UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the October/November 2006 question paper

9698 PYCHOLOGY

9698/01

Paper 1 (Core Studies 1), maximum raw mark 100

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

The grade thresholds for various grades are published in the report on the examination for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2006 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Page	. 2	www.dynamicpape Mark Scheme Syllabus	Pape	ır
	raye	; 3	GCE A/AS LEVEL - OCT/NOV 2006 9698	01	; I
7	Fron	n the stu	ıdy by Dement and Kleitman on sleep and dreaming:		
-	(a)		y two features of REM sleep.		
	(ω)		kely: 1. eyes move rapidly (EOG); 2. body relatively inactive (EMG); 3. increased	1+1	
		EEG a	ctivity; 4. dream more likely. for naming feature.	1+1	
	(b)	Give o	ne difference between REM sleep and NREM sleep.		
		rapidly	kely: 1. REM = dream more likely; NREM dream less likely. 2. REM eyes move NREM eyes still; 3. REM body inactive NREM body active; 4. REM EEG active relatively inactive.	2	[4]
8	In th	e study	by Sperry:		
	(a)	What i	s meant by the term 'split brain'?		
			the two hemispheres of the brain are surgically divided by cutting the commissura	al 2	
		fibres. 1 mark	partial, 2 marks full.		
	(b)		ne problem with making generalisations about normal brain activity from a split brains.	study of pe	ople
			kely answer: 1. people having a split brain are not typical/normal. Epilepsy may other processes.	2	[4]
9	The	study by	Raine, Buchsbaum and LaCasse uses a PET scan:		
	(a)	Outline	e the PET scan procedure.		
			luorodeoxyglucose) tracer injected, continuous performance task done for 32 minaken (CPT done before injection to reduce novelty).	s. 2	
	(b)	ldentif	y one scanning technique used to identify brain regions.		
			o scanning techniques are the cortical peel technique (for lateral areas) and the b que (for medial areas). Descriptions of these techniques are not required.	ox 1+1	
			for identification of each.		[4]
10	Desc	ribe two	o features of the experiment by Milgram that may explain the high levels of c	bedience.	
			om a long list including:	2+2	
	has \	olunteer/	ale University; 2. expt has a worthy purpose – learning and memory; 3. participant red; 4. participant feels obliged; 5. participant is paid; 6. teacher-learner random so		
			al chance; 7. participants told 'painful but not dangerous'; 8. the 'prods'. I, 2 marks full.		[4]
11	In th	e prison	simulation study by Haney, Banks and Zimbardo:		
	(a)	What v	was the dispositional hypothesis that was proposed?		
		system the peo	spositional (within people) hypothesis is 'the deplorable condition of our penal a (and its dehumanising effects upon prisoners and guards) owing to the nature of ople who administrate it or the nature of the people who populate it, or both. Guardistic, uneducated and insensitive. Nothing is wrong with the prison itself (situation).	ds	

2

[4]

(b) To what extent did the results of the study support the dispositional hypothesis?

because of the **situation** they were in. 1 mark partial, 2 marks full for each.

Most likely: no, dispositional not supported. 'Normal' participants behaved as they did

Page 4	Mark Scheme	ark Scheme www.dynamicpapers.cc	
. ago .	GCE A/AS LEVEL - OCT/NOV 2006	9698	Paper 01

Samaritans study.

To what extent did the findings of the study support the 'diffusion of responsibility' hypothesis?

Most likely: finding did not support the hypothesis as there was no diffusion of responsibility.

2

2

(b) Suggest one explanation for the findings of the study.

Most likely: 1. no diffusion of responsibility as participants were face-to-face with victim. 2. participants made cost/benefit decision.

[4]

[4]

In the study by Gould on intelligence testing: 13

What is meant by the term 'moron'?

Person with a mental age of 8-12 years. 1 mark if IQ = 12, or 'low intelligence'. 1 mark partial, 2 marks full

2

(b) Gould's article is called 'A Nation of Morons'. Who was Gould referring to and why?

Yerkes concluded that the white Americans were morons! From all the results, their MA was found to be 13 (just above moronity). BUT this is fine as all other groups were lower. 1 mark partial, 2 marks full.

2

14 The study by Hraba and Grant in 1969 on doll choice was a replication of a study carried out by Clark and Clark in 1939.

Identify two features that were the same.

Most likely: both done in Lincoln, Nebraska, dolls were same (four: two white, two black); 1+1 all 8 questions same; participants were aged 4-8 years. 1 mark for each correct identification.

(b) Identify two features that were different.

Most likely: different children; different society; more pride in own race. 1 mark for each correct identification. [4]

15 In the study by Rosenhan (sane in insane places):

(a) Briefly describe the pseudopatients.

Most likely 8 people, three women, five men. Range of occupations. 1 mark for each feature.

2

2

(b) How did the pseudo-patients gain access to the mental institutions?

Most likely: phoned hospital for appointment; claimed hearing voices. Voices: empty, hollow and thud. 1 mark partial, 2 marks full.

[4]

Partial/full answer

0 marks	no answer or
	incorrect answer
1 mark	partially correct answer or
	correct but incomplete lacking sufficient detail or explanation to demonstrate clear understanding
2 marks	correct answer with sufficient detail/explanation to demonstrate clear understanding

Page 5	Mark Scheme	Syllabus	Paper
	GCE A/AS LEVEL - OCT/NOV 2006	9698	01

Section B Question 16

One way of carrying out research in psychology is to use the experimental method. 16 (a)

Loftus and Palmer (eyewitness testimony) Tajfel (intergroup discrimination) Samuel and Bryant (conservation)

Outline the main findings of your chosen study.

No answer or incorrect answer.	0
Anecdotal evidence, general statements, minimal detail, minimal focus.	1-3
Attempt to outline some of main findings though with omission of detail or lack of clarity	4-6
(comment with some comprehension).	
Main findings identified and described in good detail. Outline is clear, focused and well	7-10
expressed. Good selection of findings.	

max mark 10

(b) Describe the procedure of your chosen study explaining how the experimental method was used.

No answer or incorrect answer.	0
Anecdotal description of case study, brief detail, minimal focus.	1-3
Appropriate aspect identified, description shows some understanding. Some detail and	4-6
expansion of case study.	
Appropriate aspect identified.	7-10
Description is clear, has good understanding, is focused and well expressed. Good detail,	
each aspect explained fully.	

max mark 10

Using your chosen study as an example, what are the strengths and weaknesses of the (c) experimental method?

No answer or incorrect answer.	0
Anecdotal description, brief detail, minimal focus. Very limited range. Description may be	1-3
inaccurate, incomplete or muddled.	
Strengths or weaknesses only which are focused on question.	4-5
For 4 marks as for 6-7 mark band.	
For 5 marks as for 8-10 mark band.	
Several strengths and weaknesses which are focused on question.	6-7
Description is good with reasonable understanding.	
Some detail and expansion of key features.	
Balance of strengths and weaknesses which are focused on question.	8-10
Description is detailed with good understanding and clear expression.	
The arguments are well considered and reflect understanding which extends beyond the	
specific study.	

max mark 10

(d) Suggest an alternative way of gathering data for your chosen study and say what effect, if any, this would have on the results.

No answer or incorrect answer.	0
Anecdotal suggestion, brief detail, minimal reference to question.	1-3
Description may be inaccurate, incomplete or muddled.	
Some appropriate suggestions which are focused on question.	4-6
Description shows some understanding.	
Some detail and expansion of aspects, with consideration of effect on results.	
Max 6 marks if there is no mention of effect on results.	
Range of appropriate suggestions which are focused on question.	7-10
Description is detailed with good understanding and clear expression.	
The changes are well considered and reflect understanding of the area in question.	

max mark 10

Consideration of effect on results if appropriate.

www.dynamicpapers.com

	GCE A/AS LEVEL - OCT/NOV 2006	9698	01

Section B Question 17

17 Psychologists sometimes carry out longitudinal studies (where behaviour is observed over (a) weeks, months or years). Other studies are carried out which are described as snapshot studies because they may take only minutes or hours to complete.

Hodges and Tizard (social relationships) Gardner and Gardner (project Washoe) Thigpen and Cleckley (multiple personality disorder)

Outline the main findings of your chosen study.

No answer or incorrect answer.	0
Anecdotal evidence, general statements, minimal detail, minimal focus.	1-3
Attempt to outline some of main findings though with omission of detail or lack of clarity	4-6
(comment with some comprehension).	
Main findings identified and described in good detail. Outline is clear, focused and well	7-10
expressed. Good selection of findings.	

max mark 10

Describe the procedure of your chosen study, explaining how it is a longitudinal study. (b)

No answer or incorrect answer.	Ü
Anecdotal description of longitudinal, brief detail, minimal focus.	1-3
Appropriate longitudinal aspects identified, description shows some understanding. Some	4-6
detail and expansion of control.	
Appropriate longitudinal aspects identified.	7-10
Description is clear, has good understanding, is focused and well expressed. Good detail,	

each control explained fully.

max mark 10

(c) Using your chosen study as an example, what are the advantages and disadvantages of using longitudinal studies in psychological research?

No answer or incorrect answer.	0
Anecdotal description, brief detail, minimal focus. Very limited range. Description may be	1-3
inaccurate, incomplete or muddled.	
Advantages or disadvantages only which are focused on question.	4-5
For 4 marks as for 6-7 mark band.	
For 5 marks as for 8-10 mark band.	
Several advantages and disadvantages which are focused on question.	6-7
Description is good with reasonable understanding.	
Some detail and expansion of key features.	
Balance of advantages and disadvantages which are focused on question.	8-10
Description is detailed with good understanding and clear expression.	
The arguments are well considered and reflect understanding which extends beyond the	
specific study.	

max mark 10

Suggest an alternative way of gathering data for your chosen study and say what effect, if any, (d) this would have on the results.

No answer or incorrect answer.	0
Anecdotal suggestion, brief detail, minimal reference to question.	1-3
Description may be inaccurate, incomplete or muddled.	
Some appropriate suggestions which are focused on question.	4-6
Description shows some understanding.	
Some detail and expansion of aspects, with consideration of effect on results.	
Max 6 marks if there is no mention of effect on results.	
Range of appropriate suggestions which are focused on question.	7-10
Description is detailed with good understanding and clear expression.	
The changes are well considered and reflect understanding of the area in question.	

max mark 10
