Paper 3 Structured Questions

October/November 2021

MARK SCHEME

Maximum Mark: 150

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2021 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of **16** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**Social Science-Specific Marking Principles
(for point-based marking)**

1 Components using point-based marking:

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require *n* reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

Question	Answer	Marks
1(c)	<p>The company is profitable/is making a profit. (1) The profit for the year seems quite low. (1) ROCE using opening capital is (28/440) 6.36%/using closing capital (28/910) 3.08%. (1)OF Substantial capital receipts were needed to clear the overdraft. (1) Dividends were considerably higher than profits. (1) The trend would appear to be towards negative retained earnings leading to no dividends at a future date. (1)</p> <p>Accept other valid points Comments Max 3 Decision (1) mark</p>	4
1(d)	<p>The debenture has increased gearing/risk for the company (1) but it still remains low. (1) The debenture must be repaid. (1) The interest must be paid (1) irrespective of the level of profit/unpaid interest could lead to liquidation. (1) The high bank balance at the year-end may indicate that the debenture was issued earlier than was necessary. (1) The interest on the debenture appears to be less than the dividend paid. (1) May require security/collateral. (1) Will avoid dilution of ownership. (1)</p> <p>Accept other valid points Max 5</p>	5

Question	Answer	Marks																		
2(a)	<p>The company had to: select a specific date for the transfer (1) ensure the data on the manual system is up to date (1) carry out control and verification procedures on the data from the manual system (1) set up passwords for the new system (1) ensure that there is adequate virus/firewall protection (1) physical location of equipment (1) set up the account names in the new system (1) enter the opening balances on the new system (1) run both manual and computerised systems in parallel (1) organise back up of data for the new system (1) discontinue the manual system once satisfied with the new system (1)</p> <p>Accept other valid points Max 8</p>	8																		
2(b)	<table border="1"> <thead> <tr> <th></th><th>\$</th><th>explanation</th></tr> </thead> <tbody> <tr> <td>1 training</td><td>4 500 decrease (1)</td><td>staff training should not be capitalised (1) and the full cost should be written off when incurred (1)</td></tr> <tr> <td>2 vehicles</td><td>2 000 increase (1)</td><td>the recoverable amount is the higher of value in use and fair value (1) and the impairment loss was only \$5 000 (1)</td></tr> <tr> <td>3 machinery</td><td>17 000 increase (1)</td><td>the recoverable amount is higher than the carrying amount (1) and so there is no impairment loss to account for (1)</td></tr> <tr> <td>4 inventory</td><td>8 000 increase (1)</td><td>the damage did not relate to a condition at the year end and is a non-adjusting event (1) which only needs to be disclosed in a note if material (1)</td></tr> <tr> <td>5 premises</td><td>Nil (1)</td><td>revaluation does not affect profit (1) as it is credited to a revaluation reserve (1)</td></tr> </tbody> </table> <p>Accept other valid points.</p>		\$	explanation	1 training	4 500 decrease (1)	staff training should not be capitalised (1) and the full cost should be written off when incurred (1)	2 vehicles	2 000 increase (1)	the recoverable amount is the higher of value in use and fair value (1) and the impairment loss was only \$5 000 (1)	3 machinery	17 000 increase (1)	the recoverable amount is higher than the carrying amount (1) and so there is no impairment loss to account for (1)	4 inventory	8 000 increase (1)	the damage did not relate to a condition at the year end and is a non-adjusting event (1) which only needs to be disclosed in a note if material (1)	5 premises	Nil (1)	revaluation does not affect profit (1) as it is credited to a revaluation reserve (1)	15
	\$	explanation																		
1 training	4 500 decrease (1)	staff training should not be capitalised (1) and the full cost should be written off when incurred (1)																		
2 vehicles	2 000 increase (1)	the recoverable amount is the higher of value in use and fair value (1) and the impairment loss was only \$5 000 (1)																		
3 machinery	17 000 increase (1)	the recoverable amount is higher than the carrying amount (1) and so there is no impairment loss to account for (1)																		
4 inventory	8 000 increase (1)	the damage did not relate to a condition at the year end and is a non-adjusting event (1) which only needs to be disclosed in a note if material (1)																		
5 premises	Nil (1)	revaluation does not affect profit (1) as it is credited to a revaluation reserve (1)

PUBLISHED

Question	Answer	Marks
6(d)	<p>The value for production cost is more realistic when it takes the level of activity into account (1). However the split of the selling and administrative costs is still arbitrary (1) as is the rate of mark-up (1) which does not take market conditions into account (1).</p> <p>As the small product seems to be selling well at \$24 there is no reason to drop the price (1). However the price for the large product could possibly be increased (1).</p> <p>If the prices of both products were changed as per part (b) then profit would fall. (1)OF</p> <p>The change in inventory value has only short term significance/is only relevant until the items are sold (1).</p> <p>The directors should undertake some market research (1) and consider what competitors are charging (1).</p> <p>It can be costly/time consuming to split overheads by activity (1).</p> <p>Accept other valid points Comments Max 4 Decision (1)</p>	5
