Paper 2 Data Response

October/November 2019

MARK SCHEME

Maximum Mark: 60

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2019 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of **18** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer					Marks
1(c)	Analyse <u>two</u> methods which could be used to improve the motivation of BB's sales staff					8
	Level	Knowledge and Application (4 marks)	Marks	Analysis (4 marks)	Marks	
	2b	Shows understanding of two motivation methods could be used for BB's sales staff	4	Developed analysis of two motivational methods that BB could use to motivate its sales staff	4	
	2a	Shows understanding of one motivation method could be used for BB's sales staff	3	Developed analysis of one motivational method that BB could use to motivate its sales staff	3	
	1b	Shows knowledge of two motivation methods	2	Limited analysis of two motivational methods that BB could use to motivate its sales staff	2	
	1a	Shows knowledge of one motivation method	1	Limited analysis of one motivational method that BB could use to motivate its sales staff	1	
	0	No creditable content			0	
ARA May mention financial and/non-financial motivators. Content: <ul style="list-style-type: none">• Salaried employees so could change to include commission payments• Set sales target with a bonus for meeting target• Offer a profit-sharing scheme• Re-train as sales staff rely on repeat custom so training in attracting new customers• Encourage participation in identifying new outlets especially if go ahead with the new design• Fringe benefits such as a company car to go and meet new customers• Provide more promotion opportunities• May refer to needs such as self-actualisation						

Question	Answer				Marks
1(c)					
	K	APP*	AN	DEV	
	Targets & bonus	For the new foldable bike/ To find new (ind) bike retailers	Which would provide financial incentives	But may lead to mis-selling/ hard sales tactics	
	Commission	Based on how many bikes sold	Which would reduce the safety of a salary	And force staff to look for new customers	
	Retraining	To upskill selling skills to new bike retailers	So employees would be more confident approaching new customers	And building a wider customer base	
	Fringe benefits	Provide company cars to approach new bike retailers	But may be expensive	And reduce 50% gross profit margins	
*For app, 'customer' is too vague, needs reference to 'bike retailers'					

Question	Answer				Marks

Question	Answer				Marks
2(c)	Analyse <u>two</u> ways in which emotional intelligence may help Nadia be an effective leader.				8
	Level	Knowledge and Application (4 marks)	Marks	Analysis (4 marks)	Marks
	2b	Understanding of two elements of emotional intelligence in context	4	Developed analysis of two ways a leader can use emotional intelligence in context	4
	2a	Understanding of one element of emotional intelligence in context	3	Developed analysis of one way a leader can use emotional intelligence in context	3
	1b	Shows knowledge of two elements of emotional intelligence	2	Limited analysis of two ways a leader can use emotional intelligence	2
	1a	Shows knowledge of one element of emotional intelligence	1	Limited analysis of one way a leader can use emotional intelligence	1
	0	No creditable content			0
Knowledge – Emotional Intelligence (EI) <ul style="list-style-type: none">• recognising and managing your emotions and those of others.• Goleman’s four competencies of emotional intelligence:<ul style="list-style-type: none">– self-awareness,– self-management,– social awareness, and– social skills.					
Application and analysis– linked to one aspect of knowledge <ul style="list-style-type: none">• Nadia’s leadership of a start-up internet business employing a young staff – lack of experience.• All staff are part-time so important to manage well, keep happy and ensure good customer relations.• Staff unlikely to have many opportunities to meet as working from home which can be alienating and a leader should recognise this and take action to help develop a team spirit/engage employees.					

Question	Answer				Marks
2(c)					1
	K	APP	AN	DEV	
	Self-awareness	Has identified laissez faire management style	Which may not be suitable for a growing business	So can adapt to a more suitable method	
	Awareness of employee needs	Tutors are remote workers and	may not feel a connection with the business	Which could lead to poor tutor engagement	
	<p>1. Self–Awareness without any obstruction. She will be able to recognise emotions as they arise in response to an action or situation. As a result, she will be in a better position to address problems/future complications.</p> <p>2. Self–Management Will help Nadia stay in control so that she is unlikely to make hasty decisions or let her anger take over her behavior. This will help her to maintain respect from her employees.</p> <p>3. Social Awareness Nadia should be aware of the emotions of others and able to pick up on what is going on around her. She should be able to sympathise with others and give helpful feedback. This is a critical skill for leaders, who work closely to inspire and motivate a team. If the leader is unable to empathise with their employees, she will find it difficult to obtain respect or loyalty.</p> <p>4. Social skills Nadia should be able to clearly convey directions and know what to say in order to inspire and motivate others. An important skill for leaders, communication can be a deciding factor in whether the team listens or not. She should be able to handle any disagreements that arise between employees, customers, and other parties. In conjunction with the above skills, leaders can use their emotional intelligence to develop a more effective workplace.</p>
