

## Cambridge IGCSE<sup>™</sup> (9–1)

#### INFORMATION AND COMMUNICATION TECHNOLOGY

Paper 1 Theory MARK SCHEME Maximum Mark: 100 0983/01 For examination from 2020

Specimen

This document has 10 pages. Blank pages are indicated.

#### **Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always whole marks (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit
  is given for valid answers which go beyond the scope of the syllabus and mark scheme,
  referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer	Marks
1(a)	Laser printer Buzzer	2
1(b)	DVD RAM Blu-ray disc	2

Question		Answer			
2		abnormal (✓)	normal (✓)	extreme (✓)	
	0			~	
	45		$\checkmark$		
	100			✓	
	110	$\checkmark$			

Question	Ai	nswer			Marks
3(a)		Content layer (✓)	Presentation layer (✓)	Behaviour layer (✓)	4
	This layer is used to format elements within a web page.		~		
	This layer is used to create the structure of a web page.	~			
	This layer is used to enter scripting language to elements within a web page.			✓	
	This layer is defined by cascading style sheets.		$\checkmark$		
3(b)	<b>Two</b> from Request made by entering a web add Retrieves code from the server/resou Interprets the code as a web page/us The web page is <u>displayed</u> /renders p	rces downles page res	oaded sources to build	the web page	2
3(c)	HTTP Two from Hypertext Transfer Protocol A method of accessing data over the Sets the rules of formatting and trans Used by the World Wide Web		ssages		4
	ISP Two from Internet Service Provider Allows users to access the internet Provides services such as domain na	ime registra	ation and web ho	sting	

Question	Answer	Marks
4(a)	Four from, for example Purpose of the system/program Limitations of the system Program listing Program language Program flowcharts/algorithms System flowcharts Hardware requirements Software requirements File structures List of variables Input format Output format Sample runs/test runs Validation routines	4
4(b)	Two from Purpose of the system Limitations of the system Hardware and software requirements How to load/run/install software How to save a file How to save a file How to print data How to add records How to delete/edit records Input format Output format Sample runs Error messages Error handling Troubleshooting guide/helpline Frequently asked questions Glossary of terms	2

Question	Answer	Marks
5(a)	Four from Camera takes an image of the number plate/(front of the) vehicle Saves the image Software determines where on the image the number plate is Converts the image to text Conversion uses OCR/optical character recognition Saves/stores the text Compares the text with data saved in the database Confirms the driver is visiting the company	4

### Cambridge IGCSE (9–1) – Mankwerke chyenamic paperse comation SPECIMEN from 2020

Question	Answer	Marks
5(b)	Six from Comparisons	6
	Both are direct data entry systems Both are used to communicate with the reader	
	Contrasts Max five from	
	RFID chips can be read from a greater distance/bar codes need to be closer to the reader	
	Bar codes need to be in line of sight with the reader/RFID chips do not need to be	
	RFID chips can be uploaded easier/bar codes require a brand new code RFID chips read at a faster rate	
	RFID chips are more useable/more robust RFID chips are more secure	

Question	Answer	Marks
6(a)(i)	Department One from Length check Type check	1
6(a)(ii)	Date_of_birth One from Length check Format check	1
6(a)(iii)	Year_left One from Length check Range check Type check	1
6(b)	<b>Two</b> from The field would not be used for calculations There is a leading zero in the data Text fields take up less space than numeric fields	2
6(c)	Award <b>one</b> mark for four field names given Award <b>one</b> mark for the <u>other</u> two field names Appropriate alternative names can be used Max <b>six</b> from Data fill the screen and it looks like an online form Use of navigation buttons Use of drop down lists for year_left or department Use of text/character boxes The name fields are larger than the year_left, date_of_birth and department Use of a calendar for date_of_birth Use of submit/help buttons Appropriate title	8

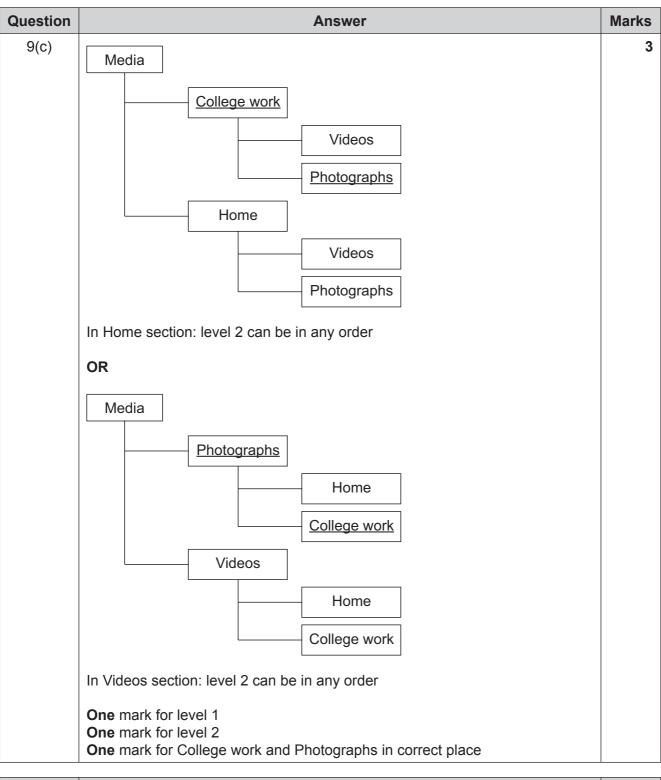

#### Cambridge IGCSE (9–1) – Makkworkedyenamicpaperseconnation SPECIMEN from 2020

Question	Answer	Marks
7	Four from Monitors and controls incoming and outgoing data traffic Helps to prevent malware being downloaded Prevents computer accessing undesirable/unauthorised sites Prevents unauthorised users accessing the computer Keeps a list of undesirable sites/IP addresses Keeps a list of acceptable sites/IP addresses Warns you of threats Allows you to accept/reject downloaded programs	4

Question	Answer	Marks
8(a)	Max five from         Benefits         Can call meetings at short notice         Employees save time travelling         No hotel expenses         Safer as participants do not have to travel         No need to transport/carry equipment/lots of documents         No risk of losing documents in transit         Max five from         Drawbacks         Takes time/costs money to learn new technology/to be trained         Difficult to have international meetings because of time differences         Initial cost of hardware (and software)         Equipment can break down/power cuts can stop conference         Poor strength of signal/time lag/lip sync can be a problem/connection can be         lost         Loss of personal/social contact         Legal documents cannot be signed         A mark can be awarded for a reasoned conclusion	8
8(b)	Three from Router Web cam Microphone Network card Speakers Large monitor/data projector Codecs	3

Question	Answer	Marks
9(a)	Сгор	1
9(b)	Two from Clicked on the image/selected the image Select format (menu) Click on crop (button) Removed the unwanted elements	2

#### Cambridge IGCSE (9–1) – Mawwww.edyenamicpaperseconnation SPECIMEN from 2020

Question	Answer	Marks
10(a)	HLOOKUP(B4, D1:K2,2)	3
	The formula looks for the value in B4 Searches for it in the range/table array (D1:K2) Then displays the corresponding result From row two/second row of the range	

## Cambridge IGCSE (9–1) – Makkwork adjenamicpaperse commation SPECIMEN from 2020

Question	Answer	Marks
10(b)	Max <b>two</b> from \$ signs missed out from the table array/D1:K2 When the formula was replicated the table array cell references are changed \$ signs lock the range	3
	<b>One</b> from He could highlight the table array and name the range	

Question	Answer	Marks
11	Four advantages from	4
	GUI allows the use of pinching, scrolling and expanding but CLI does not allow this Icons speed up finding instructions, with CLI you have to type out the commands in full GUI is more visual therefore finding commands is quicker If a mistake is made in CLI it could have major consequences whereas in GUI a mistake has less impact GUI allows more multi-tasking GUI is faster to operate and more efficient as it uses a finger/stylus rather than a keyboard GUI is more user friendly; with CLI the commands have to be memorised In CLI several commands have to be typed in rather than one command in GUI GUI has more system resources Easier to remote access with GUI Fewer health problems eye strain, carpal tunnel syndrome	

Question	Answer	Marks
12(a)	Six from Some workers may job-share with other workers this means that two workers share the same job one starting as the other finishes Some workers may work compressed hours this means working a five-day week but compressed to four days Some workers may work flexible hours the worker and the employer negotiate a time the employee works this means the employee can arrive later/leave later as long as they work the set number of hours Workers can change their work pattern to meet domestic chores/avoid rush hour Some workers can work from home	6

Question	Answer	Marks
12(b)	Looking at a monitor for a long period of time	6
	Health problem	
	One from	
	Eye strain/headache/dry eyes/eye problems	
	Possible solution	
	Two from	
	Resting the eyes by looking in the distance/taking regular breaks	
	Cutting down on glare Making sure the screen is at eye level	
	Using blue screen technology	
	Using flat screen technology	
	Using (blue) glasses	
	Using anti-flicker screen	
	Reducing the brightness of the screen	
	Sitting too close to the office laser printer	
	Health problem	
	One from	
	Ozone irritation/dry skin/respiratory problems	
	Possible solution	
	Two from	
	Proper room ventilation/use of fans	
	Laser printers should be housed in a dedicated printer room	
	Changing to other forms of printer	

Question	Answer	Marks
13	Award <b>one</b> mark for <i>Visual verification</i> Visually comparing typed in data with original source	4
	Award <b>one</b> mark for <i>Double data entry</i> Computer compares two versions of the typed in data	
	<b>Two</b> from To check that data has been entered/copied accurately To check to ensure accurate data entry Validation may not pick up that although the data is acceptable it may still be incorrect	

# Cambridge IGCSE (9–1) – Man Work control and the second ation SPECIMEN from 2020

Question	Answer	Marks
14	Advantages Max four from More secure MICR characters cannot be read electronically after being photocopied MICR characters are difficult to forge Can be read even if the writing is written on/paper folded More accurate in reading Data is read faster Characters cannot be changed once printed <b>Disadvantages</b> Max four from Requires a specialist reader which are expensive More expensive to produce the writing Limited number of characters Cannot be read by standard smartphones One mark available for a reasoned conclusion	6
