Section A (50 marks)

Answer **both** questions in this section.

1 Tajfel carried out a laboratory experiment to investigate intergroup categorisation. An alternative way to investigate this would be to carry out a self report.

(a) Describe the self report as a research method. [5]

(b) Design an alternative way to investigate intergroup categorisation using a self report and describe how it could be conducted. [10]

(c) Evaluate this alternative way of studying intergroup categorisation in methodological and ethical terms. [10]

2 Nelson conducted a study to investigate children's morals using stories.

(a) What is meant by the 'developmental approach'? [2]

(b) Describe **one** finding from the study that supports the developmental approach. [3]

(c) Discuss the strengths and weaknesses of the developmental approach using the Nelson study as an example. [10]

(d) Discuss the use of children in psychological research using the Nelson study as an example. [10]

Section B (20 marks)

Answer **one** question from this section.

3 **(a)** Outline what is meant by the term 'psychometric test' in psychology. [2]

Using the studies from the list below, answer the questions which follow:

Baron-Cohen et al. (eyes test)
Thigpen and Cleckley (multiple personality disorder)
Billington et al. (empathising and systemising)

(b) Describe how the data were collected in each of these studies. [9]

(c) What advantages may psychologists have when they use psychometric tests? [9]

4 **(a)** Outline what is meant by the 'application of psychology to everyday life'. [2]

Using the studies from the list below, answer the questions which follow:

Rosenhan (sane in insane places)
Freud (little Hans)
Mann et al. (lying)

(b) Describe an application to everyday life for each of these studies. [9]

(c) What problems may psychologists have when they try to make research applicable to everyday life? [9]
