UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the May/June 2011 question paper

for the guidance of teachers

9701 CHEMISTRY

9701/33

Paper 31 (Advanced Practical Skills 1), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	GCE AS/A LEVEL – May/June 2011	9701	33

Γ

Question	Sections	Indicative material	Mark	
1 (a)	PDO Layout	 Volume given for rough titre and accurate titre details tabulated. <i>Minimum of 2 × 2 "boxes".</i> 	1	
	PDO Recording	 Appropriate headings and units for data given in weighing and accurate titration tables. Acceptable headings: mass of tube + FA1; mass of tube + residue/mass of empty tube (mass of FA1 used); initial/final or 1st/2nd (burette) (reading)/(reading at) start/finish; volume added/used/ titre; or wtte [not "difference"] Acceptable units are solidus: /cm³; brackets: (cm³); in words: volume in cubic centimeters, volume in cm³. Similarly for mass in g, etc If units are not included in the heading every entry in the table must have the correct unit. 	1	
	PDO Recording	 All accurate burette readings are given to the nearest 0.05 cm³. Do not award this mark if: 50(.00) is used as an initial burette reading; more than one final burette reading is 50.(00); any burette reading is greater than 50.(00) 	1	
	MMO Decision	 IV Two uncorrected titres within 0.10 cm³ Do not allow the Rough even if ticked. Do not award this mark if having performed two titres within 0.1 cm³ a further titration is performed which is more than 0.10 cm³ from the closer of the initial two titres, unless a fourth titration, within 0.1 cm³ of any other has also been carried out. 	1	
Examiner ro and then se <i>two identica</i> to calculate Examiner co result. Calc	bunds any burette elects the "best" tit al; titres within 0.05 mean (ignore any ompares [correcte ulate the ratios to	readings to the nearest 0.05 cm ³ , checks subtractions re using the hierarchy: 5 cm ³ ; titres within 0.1 cm ³ ; etc / labelled rough). ed mean titre/corrected mass of FA 1] with Supervisor 2 dp.		
	MMO Quality	Award V , VI and VII if $\delta \le 0.05 \text{ (cm}^3\text{g}^{-1})$ Award V and VI if $0.05 < \delta \le 0.10$ Award V only if $0.10 < \delta \le 0.20$ If the "best" titres are $\ge 0.60 \text{ cm}^3$ apart cancel one of the Q marks.	1 1 1	[7]

	GCE AS/A LEVEL – May/June 2011	9701	33

(b)	MMO Decision	Sele with calc with	ects correctly subtracted accurate titre values nin 0.20 cm ³ . Must use more than one value. If no culation shown then titres must be indicated (<i>e.g.</i> n a tick) in the table	1	
	PDO Display	Cor rou mos	rect mean from any values selected (may include gh) by candidate given to same decimal places as st precise burette reading recorded in the table.	1	
		The nea A m can 0.03 If A thei nun Mea Mea	e third decimal place may be rounded to the prest 0.05 cm ³ . mean of exactly .x25 or .x75 is allowed but the didate may round up or down to the nearest 5 cm ³ . LL burette readings are given to 1 decimal place in the mean may be given to 1 decimal place if herically correct without rounding. an of 24.3 and 24.4 = 24.35 (\checkmark) an of 24.3 and 24.4 = 24.4 (x)		
		If no that	o working shown allow mean if value identical to used by Examiner.		[2]
(c)	ACE Interpretation	I	In part (i) {titre from (b) /1000} × 0.01(0) If no working shown then answer must be correct.	1	
		II	ans to (i) × 5 and ans to (ii) × 10 with no additional steps	1	
		111	ans to (iii) × 55.8 <i>If</i> (iii) <i>incorrect allow correct</i> (ii) × 10 × 55.8	1	
		IV	<pre>correct (ans to (iii) × 55.8/mass of FA 1) × 100 to sf shown (ecf allowed from (iii)) (sf shown may come from (i) with no previous rounding) If (iii) incorrect allow correct (ii) × 10 × 55.8 × 100/mass FA 1 (If choice of answer take the one in the answer space.)</pre>	1	
	PDO Display	V	3 or 4 significant figures in final answers to all parts attempted (minimum three parts)	1	[5]
(d)	ACE Interpretation	(i)	Uncertainty either 1 or .5 in final place. If balance displays to 1 decimal place: error in balance reading is ± 0.05 g or $\pm 0.1(0)$ g If balance displays to 2 decimal places: error in balance reading is ± 0.005 g or ± 0.01 g If balance displays to 3 decimal places: error in balance reading is ± 0.0005 g or ± 0.001 g	1	
		(ii)	{2 × (i)/mass used} × 100 answer to 2, 3 or 4 sf	1	[2]
				[Το	tal: 16]

	GCE AS/A LEVEL – May/June 2011	9701	33

2 (a)	PDO Display	1	Tabulates mass of (empty) crucible, mass of crucible + FA 4 , mass of crucible + residue/ FA 4 after heating, mass of FA 4/hydrated magnesium sulfate, mass of water lost. Do not award if mass of FA 4 or mass of water incorrect	1	
	PDO Recording	11	Records all weighings consistently to at least 1 decimal place [minimum three weighings].	1	
	MMO Decision	III	Final weighings after reheating are within 0.05g or identical if masses recorded to 1 dp	1	
Examiner to candidate to If two exper masses of I If the Super check whet average if n	o calculate [lowest n o 2 dp. F A 4 to calculate th <i>visor's value is dou</i> <i>her candidates are</i> <i>najority in close age</i>	mass then e rat <i>ibtfu</i> clos reem	s of residue/mass of FA 4] of Supervisor and use sum of masses of residues and sum of tio. I (higher than the majority of candidates) then to the expected value of 0.55 or use candidate ment. (Contact team leader)		
	MMO Quality	Aw Aw	ard IV and V if $\delta \le 0.05$ ard IV only if 0.05 < $\delta \le 0.10$	1 1	[5]
(b)	ACE Interpretation	Pa [ma (all <i>M</i> , <i>All</i> <i>M</i> <i>M</i> <i>M</i> <i>M</i> <i>M</i>	rt (i) [mass of water lost/(7 × 18)] or ass of water lost × 246.4/18] ow m(H ₂ O) × 246.4/7) H_2O must be 18 ow ecf for mass of water lost wo experiments carried out then mass of water by be taken from either or the mean. ow mark if answer calculated correctly but working t shown. rt (i) [mass of water lost × 246.4/7 × 18] correctly	1	
		eva (Igi The ac	aluated to 3 sf [= mass of water lost × 1.956] nore part (ii)) ere are other chemically correct methods – mark cordingly.		[2]
(c)	ACE Improvements	Us larç use	e a lid (for the early gentle heating) or ger mass (for smaller percentage error) or e (cool in) desiccator	1	[1]
		•		[To	tal: 8]

Page 5	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2011	9701	33

	FA 5 is NaHCO ₃ (s); FA 6 is NH ₄ Br(s); FA 7 is H ₂ SO ₄ (aq)					
3	(a)	MMO Collection	On heating, steam or condensation or water vapour, misty vapour is noted or solid becomes powdery	1		
		MMO Decisions	Tests for gas using limewater or in 3(d)	1	[2]	
	(b)	PDO Layout	Presents results of tests in an unambiguous way <i>Minimum 4 × 2 boxes</i>	1		
		MMO Collection	(No reaction with cold NaOH and) gas/ammonia/fumes produced (on heating) that turn(s) red litmus blue Do not award if ppt reported with NaOH (CON)	1		
			No reaction with ammonia and no reaction with barium chloride/nitrate	1		
			Cream ppt with silver nitrate that partially dissolves/is insoluble in aqueous ammonia	1		
		ACE Conclusion	FA 6 cation: ammonium/NH₄ ⁺ <i>from some evidence and no CON obs</i>	1		
			FA 6 anion: bromide/Br [−] No ecf but can award Br [−] from any mention of cream but ppt must be present or off-white ppt insoluble or partially soluble in NH ₃ .	1	[6]	
	(c)	MMO Collection	Ignore any observations after water added. Steamy/misty white/orange/red/red-brown (not brown) gas/vapour/ fumes/smoke produced or gas/vapour/fumes/smoke bleaches litmus (paper) or gas/vapour/fumes/smoke turns (potassium) dichromate (solution) from orange to green	1		
			(White) solid turns red/orange (not yellow, not brown, not solution, not ppt) Ignore "hot"	1		
		ACE Conclusion	FA 6 is oxidised/redox reaction/oxidation because Br ⁻ becomes Br_2/Br_2 is produced or redox/reduction because H_2SO_4 forms/becomes SO_2 (with positive dichromate observation) or exothermic because tube becomes hot/heat given out.	1	[3]	
	(d)	MMO Collection	Fizzing/effervescence/bubbling (occurs) (<i>not gas is produced</i>) If limewater test used here give second mark in (a) .	1		
			White ppt with lead nitrate and no reaction with silver nitrate	1	[2]
