Paper 2 Practical

May/June 2021

MARK SCHEME

Maximum Mark: 110

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2021 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of **21** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Tasks 1 and 7

	A	B	C	D	E	F	G	H	I	J	K	L
1	Christine's Construction Company											
2												
3	Building foundation planner for brick/block walls			Soil/Rock data				Dry	Wet	Dry	Wet	kg/m2
5	Data entry		Enter all dimensions in metres	Soil code	Soil/Rock type			Width	Width	Depth	Depth	Load bearing
6	Building weighting factor	1.35						in mm	in mm	in mm	in mm	pressure
7	Type of construction:	B	Enter W (freestanding Wall) or B (building)									
8	Length of wall:	4	Enter length in metres	L	Limestone	Strip/trench fill		600	600	500	600	30000
9	Height of wall:	1.5	Enter height in metres	G	Granite	Strip/trench fill		600	600	200	200	59000
10	Code for the type of soil:	W	Enter soil code, C,G,H,J,L,P,S,T,U,V or W	S	Sandstone	Strip/trench fill		600	600	500	500	30000
11	Thickness of wall:	S	Enter S (single) or D (double)	T	Shale	Strip/trench fill		600	600	500	500	27000
12	Soil moisture level:	D	Enter W (wet) or D (dry)	V	Firm Chalk	Strip/trench fill		450	450	700	700	30000
13				W	Soft chalk	Unsuitable						
14	Foundations		Strip foundations are not suitable for this site	J	Gravel	Strip/trench fill		450	900	700	800	25000
15	Depth:		metres	H	Gravel and sand	Strip/trench fill		450	900	700	700	20000
16	Width:		metres	C	Clay	Strip/trench fill		700	1000	1000	3000	10000
17	Length:		metres	P	Peat	Raft foundation only						
18	The volume of foundations will be:		cubic metres	U	Sand	Strip/trench fill		600	600	800	700	15000
19	The volume of concrete will be:		cubic metres									
20	Weight of the wall will be:	1732.5	kilograms									
21	Exceeds the foundation's load bearing				Costs per cubic metre							
22	The concrete for the foundations will cost:				Concrete:	\$85.30						
					Empty portion:	\$22.00

Christine's Construction Company

Building foundation planner for brick/block walls

Data entry

Building weighting factor 1.36
 Type of construction: B
 Length of wall: 30
 Height of wall: 50
 Code for the type of soil: U
 Thickness of wall: D
 Soil moisture level: W

Enter all dimensions in metres

Enter W (freestanding Wall) or B (building)
 Enter length in metres
 Enter height in metres
 Enter soil code, C,G,H,J,L,P,S,T,U,V or W
 Enter S (single) or D (double)
 Enter W (wet) or D (dry)

Foundations

Depth: 0.7 metres
 Width: 0.6 metres
 Length: 30 metres
 The volume of foundations will be: 12.6 cubic metres
 The volume of concrete will be: 13.49 cubic metres
 Weight of the wall will be: 866250 kilograms

Exceeds the foundation's load bearing

The concrete for the foundations will cost: \$1,249.92
