#### UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Advanced Subsidiary Level and GCE Advanced Level

## MARK SCHEME for the May/June 2012 question paper

### for the guidance of teachers

# 9701 CHEMISTRY

9701/33

Paper 31 (Advanced Practical Skills 1), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Γ

Question	n Sections	Indicative material	Mark	Total
1 (a)	PDO Layout	I Two balance readings and mass used unambiguously recorded.	1	
	MMO Collection	II Two rough titres and burette readings recorded.	1	
	Concettori	III Single table for each accurate titration Minimum of 2×2 "boxes"	1	
	PDO Recording	<ul> <li>IV Correct headings and units in weighing table and accurate titration table(s) Acceptable headings: mass of tube + FA 4; mass of tube + residue/mass of empty tube (mass of FA 4 used); initial/final or 1<sup>st</sup>/2<sup>nd</sup> (burette)(reading)/ (volume)/ (reading at)/(volume at) start/finish; volume added/used/ titre; or wtte, not "difference" or "total volume" Acceptable units are solidus:/cm<sup>3</sup>; brackets: (cm<sup>3</sup>); in words: volume in cubic centimeters, volume in cm<sup>3</sup>. Similarly for mass in g, etc. If units are not included in the heading every entry in the table must have the correct unit.</li> </ul>	1	
	MMO Collection	<ul> <li>V All accurate burette readings to 0.05 cm<sup>3</sup> Do not award this mark if: 50(.00) is used as an initial burette reading; more than one final burette reading is 50.(00); any burette reading is greater than 50.(00)</li> </ul>	1	
	MMO Decisions	<ul> <li>VI Two uncorrected accurate titres within 0.10 cm<sup>3</sup> in both steps</li> <li>Do not allow the Rough even if ticked.</li> <li>Do not award this mark if having performed two titres within 0.10 cm<sup>3</sup> a further titration is performed which is more than 0.10 cm<sup>3</sup> from the closer of the initial two titres, unless a fourth titration, within 0.1 cm<sup>3</sup> of any other has also been carried out. Mark not awarded if any burette reading is given to zero dp apart from an initial reading of 0</li> </ul>	1	
<b>(a)</b> cont.	Step 2: Exami supervisor's tit	ner subtracts candidate's titre (corrected to 0.01 cm <sup>3</sup> ) from re.		
	MMO	Award <b>VII</b> , <b>VIII</b> , <b>IX</b> if $\delta \le 0.1 \text{ cm}^3$	1	
	Quality	Award <b>VII</b> , <b>VIII</b> if $0.10 < \delta \le 0.20 \text{ cm}^3$	1	
		Award <b>VII</b> if $0.20 < \delta \le 0.40 \text{ cm}^3$	1	
		Spread penalty (see below)

	GCE AS/A LEVEL – May/June 2012	9701	33

Question	Sections	Indicative material	Mark	Total
	Step 3: Examin corrected cance sup- and subtracts th If 1 g > candida marks and do r			
(a)	MMO	Award <b>X</b> , <b>XI</b> , <b>XII</b> if $\delta \le 1.00 \text{ cm}^3$	1	
cont.	Quality	Award <b>X</b> , <b>XI</b> if $1.00 < \delta \le 2.00 \text{ cm}^3$	1	
		Award <b>X</b> only if 2.00 < $\delta \le 4.00 \text{ cm}^3$ If Supervisor's t <sub>3</sub> < 10.00 cm <sup>3</sup> then halve the tolerances.	1	
		Apply <b>spread penalty</b> to each of steps 2 & 3 as follows: titres selected (by examiner) differ by > $0.50 \text{ cm}^3 = -1$ ; Apply a spread penalty of $-1$ if only one accurate titration is performed.		[12]
(b)		<ul> <li>(i) Check mean titre correctly calculated from clearly selected values (ticks or working)</li> <li>no mark awarded here</li> </ul>		
	ACE Interpretation	(ii) Expression {(b)(i) x 0.10}/1000 and	1	
		(iii) as (ii) If no working shown then answer must be correct		
		<ul><li>(iv) Expression (b)(iii) × 2 × 10</li><li>If no working shown then answer must be correct</li></ul>	1	[2]

Page 4	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2012	9701	33

Question	Sections	Ind	icative material	Mark	Total
(c)	ACE Interpretation		<ul> <li>(i) Calculation of mean for (b)(i) and (c)(i) Candidate must average two (or more) titres that are within 0.20 cm<sup>3</sup> of each other. Working must be shown or ticks must be put next to the two (or more) accurate readings selected. The mean should normally be quoted to 2 dp rounded to the nearest 0.01. Example: 26.667 must be rounded to 26.67. Two special cases where the mean may not be to 2 dp: allow mean to 3 dp only for 0.025 or 0.075 e.g. 26.325; allow mean to 1 dp if all accurate burette readings were given to 1 dp and the mean is exactly correct, e.g. 26.0 and 26.2 = 26.1 is correct but 26.0 and 26.1 = 26.1 is incorrect. Do not award this mark if: any selected titre is not within 0.20 cm<sup>3</sup> of any other selected titre unless a spread penalty has been applied or two pairs of accurate titres shown (eg 21.1, 21.2, 21.4, 21.5 should have a mean of 21.3); the rough titre was used to calculate the mean; the candidate carried out only 1 accurate titration in both steps 2 and 3; burette readings were incorrectly subtracted to obtain any of the accurate titre values.</li> </ul>	1	
		ll and	(ii) (c)(i) × 0.1/1000	1	
			(iii) as (c)(ii) If no working shown then answer must be correct		
		III	(iv) (c)(iii) × 10 If no working shown then answer must be correct	1	
	PDO Display	IV	Working is shown in every step of <b>(b)(ii)</b> and <b>(iv)</b> , <b>(c)(ii</b> ) and <b>(iv)</b> and at least 3 steps attempted <i>Working must be a step in the right direction</i>	1	[4]

Page 5	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2012	9701	33

Question	Sections	Indicative material	Mark	Total
(d)	ACE Conclusion	I (i) $CaCO_3 + 2HCl \rightarrow CaCl_2 + CO_2 + H_2O$ Allow $H_2CO_3$	1	
	PDO Display	II (iii) {(d)(ii)/2} × 100.1 If the balancing is incorrect then the value of (d)(ii) must be correct for ecf to be allowed.	1	
	ACE Conclusion	III (iv) expression {(d)(iii)/mass in (a)} × 100 If no working shown then answer must be correct	1	
	PDO Display	<ul> <li>IV Final answer to every step attempted out of (b), (c) and (d) apart from (b)(iv) to 3 or 4 sf (minimum 6 steps attempted)</li> </ul>	1	[4]
(e)	ACE Interpretation	(i) $(\pm)0.05 \text{ cm}^3$	1	
	Interpretation	<ul> <li>(ii) {0.1/one of the titre values in step 3} × 100 (ecf (i) × 2 for error)</li> </ul>	1	[2]
(f)	ACE Improvement	Explanation must not contradict suggested improvement: larger mass reacts with more HC <i>l</i> so smaller titre so larger % error; larger mass may be excess and won't dissolve in HC <i>l</i> ; larger mass would result in smaller % <b>mass</b> error; greater acid spray would result in greater % error.	1	[1]
