Paper 1: Written paper

Thursday 6 June 2013 – Morning
Time: 1 hour 30 minutes

Paper Reference

4IT0/01

You do not need any other materials.

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
– *there may be more space than you need.*

Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

BLANK PAGE

SECTION A

Answer ALL questions.

For each question, choose an answer A, B, C or D and put a cross in the box ☒.
Mark only one answer for each question. If you change your mind about an answer,
put a line through the box ☒ and then mark your new answer with a cross ☒.

1 Which **one** of these devices can be used for both data input and output?

- A Tracker ball
- B Touch screen
- C Mouse
- D Speaker

(Total for Question 1 = 1 mark)

2 The software needed to send an email is:

- A presentation software
- B web authoring software
- C communication software
- D graphics software

(Total for Question 2 = 1 mark)

3 Which **one** of these can be used to produce a hard copy of a drawing?

- A Monitor
- B Data projector
- C Scanner
- D Plotter

(Total for Question 3 = 1 mark)

4 The type of software that controls the hardware and prepares it to run other software is the:

- A operating system
- B applications software
- C processing software
- D control system

(Total for Question 4 = 1 mark)

5 Which **one** of these statements is accurate?

- A One kilobyte (Kb) is 1024 bytes
- B One kilobyte (Kb) is 1024 megabytes
- C One terabyte (Tb) is 1024 megabytes
- D One gigabyte (Gb) is 1024 bytes

(Total for Question 5 = 1 mark)

6 Documents can be saved on a PC's hard disk.

A hard disk is a type of:

- A secondary storage
- B primary storage
- C processor
- D output device

(Total for Question 6 = 1 mark)

7 A student plays computer games.

He has a high resolution monitor.

Which **one** of these would enhance the quality of the screen images?

- A A high quality printer
- B A high capacity hard disk
- C A high speed graphics card
- D A high quality speaker

(Total for Question 7 = 1 mark)

8 Which **one** of these **best** describes an intranet?

A network of computers accessible by:

- A people living in a small geographical area
- B customers of a single organisation
- C people living in a wide geographical area
- D employees of a single organisation

(Total for Question 8 = 1 mark)

- 9 A supermarket uses a computer model to predict the number of checkouts to open at various times.

The software used for this is:

- A spreadsheet software
- B database software
- C CAD software
- D presentation software

(Total for Question 9 = 1 mark)

- 10 A network manager prevents users accessing certain websites.

She does this by setting up:

- A a firewall
- B an internet filter
- C an email filter
- D access rights

(Total for Question 10 = 1 mark)

- 11 A multinational bank keeps details of customer accounts on a computer.

Bank staff and customers can access the accounts.

The type of computer the bank uses is a:

- A tablet
- B standalone
- C PC
- D mainframe

(Total for Question 11 = 1 mark)

12 A PC has both ROM and RAM.

Identify the row in the table which has the correct information.

| | | ROM | RAM |
|--------------------------|----------|---|---|
| <input type="checkbox"/> | A | Loses stored data when the computer is turned off | Can be read from but not written to |
| <input type="checkbox"/> | B | Can be written to and read from | Loses stored data when the computer is turned off |
| <input type="checkbox"/> | C | Can be written to and read from | Can be written to and read from |
| <input type="checkbox"/> | D | Can be read from but not written to | Loses stored data when the computer is turned off |

(Total for Question 12 = 1 mark)

13 Computer Aided Manufacturing (CAM) is widely used in industry.

One benefit of CAM is that:

- A** items produced are of a consistent standard
- B** items produced are always cheaper
- C** the machinery requires no monitoring
- D** the machinery is inexpensive

(Total for Question 13 = 1 mark)

14 An organisation uses a Virtual Private Network (VPN) to link two offices.

The security of data sent through the VPN link is maintained by:

- A** encoding
- B** encryption
- C** password protection
- D** protocol

(Total for Question 14 = 1 mark)

15 A teacher stores test results in a database.

The teacher wants a list of boys and girls who scored at least 50 on a test.

Which **one** of these search criteria would create the list?

- A** GENDER = 'boys' AND GENDER = 'girls' AND SCORE \geq 50
- B** GENDER = 'boys' OR GENDER = 'girls' AND SCORE $>$ 50
- C** GENDER = 'boys' OR GENDER = 'girls' AND SCORE \geq 50
- D** GENDER = 'boys' OR GENDER = 'girls' OR SCORE $>$ 50

(Total for Question 15 = 1 mark)

16 Many companies provide employees with portable digital devices, such as Personal Digital Assistants (PDAs).

A PDA will help:

- A** employees to keep personal data more secure
- B** to reduce the need to store large amounts of data
- C** employees to keep company data more secure
- D** to improve communications between employees and the company

(Total for Question 16 = 1 mark)

TOTAL FOR SECTION A = 16 MARKS

SECTION B

Answer ALL questions. Write your answers in the spaces provided.

17 Sarbir uses a PC for a range of administrative tasks.

(a) He wants to produce a letter.

(i) Identify the most appropriate **type** of software to use.

(1)

(ii) Identify **one** input device that Sarbir could use.

(1)

(iii) Identify **one** output device that Sarbir could use.

(1)

(b) Sarbir uses a USB pen drive to save a copy of the letter.

(i) Identify the type of memory used in the pen drive.

(1)

(ii) Give **two** benefits of using a USB pen drive to store data.

(2)

1

2

(iii) Give **one** drawback of using a USB pen drive to store data.

(1)

.....

(c) Sarbir has been advised to make a backup of the documents folder that is on his PC.

(i) Give **two** reasons for this advice.

(2)

1

2

(ii) One decision that Sarbir should make when creating a backup is which software to use.

Identify **three** other decisions he should make.

18 A large supermarket has several EPOS (Electronic Point of Sale) terminals linked to a computer.

(a) Each product for sale has a bar code on it. The bar code is made up of a pattern of bars.

(i) Identify the type of device used to input data from the bar code. (1)

(ii) Identify what the pattern of bars represents. (1)

(iii) Give **two** benefits to the **customer** when bar codes are used at the checkout. (2)

1

2

(iv) The data is input at the checkout, processed and the item is added to the sale.

Complete the table, with the numbers 2–5, to give the correct order of steps in the process.

(3)

| Steps | Order |
|------------------------------|-------|
| Bar code input | 1 |
| Price identified | |
| Item found | |
| Price displayed | |
| Information sent to database | |
| Item added to sale | 6 |

(b) Supermarket customers can pay for their goods using bank cards.

(i) Identify the additional hardware that is needed at the checkout to process their payments.

(1)

(ii) Electronic data on a bank card can be stored on a microchip or a magnetic stripe.

(Source: Visa Europe Services Inc.)

Describe **two** reasons why storing data on a microchip is preferable to storing data on a magnetic stripe.

19 A small company based on a single site needs to update its current ICT provision.

The company has employed a consultant to help:

- plan the project
- decide on the most appropriate system to buy
- implement the new system.

(a) The consultant uses software to plan and track the steps necessary to complete the project on time.

(i) Identify the most appropriate **type** of software to use. (1)

(ii) Give **two** pieces of information that would be shown in the plan. (2)

1

2

(b) The consultant recommends that the company installs a network on its site.

Name this type of network. (1)

(c) Hardware costs are an important consideration when setting up a network.

Hardware costs can be reduced by using terminals, which are usually cheaper than PCs.

(i) Identify **one** other way of reducing hardware costs. (1)

(ii) Additional hardware is needed for a network.

Identify **one** additional item of hardware that is required. (1)

(d) The company must decide on the most appropriate type of printers to buy.

The consultant suggests that the company buys a laser printer and an inkjet printer.

For each type of printer give:

- a brief description of how it produces a printout
- **one** benefit to the company
- **one** drawback for the company.

(6)
