## Pearson

## Mark Scheme (Results)

January 2018

Pearson Edexcel International Advanced Level In Chemistry (WCH02) Paper 01 Applications Of Core Principles Of Chemistry

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

## Section A (multiple choice)

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :---: |
| $\mathbf{1}$ | The only correct answer is D | (1) |
|  | $\boldsymbol{A}$ is not correct because this is linear |  |
| $\boldsymbol{B}$ is not correct because this is trigonal planar |  |  |
| $\boldsymbol{C}$ is not correct because this is tetrahedral |  |  |

$\left.\begin{array}{|l|l|c|}\hline \begin{array}{l|l|}\text { Question } \\ \text { Number }\end{array} & \text { Correct Answer } & \text { Mark } \\ \hline \mathbf{2} & \text { The only correct answer is B } & \text { (1) } \\ & \boldsymbol{A} \text { is not correct because } 90^{\circ} \text { is not in methanol } \\ \boldsymbol{C} \text { is not correct because } 180^{\circ} \text { is not in methanol } & \\ & \boldsymbol{D} \text { is not correct because Neither bond angle in methanol }\end{array}\right]$

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{3 ( a )}$ | The only correct answer is C <br> A is not correct because all have boiling temperature <br> below water | (1) |
| B is not correct because all have boiling temperature <br> below water <br> $\boldsymbol{D}$ is not correct because all have boiling temperature <br> below water |  |  |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :---: |
| $\mathbf{3 ( b )}$ | The only correct answer is D <br> $\boldsymbol{A}$ is not correct because all have weaker hydrogen bonds <br> than hydrogen fluoride | (1) |
| B is not correct because all have weaker hydrogen bonds <br> than hydrogen fluoride | C is not correct because all have weaker hydrogen bonds <br> than hydrogen fluoride |  |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :---: |
| $\mathbf{4}$ | The only correct answer is D | (1) |
|  | $\boldsymbol{A}$ is not correct because both decrease |  |
|  | $\boldsymbol{B}$ is not correct because ionization energy decreases |  |
| $\boldsymbol{C}$ is not correct because solubility decreases |  |  |

$\left.\begin{array}{|l|l|l|}\hline \begin{array}{l}\text { Question } \\ \text { Number }\end{array} & \text { Correct Answer } & \text { Mark } \\ \hline \mathbf{5} & \text { The only correct answer is D } & \text { (1) } \\ & \boldsymbol{A} \text { is not correct because only Mg has correct colour } & \\ & \boldsymbol{B} \text { is not correct because no correct colours } \\ \boldsymbol{C} \text { is not correct because Mg and Ba have incorrect colour }\end{array}\right]$

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :---: |
| $\mathbf{6}$ | The only correct answer is B | (1) |
| A is not correct because are incorrect because all give <br> nitrogen dioxide | $\boldsymbol{C}$ is not correct because incorrect because all give <br> nitrogen dioxide | $\boldsymbol{D}$ is not correct because incorrect because all give <br> nitrogen dioxide |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{7}$ | The only correct answer is B <br> A is not correct because chlorine does not give a brown <br> solution in hexane | (1) |
| C is not correct because iodine is a grey/silver solid <br> $\boldsymbol{D}$ is not correct because it does not give a brown solution <br> in hexane |  |  |

$\left.\begin{array}{|l|l|c|}\hline \begin{array}{l}\text { Question } \\ \text { Number }\end{array} & \text { Correct Answer } & \text { Mark } \\ \hline \mathbf{8} & \text { The only correct answer is C } & \text { (1) } \\ & \boldsymbol{A} \text { is not correct because give other products } \\ \boldsymbol{B} \text { is not correct because give other products } \\ \boldsymbol{D} \text { is not correct because give other products }\end{array}\right]$

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{9}$ | The only correct answer is C | (1) |
|  | $\boldsymbol{A}$ is not correct because hydrogen sulfide is not formed |  |
|  | $\boldsymbol{B}$ is not correct because sulfur is not formed |  |
| $\boldsymbol{D}$ is not correct because this is not an reduction |  |  |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :---: |
| $\mathbf{1 0}$ | The only correct answer is D <br> A is not correct because all have lower mean <br> concentrations | (1) |
| $\boldsymbol{B}$ is not correct because all have lower mean <br> concentrations | $\boldsymbol{C}$ is not correct because all have lower mean <br> concentrations |  |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :---: |
| $\mathbf{1 1}$ | The only correct answer is A | (1) |
|  | $\boldsymbol{B}$ is not correct because ion-ion does not make a solution <br> $\boldsymbol{D}$ is not correct because there is only a dipole in water <br> in water |  |

$\left.\begin{array}{|l|l|c|}\hline \begin{array}{l}\text { Question } \\ \text { Number }\end{array} & \text { Correct Answer } & \text { Mark } \\ \hline \mathbf{1 2} & \text { The only correct answer is A } & \text { (1) } \\ & \boldsymbol{B} \text { is not correct because stream is diverted } \\ & \boldsymbol{C} \text { is not correct because it is insoluble } \\ \boldsymbol{D} \text { is is not correct because both statements are incorrect }\end{array}\right]$

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :---: |
| $\mathbf{1 3}$ | 13. The only correct answer is C | (1) |
|  | $\boldsymbol{A}$ is not correct because they are too few products |  |
|  | $\boldsymbol{B}$ is not correct because they are too few products |  |
| $\boldsymbol{D}$ is not correct because this is too many products |  |  |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 4}$ | The only correct answer is A | (1) |
|  | B is not correct because 2-methylpropan-2-ol does not <br> give this peak | $\boldsymbol{C}$ is not correct because 2-methylpropan-2-ol does not <br> give this peak |
| $\boldsymbol{D}$ is not correct because neither give this peak |  |  |$\quad$.

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :---: |
| $\mathbf{1 5}$ | The only correct answer is C | (1) |
|  | A is not correct because there is no OH absorption <br> B is not correct because there is no OH absorption <br> D is not correct because there is no C=O absorption |  |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :---: |
| $\mathbf{1 6}$ | The only correct answer is B <br> A is not correct because secondary alcohols oxidize to <br> ketones | (1) |
| $\boldsymbol{C}$ is not correct because secondary alcohols oxidize to <br> ketones | $\boldsymbol{D}$ is not correct because secondary alcohols oxidize to <br> ketones |  |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 7}$ | The only correct answer is C | (1) |
|  | $\boldsymbol{A}$ is not correct because both are oxidized <br> $\boldsymbol{B}$ is not correct because both are oxidized <br> sodium correct because ketones do not react with |  |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :---: |
| $\mathbf{1 8}$ | The only correct answer is D <br> $\boldsymbol{A}$ is not correct because it has carbon footprints in <br> production or delivery | $\mathbf{( 1 )}$ |
| B is not correct because it has carbon footprints in <br> production or delivery | $\boldsymbol{C}$ is not correct because it has carbon footprints in <br> production or delivery |  |

$\left.\begin{array}{|l|l|l|}\hline \begin{array}{l}\text { Question } \\ \text { Number }\end{array} & \text { Correct Answer } & \text { Mark } \\ \hline \mathbf{1 9} & \text { The only correct answer is A } & \text { (1) } \\ & \boldsymbol{B} \text { is not correct because it then goes paler } \\ \boldsymbol{C} \text { is not correct because it initially goes darker } \\ & \boldsymbol{D} \text { is not correct because it is the wrong way round }\end{array}\right]$

## Section B

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{2 0 ( a ) ( i i )}$ | $3 \mathrm{C}_{4} \mathrm{H}_{9} \mathrm{OH}+\mathrm{PI}_{3} \rightarrow 3 \mathrm{C}_{4} \mathrm{H}_{9} \mathrm{I}+\mathrm{H}_{3} \mathrm{PO}_{3}$ |  | (1) |
|  | ALLOW |  |  |
| $\mathrm{P}(\mathrm{OH})_{3}$ for $\mathrm{H}_{3} \mathrm{PO}_{3}$ |  |  |  |
| IGNORE state symbols, even if incorrect |  |  |  |$\quad .$|  |
| :--- |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| 20(a)(iii) | COMMENT |  | (2) |
|  | First check for four bonds. |  |  |
| Many will give two 2-iodobutane structures |  |  |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- | :---: |
| $\mathbf{2 0 ( b ) ( i )}$ | (Attacking reagent) water/H2O <br> IGNORE <br> Hydroxide/OH |  |  |
| (Type and mechanism) Nucleophilic substitution | (1) |  | (2) |
| ALLOW |  |  |  |
| these words in any order and anywhere |  |  |  |
| IGNORE <br> SN1 and SN2 | $(1)$ |  |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 0 ( b ) ( i i )}$ | $\mathrm{Ag}^{+}(\mathrm{aq})+\mathrm{I}^{-}(\mathrm{aq}) \rightarrow \mathrm{AgI}(\mathrm{s})$ | Any <br> other <br> additional <br> ions | (1) |
|  | ALLOW |  |  |
| "alc" or "ethanol" for "aq" |  |  |  |
| IGNORE |  |  |  |
| Charges on ions in product. |  |  |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 0 ( c )}$ | (1-)aminobutane/(1-)butylamine/C4H9 $\mathrm{NH}_{2}$ |  |  |
|  | ALLOW |  | (2) |
|  | 1- anywhere  <br> OR  <br> Butan(e)(-1-)amine  <br> OR Multisubstituted amines, e.g. $\left(\mathrm{C}_{4} \mathrm{H}_{9}\right)_{2} \mathrm{NH}$ <br> Ammonium iodide/ $\mathrm{NH}_{4} \mathrm{I}$  |  |  |
|  | IGNORE <br> Hydrogen iodide/HI <br> If both names and formulae are given, both <br> must be correct. |  |  |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 21(a) | M1 |  | (3) |
|  | Correct directions |  |  |
|  | The equilibrium will move to/favours the |  |  |
|  | right/forward when the temperature is increased and will be unchanged when the pressure is increased |  |  |
|  | M2 |  |  |
|  | Temperature: because the reaction is endothermic |  |  |
|  | OR |  |  |
|  | $\Delta H$ is positive |  |  |
|  | OR |  |  |
|  | Reverse reaction is exothermic $/ \Delta H$ is negative |  |  |
|  | M3 | ...volumes |  |
|  | Pressure: there are the same number of (gaseous) molecules/moles/particles on each side of the equation | ...alone |  |

| Question <br> Number | Correct Answer | Reject | Mark |  |
| :--- | :--- | ---: | :--- | :--- |
| $\mathbf{2 1 ( b ) ( i )}$ | Nitrogen from -3 to +2 | $(1)$ |  | (2) |
|  | Oxygen from 0 to -2 | (1) |  |  |
|  | Elements can be named in either order but <br> numbers must be correct for the element |  |  |  |
|  | ALLOW signs on the right side |  |  |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 1 ( b ) ( i i ) ~}$ | Increasing temperature increases the <br> proportion/number of molecules/particles <br> (colliding) with energy greater than the <br> activation energy/E. | (1) |  |
| OR <br> Area under the Maxwell Boltzmann graph to the <br> right of activation energy/E $\mathbf{a}$ increases <br> IGNORE <br> High temperature results in more (effective) <br> collisions |  |  |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{2 1 ( b ) ( i i i ) ~}$ | A catalyst reduces the activation energy (so a <br> greater proportion of molecules have sufficient <br> energy to react.) <br> ALLOW <br> In the graph the activation energy moves to <br> the left <br> IGNORE <br> reference <br> to energy <br> increasing | (1) |  |
| More collisions between particles / frequency <br> of collisions increases |  |  |  |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 21(c)(i) | M1 <br> A nitrogen monoxide molecule changes its dipole moment as it vibrates / vibrating dipole <br> ALLOW <br> NO is polar/contains polar bonds <br> Then any two of M2, M3 or M4 <br> M2 <br> NO allows through higher energy/frequency OR longer wavelength, radiation (from the sun) <br> OR <br> M3 <br> NO absorbs (reflected) (longer <br> wavelength/higher frequency) IR <br> OR <br> M4 <br> NO re-emits/reflects IR/heat/radiation back to earth <br> OR <br> traps IR/heat/radiation <br> IGNORE <br> NO reacts with the ozone layer or any reference to the ozone layer | ...IR from sun loses M3 only | (3) |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 21(c)(ii) | $\begin{align*} & \mathrm{NO} \cdot+\mathrm{O}_{3} \rightarrow \mathrm{NO}_{2} \cdot+\mathrm{O}_{2}  \tag{1}\\ & \mathrm{NO}_{2} \cdot+\mathrm{O}_{3} \rightarrow \mathrm{NO}+2 \mathrm{~N}_{2} \tag{1} \end{align*}$ <br> Omitting all dots 1 max of first two marks <br> BUT ALLOW if one dot shown on both NO and $\mathrm{NO}_{2}$ in either equation $\begin{equation*} 2 \mathrm{O}_{3} \rightarrow 3 \mathrm{O}_{2} \tag{1} \end{equation*}$ <br> IGNORE state symbols, even if incorrect |  | (3) |

(Total for Question 21 = 13 marks)

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 2 ( a ) ( i )}$ | $3 \mathrm{I}_{2}+6 \mathrm{KOH} \rightarrow \mathrm{KIO}_{3}+5 \mathrm{KI}+3 \mathrm{H}_{2} \mathrm{O}$ <br> Balancing numbers as shown, 3 and 5 <br> for iodine <br> Balancing for oxygen and hydrogen, 6 KOH and <br> $3 \mathrm{H}_{2} \mathrm{O}$ <br> ALLOW <br> multiples <br> IGNORE <br> state symbols, even if incorrect | (2) |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{2 2 ( a ) ( i i ) ~}$ | Disproportionation (reaction) | Disproportion(al) <br> alone | $\mathbf{( 1 )}$ |
|  | IGNORE |  |  |
| redox |  |  |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| 22(b) | The mixture turns (pale) yellow/brown | Fizzing | (1) |
| Dark brown <br> /red-brown/ <br> grey/grey solid/ <br> purple vapour/ <br> precipitate/ any <br> solid |  |  |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 2 ( c )}$ | (Both salts are soluble in hot water.) <br> Potassium iodate(V) is (much) less soluble <br> (than potassium iodide in cold water). <br> ALLOW <br> Potassium iodate is not soluble (in cold <br> water) | (1) |  |
| OR |  |  |  |
| Potassium iodide is (more) soluble |  |  |  |
| OR |  |  |  |
| Solubility difference between potassium <br> iodate and potassium iodide |  |  |  |

$\left.\begin{array}{|l|l|l|l|}\hline \begin{array}{l}\text { Question } \\ \text { Number }\end{array} & \text { Correct Answer } & \text { Reject } & \text { Mark } \\ \hline \text { 22(d)(i) } & \begin{array}{ll}\text { Second mark depends on the first mark } \\ \text { (Freshly prepared) starch (solution) (1) }\end{array} & \text { (2) } \\ & \begin{array}{l}\text { Added when (solution is) pale yellow/straw } \\ \text { coloured } \\ \text { OR }\end{array} & \begin{array}{l}\text { Added when solution is pale } \\ \text { ALLOW } \\ \text { Added just before/ near } \\ \text { the end-point/ end of reaction/ titration/ } \\ \text { experiment }\end{array} & \begin{array}{l}\text { At the } \\ \text { end-point } \\ \text { etc }\end{array}\end{array}\right\}$

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :---: |
| 22(d)(ii) | blue/black to colourless | ...to clear | (1) |

## ALLOW TE from d (iii) to (iv), to (v), to (vi)

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- | :--- |
| $\mathbf{2 2 ( d ) ( i i i )}$ | $\frac{27.45 \times 0.010}{1000}=2.745 \times 10^{-4}(\mathrm{~mol})$ |  | $\mathbf{( 1 )}$ |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 2 ( d ) ( i v ) ~}$ | $\frac{2.745 \times 10^{-4}}{6}=4.575 \times 10^{-5}$ |  |  |
| COMMENT <br> Multiplying by 6 gives $1.647 \times 10^{-3}$ |  | $\mathbf{( 1 )}$ |  |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 22(d)(v) | Correct answer (with or without working) (3) <br> Molar mass $\mathrm{KIO}_{3}=214.0 \mathrm{~g} \mathrm{~mol}^{-1}$ $4.575 \times 10^{-5} \times \underset{(1)}{10} \times 214=\underset{(1)}{0.0979(05)(\mathrm{g}) / 97.9 \mathrm{mg}}$ <br> IGNORE SF except 1SF <br> TE from $x 6$ in (iv) gives 3.5246 ( g ) <br> Internal TE if oxygen omitted from molar mass giving 166, gives 0.075945, scores 2 marks AND <br> Failure to multiply by 10 gives $0.00979(05)$ |  | (3) |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 2 ( d ) ( v i ) ~}$ | $\frac{0.0979(05) \times 100}{0.10}$Expression <br> 2 SF <br> Example TE <br>  <br>  <br>  <br> 166 gives $76 \%$ <br> Failure to multiply by 10 gives 9.8\% <br> If expression is reversed or incorrect in any other <br> way, give 1 max for their correct answer to 2 SF. <br> Comment <br> Percentages greater than 100 are allowed for 2 <br> marks | (2) |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :---: |
| 22(d)(vii) | Potassium iodate may contain potassium <br> iodide/ water | Potassium <br> hydroxide | (1) |
|  | ALLOW |  |  |
|  | Absorption of water / hydrated (crystals) |  |  |
| Iodine |  |  |  |
| IGNORE |  |  |  |
| Impurities/transfer errors |  |  |  |

(Total for Question 22 = 16 marks)
(Total for Section B = 41 marks)

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| *23(a)(i) | Mark independently |  | (6) |
|  | M1 |  |  |
|  | London/dispersion/van der Waals forces |  |  |
|  | OR |  |  |
|  | Instantaneous/temporary dipole induced dipole forces |  |  |
|  | M2 |  |  |
|  | all atoms | Between |  |
|  | OR |  |  |
|  | C and H atoms / C and C atoms / H and H atoms OR |  |  |
|  | non-polar parts of the molecule (1) |  |  |
|  | M3 |  |  |
|  | Permanent dipole (permanent) dipole forces |  |  |
|  | M4 | $\mathrm{C}-\mathrm{H}$ is polar |  |
|  | Between $\mathrm{C}^{\left(\delta^{+}\right)}$and $\mathrm{O}^{(\delta-)} / \mathrm{H}^{(\delta+)}$ and $\mathrm{O}^{(\delta-)}$ (atoms) |  |  |
|  | OR |  |  |
|  | Between C-O bonds OR |  |  |
|  | Between O-H bonds |  |  |
|  | OR |  |  |
|  | CO bond / C-O is polar |  |  |
|  | OR |  |  |
|  | OH bond / O-H is polar |  |  |
|  | M5 |  |  |
|  | Hydrogen bonds (1) |  |  |
|  | M6 |  |  |
|  | Between hydrogen of $\mathrm{OH} / \mathrm{H}^{\delta+}$ and another oxygen |  |  |
|  | OR |  |  |
|  | Between OH groups |  |  |
|  | OR <br> Because hydrogen is bonded to very |  |  |
|  | electronegative element / is bonded to oxygen <br> (1) | OH <br> molecules/a toms |  |
|  | If confusion between intermolecular and intramolecular bonds award 5 max, so two points 1 mark, three points two marks etc. |  |  |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 23(a)(ii) | Any two of the following <br> M1 <br> Glucose/it forms hydrogen bonds with water (molecules) <br> M2 <br> The large number of $\mathrm{O}-\mathrm{H}$ groups / hydroxy (I) groups <br> OR <br> large number of hydrogen bonds (with water) <br> ALLOW <br> several/five/any number greater than five <br> /many for 'large' number <br> M3 <br> Energy arguments like: <br> Energy released by forming new hydrogen bonds makes up for energy used in breaking hydrogen bonds in water and/or glucose (1) <br> IGNORE <br> glucose forms London forces with water | ...hydroxide <br> Glucose is non-polar | (2) |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{2 3 ( b )}$ | $\left(\mathrm{C}_{6} \mathrm{H}_{12} \mathrm{O}_{6} \rightarrow\right) 2 \mathrm{C}_{2} \mathrm{H}_{5} \mathrm{OH}+2 \mathrm{CO}_{2}$ |  | (1) |
|  | ALLOW |  |  |
|  | Multiples |  |  |
|  | OR |  |  |
|  | $\mathrm{C}_{2} \mathrm{H}_{6} \mathrm{O}$ for ethanol |  |  |
| IGNORE state symbols, even if incorrect |  |  |  |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 23(c) | Any two from: |  | (2) |
|  | Taxation of alcohol is acceptable to the public (as they can choose whether or not to drink alcohol) |  |  |
|  | (1) |  |  |
|  | (Expense may) reduce alcohol abuse (1) |  |  |
|  | (Expense may) reduce alcohol use/consumption |  |  |
|  | Raises money for the government (1) |  |  |
|  | Tax can be used to pay for treatment for alcohol related diseases |  |  |
|  | Alcohol is harmful/causes disease/disorders (1) |  |  |
|  | Reduces road accidents (1) |  |  |
|  | Detailed argument leading to less global warming |  |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 3 ( d ) ( i )}$ | $\frac{100 \times 100}{57.15}=174.9781=175^{(0)}$ |  | $\mathbf{( 1 )}$ |
|  | Ignore SF except 1 or 2 |  |  |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 23(d)(ii) | Correct answer with or without working 9.8(02) <br> Ignore SF unless 1SF, Ignore units unless incorrect 3 marks <br> Otherwise any two in any order from: <br> M1 <br> Mass of ethanol $=57.15 \times 0.789(=45.09)(\mathrm{g})$ <br> M2 <br> Number of moles of ethanol $=\frac{57.15 \times 0.789}{46}$ $=(0.98025)$ <br> ALLOW <br> any number divided by 46 <br> M3 $\begin{aligned} \text { Concentration of ethanol } & =\frac{57.15 \times 0.789 \times 1000}{46 \times 100} \\ & =9.8(025)\left(\mathrm{mol} \mathrm{dm}^{-3}\right) \end{aligned}$ <br> ALLOW <br> Multiplication of any number by 10 |  | (3) |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 3 ( e )}$ | Potassium nitrate is (very) soluble in <br> water/dissolves in water. | OR <br> ORe potassium nitrate does not dissolve if there is a <br> low enough concentration of water that the powder <br> still ignites. | OR <br> The alcohol burns giving out sufficient heat to drive <br> of a limited amount of water. |
| ALLOW <br> Any reference to the need to keep gunpowder dry |  |  |  |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 23(f) | $2 \mathrm{KNO}_{3}(\mathrm{~s})+\mathrm{S}(\mathrm{~s})+3 \mathrm{C}(\mathrm{~s}) \rightarrow \mathrm{K}_{2} \mathrm{~S}+\mathrm{N}_{2}(\mathrm{~g})+3 \mathrm{CO}_{2}(\mathrm{~g})$ <br> ALLOW <br> Multiples |  | (1) |
| Question Number | Correct Answer | Reject | Mark |
| 23(g) | $\mathrm{C}_{2} \mathrm{H}_{4}(\mathrm{~g})+\mathrm{H}_{2} \mathrm{O}(\mathrm{~g}) \rightarrow \mathrm{C}_{2} \mathrm{H}_{5} \mathrm{OH}(\mathrm{aq})$ <br> ALLOW <br> No states, or any states except solid <br> Conditions (which may be over the arrow in the equation) - any one from: <br> High temperature / any specified temperature above $25^{\circ} \mathrm{C}$ / heat <br> High pressure / pressure greater than 1 atmosphere <br> Catalyst / a specified catalytic substance eg Pt / Ni / sulfuric acid (phosphoric acid is used normally) <br> Mark independently | Reflux | (2) |

(Total for Section C = 19 marks) (Total for Paper = 80 marks)
