Paper 3 Structured Questions MARK SCHEME Maximum Mark: 150 9706/32 October/November 2020

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2020 series for most Cambridge IGCSE[™], Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always whole marks (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit
 is given for valid answers which go beyond the scope of the syllabus and mark scheme,
 referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer	Marks	
1(a)	It completes the double entry (1) as the factory profit is a debit in the manufacturing account and a credit in the income statement (1).		
	It enables the income statement to show the profit of the whole business (1) from both manufacturing and trading/selling (1).		
	The increase in profit in the profit and loss section of the income statement (1) cancels the increase in cost in the trading account (1).		
	Accept other valid answers.		
	Any two reasons up to (1+1) each Max 4		
1(b)(i)	140 000 (- 30 000 + 42 000) (1) + 10 000 (1) = \$162 000 (1)OF to include base figure)	3	
1(b)(ii)	162 000 × 20% = \$32 400 (1)OF	1	
1(c)(i)	Provision for unrealised profit account \$ 2019 2019 Dec 31 Income 2000 (1)OF Jan 1 Balance b/d 6000 (1) statement	3	
	Balance c/d 4000 (1) 6000 2020 Jan 1 Balance b/d 4000		
1(c)(ii)	FG Limited Income statement for the year ended 31 December 2019 \$ \$	9	
	Revenue $320\ 800$ Inventory 1 January 2019 $36\ 000$ Transfer price $194\ 400$ $194\ 400$ (1)OF $230\ 400$ $230\ 400$ Inventory 31 December 2019 $24\ 000$ Cost of sales $206\ 400$ Gross profit $114\ 400$ Factory profit $32\ 400$ Change in provision for unrealised profit $200\ (1)$ Distribution costs $42\ 700\ (1)$ Administrative expenses $61\ 900$ Profit for the year $104\ 600$ W1 78 900 (+ 12\ 000\ -\ 24\ 000)\ (1)\ -\ 5000\ (1)\ =\ 61\ 900		

Question	Answer	Marks
1(d)	Using a transfer price may compare with the cost of buying from an external supplier (1).	5
	Using a transfer price may be used to assess departmental performance (1).	
	Using a transfer price may assist in calculating pay or bonuses (1).	
	Setting the rate of factory profit may be subjective (1).	
	Factory profit does not alter the total profit for the year (1).	
	Aids setting of selling price (1).	
	Accept other valid points	
	Max (4) for comments plus (1) for decision.	

Question	Answer				Marks
2(a)	RF plc Statement of cash flows for the year ended 3 Profit from operations (15 + 4) Depreciation – plant and machinery – motor vehicles Profit on disposal of motor vehicle Increase in inventory Increase in trade receivables Decrease in trade payables Cash from operations Interest paid Net cash from operating activities Cash flow from investing activities Purchase of non-current assets Proceeds of sale of motor vehicle Net cash used in investing activities Cash flow from financing activities Proceeds from issue of shares Dividend paid Proceeds from new loan Net cash from financing activities Net increase in cash and cash equivalents Cash and cash equivalents on 31 December 2018 Cash and cash equivalents on 31 December 2019	1 Decem \$000 (38) <u>15</u> 36 (8) <u>5</u>	\$000 19 12 10 (3) (17) (3) <u>(6)</u> 12 <u>(5)</u> 7 (23) <u>33</u> 17 <u>(7)</u>	(1) (1) (1) (1) (1) (1)	19

Question	Answer	Marks
3(d)	Advantages	5
	Calculations would be done instantly, and time would be saved. (1)	
	Calculations would be accurate. (1)	
	Security could be organised (passwords etc.). (1)	
	Documents such as invoices could be produced automatically. (1)	
	Reports and accounts could be generated automatically. (1)	
	Accept other valid points	
	Disadvantages	
	It would require expenditure on hardware. (1)	
	It would require expenditure on software/other set up costs. (1)	
	The partners would have to take time to familiarise themselves with the system/training would be needed. (1)	
	The opening balances would have to be transferred to the new system. (1)	
	Accounts would have to be backed up. (1)	
	There could be inputting errors. (1)	
	Accept other valid points	
	Decision (1)	
	(1) mark for decision Max (2) marks for advantages Max (2) for disadvantages	

Question	Answer	Marks
4(a)	Trade receivables turnover = $\frac{1500}{7260}$ × 365 = 76 days (1)OF	8
	Trade payables turnover = $\frac{760}{4670}$ (1) × 365 = 60 days (1)OF	
	Inventory turnover = $\frac{1400}{4800}$ (1) × 365 = 107 days (1)OF	
	Working capital cycle = (107 + 76 – 60) ((1)OF all three) = 123 days (1)OF	

Question	Answer	Marks
4(b)	RP Limited's ratio is worse (1)OF	5
	Comparison is difficult without knowing the components of the average ratio (1).	
	The ratio indicates that the company may be holding too much inventory (1), which is possible given that items are held for more than three months (1).	
	The ratio indicates that the company may be giving too much credit to its customers (1) which is possible given that debtors are taking about two and a half months to pay (1).	
	The ratio indicates that the company is paying its suppliers too quickly (1) but this is not likely since it is taking on average two months to pay (1).	
	Accept other valid points.	
	Max 5 for comments.	
4(c)	The ratio assumes that all sales and purchases are on credit (1). However the proportion of total sales which are for cash is broadly similar to the proportion of total purchases which are for cash and so the effect is likely to be small (1).	2
	Accept other valid points.	
	Max 2	
4(d)	$\frac{1650 (1) + (1500 - 760) (1)}{(1140 + 7260) (1)} \times 100 = 28.45\% (1) \text{OF}$	4
4(e)	RP Limited's ratio is worse (1)OF.	3
	This suggests that the inventory held is higher than the industry average (1) and that trade receivables are also higher (1).	
4(f)	Cash discount should encourage credit customers to pay earlier (1) which would reduce the value of trade receivables (1) and assist the cash flow (1) and reduce both of the ratios (1). It might help avoid irrecoverable debts and so increase profit (1).	3
	However the cash received would be lower (1) and as an expense in the income statement it would tend to reduce profit (1).	
	Decision (1)	
	Max (2) for comments

Question	Answer	Marks
5(d)	Existing supplier will have a track record as to reliability. (1)	5
	New supplier may be less reliable leading to shortages if deliveries are not made on time. (1)	
	Lower quality materials may take more time to process or lead to more wastage. (1)	
	Lower quality materials may lead to lower quality finished goods. (1)	
	Lower quality may affect reputation. (1)	
	This might decrease sales or increase sales returns. (1)	
	Could a better deal be negotiated with the existing supplier for the existing quality of goods? (1)	
	A saving on materials will raise profit. (1)	
	Accept other valid points	
	(1) mark for decision plus (1) mark each for max four comments
