UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the May/June 2008 question paper

9701 CHEMISTRY

9701/02

Paper 2 (AS Structured Questions), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2008 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2			Mark Scheme		w.dynamicpape Syllabus	Paper	
			A/AS LEVEL – Ma	A/AS LEVEL – May/June 2008		02	
	 (i) 2 (1) (ii) between 104° and 105° (1) 						
(b)	ethana	al	CH₃CHO	A (1)			
	ethanc	bl	CH ₃ CH ₂ OH	C (1)			
	metho	xymethane	CH_3OCH_3	A (1)			
	2-metł	nylpropane	(CH ₃) ₂ CHCH ₃	B (1)			
(c)	(i) hy	drogen bonds ((1)				
	(ii) co	orrect dipole on					
			nown between the lo atom in an –OH grou				
	lone pair on O atom of CH ₃ OH or H ₂ O clearly shown in the hydrogen bond (1)						
	e.	g. CH ₃ : O : ·····H—(H	D—H				
	or						
		H : O :H(H	O—CH₃				

hydrogen bonds cannot form	
between $C_2H_5OC_2H_5$ molecules (1)	[2]

[Total: 12]

			GCE A/AS LEVEL – May/June 2008	9701	02			
2	(a)	F(g)	\rightarrow F ⁺ (g) + e ⁻					
		corre	ect equation (1)					
		corre	ect state symbols (1)		[2]			
	(b)	from	Na to Ar, electrons					
		are a	added to the same shell/have same shielding (1)					
		ares	subject to increasing nuclear charge/proton number (1)					
		are	closer to the nucleus or atom gets smaller (1)		[3]			
	(c)	(i)	Al and Mg					
		in A <i>l</i> outermost electron is in 3p rather than 3s (1)						
		3p electron is at higher energy or is further away/is more shielded from nucleus (1)						
		(ii)	P and S					
			for P 3p sub-shell is singly filled and for S one 3p orbital has paired electrons (1)					
		paired electrons repel (1)			[4]			

(d) (i) and (ii)

element	Na	Mg	Al	Si	Р	S
melting point	low		high	high	low	low
conductivity	high		high	moderate	low	low
	(1)		(1)	(1)	(1)	(1)

one mark for each correct column

(e) because they had not been discovered (1)

[Total: 15]

[5]

	GCE A/AS LEVEL – May/June 2008	9701	02

3 (a) high temperature (and/or pressure) provide enough energy (1)

to break N=N bond or to provide E_a for N₂/O₂ reaction (1)

(b) (i) two from C, CO, hydrocarbon, SO₂, H₂S, NO₂/NO_x (1 + 1)

not CO_2 , H_2 , H_2O , SO_3 , NO

- (ii) Pt or Pd or Pt/Rh or Pt/Pd/Rh (1)
- (iii) $2NO + 2CO \rightarrow 2CO_2 + N_2$ or $2NO + C \rightarrow CO_2 + N_2$ (1)
- (c) (i) $K_{c} = \frac{[NO]^{2}[Cl_{2}]}{[NOCl]^{2}}$ (1)

units are mol $dm^{-3}(1)$

(ii) at 230 °C
$$K_{\rm c} = \frac{(1.46 \times 10^{-3})^2 \times 1.15 \times 10^{-2}}{(2.33 \times 10^{-3})^2}$$

=
$$4.5 \times 10^{-3} \text{ mol dm}^{-3}$$
 (1)

at 465 °C
$$K_{\rm c} = \frac{(7.63 \times 10^{-3})^2 \times 2.14 \times 10^{-4}}{(3.68 \times 10^{-4})^2}$$

$$= 9.2 \times 10^{-2} \text{ mol dm}^{-3} (1)$$

allow ecf on answer to part (i)

- (iii) endothermic because K_c increases with temperature mark is for explanation allow ecf on answer to part (ii) (1)
- (d) (i) equilibrium moves to RHS (1)

more moles on RHS (1)

(ii) no change to equilibrium position (1)

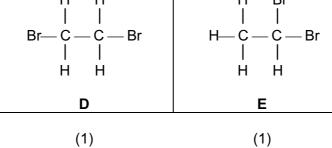

[NOC1] and [NO] change by same amount (1)

[Total: 15]

(ii)

(b) (i) hydrogen (1)

nickel catalyst - allow platinum or palladium (1)

(ii) isomer formed **must** be 1,2-dibromoethane (**D** above)

because

cis isomer has one Br atom on **each** carbon atom (1) mark is for the reason but wrong isomer is penalised
