**Additional information**

In March 2021 a machine fault meant that only 75% of budgeted output could be produced. The directors considered two options.

Option A

- 1 Reduce normal output by 25%; as a result, materials cost would be affected because trade discount of 20% on bulk orders would not be available. All other costs would remain the same.
- 2 Buy in units from a competitor at \$27.20 per unit. The competitor can supply a maximum of 250 units and will charge \$125 for delivering this quantity.

Option B

- 1 Hire a replacement machine at a cost of \$1600 for the month.
- 2 The replacement machine could make an additional 200 units per month.
- 3 All other costs would remain the same.
