pay for the machinery each month (DEV)															

Question	Answer				Marks
2(d)	Evaluate the likely benefits for CP of the proposed process innovation.				11
	Knowledge and Application (4 marks)	Marks	Analysis and Evaluation (7 marks)	Marks	
			Justified evaluation based on argument in context	7	
			Developed evaluation based on argument in context	6	
			An evaluative statement based on argument in context	5	
	Shows understanding of two aspects process innovation in context	4	Argument based on the use of two benefits to CP of the proposed process innovation	4	
	Shows knowledge of one aspect of process innovation in context	3	Argument based on one benefit to CP of the proposed process innovation	3	
	Shows knowledge of two aspects of process innovation	2	Limited analysis of two benefits of process innovation	2	
	Shows knowledge of one aspect of process innovation	1	Limited analysis of one benefit of process innovation	1	
	<p><i>Note: there must be knowledge of process innovation (not just innovation) to award any marks.</i></p> <p>Content</p> <p>Process innovation is the implementation of a new or significantly improved production method. This includes changes in how the product is made and/or the equipment used.</p> <p>Aspects of process innovation may include:</p> <ul style="list-style-type: none"> • How the product is produced • The equipment used to produce the products • The technology used in production 				

Question	Answer	Marks														
2(d)	<p>Benefits may include:</p> <ul style="list-style-type: none">• Possible economies of scale from moving from 20 production lines to only one or may eliminate the current diseconomies• Expansion of CP’s product portfolio• Mass customisation – could have more varieties of their current candy – may be able to have specific candy for organisations• Can customise candy for national and international markets – especially important because of the growth in the international market• Replace the 25-year-old machinery – more efficient?• Save direct costs by making workers redundant• Increased efficiency <p>ARA</p> <p>An example of how an answer could develop and how it should be annotated</p> <table><tr><th>K</th><th>APP</th><th>AN</th><th>DEV</th><th>EVAL</th></tr><tr><td>Changing how the candy is made (K)</td><td>Introducing mass customisation (APP)</td><td>May lead to being able to produce more types of candy (AN)</td><td>Which may increase the target market and number of customers (DEV)</td><td rowspan="2">The most important benefit is that CP will be able to increase their profitability (EVAL) because as public limited company the shareholders will expect a reasonable dividend (EVAL). However, in the long term it may be more important to increase the number of customers as this is likely to lead to more profits eventually (EVAL)</td></tr><tr><td>Changing the machinery used (K)</td><td>Moving from 20 production lines to just 1 (APP)</td><td>May reduce the diseconomies of scale (AN)</td><td>Leading to CP being able to make more profit (DEV)</td></tr></table>	K	APP	AN	DEV	EVAL	Changing how the candy is made (K)	Introducing mass customisation (APP)	May lead to being able to produce more types of candy (AN)	Which may increase the target market and number of customers (DEV)	The most important benefit is that CP will be able to increase their profitability (EVAL) because as public limited company the shareholders will expect a reasonable dividend (EVAL). However, in the long term it may be more important to increase the number of customers as this is likely to lead to more profits eventually (EVAL)	Changing the machinery used (K)	Moving from 20 production lines to just 1 (APP)	May reduce the diseconomies of scale (AN)	Leading to CP being able to make more profit (DEV)	
K	APP	AN	DEV	EVAL												
Changing how the candy is made (K)	Introducing mass customisation (APP)	May lead to being able to produce more types of candy (AN)	Which may increase the target market and number of customers (DEV)	The most important benefit is that CP will be able to increase their profitability (EVAL) because as public limited company the shareholders will expect a reasonable dividend (EVAL). However, in the long term it may be more important to increase the number of customers as this is likely to lead to more profits eventually (EVAL)												
Changing the machinery used (K)	Moving from 20 production lines to just 1 (APP)	May reduce the diseconomies of scale (AN)	Leading to CP being able to make more profit (DEV)
