# Geography

**Unit: KGE0 4GE0**

**Paper: 01**

Tuesday 24 May 2016 – Afternoon

**Time: 3 hours**

Paper Reference

**KGE0/01**  
**4GE0/01**

**You must have:**

Ruler, pencil and pen

Total Marks

## Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **seven** questions
  - Answer **two** questions in Section A
  - Answer **two** questions in Section B
  - Answer **two** questions in Section C – **either** Question 7 **or** 8 **AND either** Question 9 **or** 10
  - Answer **one** question in Section D.
- Answer the questions in the spaces provided  
 – *there may be more space than you need.*

## Information

- The total mark for this paper is **180**.
- The marks for **each** question are shown in brackets  
 – *use this as a guide as to how much time to spend on each question.*
- The following abbreviations are used:
  - LIC – Low-income country
  - HIC – High-income country
  - NIC – Newly-industrialised country
  - CBD – Central Business District.

## Advice

- Write your answers neatly and in good English.
- Check your answers if you have time at the end.

**PEARSON**

## SECTION A – THE NATURAL ENVIRONMENT AND PEOPLE

Answer TWO questions only from this section.

Indicate which question you are answering by marking a cross ☐. If you change your mind, put a line through the box ☐ and then indicate your new question with a cross ☐.

If you answer Question 1 put a cross ☐.

## 1 River environments

(a) Study Figure 1 which shows storm hydrographs for rivers A and B.

Figure 1

(i) What was the lag time for river A?

(1)

(ii) Identify **one** way in which rivers A and B differ in terms of:

(2)

lag time

peak discharge

(iii) Which **one** of the following is the main factor in producing the shape of the hydrograph for river B?

(1)

- ☐ **A** a dam
- ☐ **B** impermeable rock
- ☐ **C** snowmelt
- ☐ **D** urban land use

(b) (i) What is meant by the term **river flooding**?

(2)

.....

.....

.....

.....

(ii) Outline **two** causes of river flooding.

(4)

1 .....

.....

.....

.....

.....

2 .....

.....

.....

.....

.....

(c) Explain the formation of landforms in the upper course of a river.

Annotated diagrams may help your answer.

(6)

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(d) Discuss the different ways in which water supplies are being managed to meet rising demands.

(9)

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

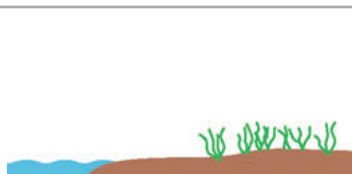

(Total for Question 1 = 25 marks)

If you answer Question 2 put a cross in the box ☐.

## 2 Coastal environments

- (a) Study Figure 2 which shows options for the management of a stretch of retreating coastline.

Method	Cost per metre	
Hard engineering methods		
	Rock armour	£1250 plus £10 per year maintenance
	Sea wall	£3000 plus £120 per year maintenance
Soft engineering methods		
	Beach replenishment	£80 plus £50 per year maintenance
	Planting on mudflats to create salt marshes	£200 plus £20 per year maintenance

**Figure 2**

- (i) Which method has the highest total cost per metre? (1)

- (ii) Which **one** of the following is the purpose of hard engineering along a retreating coastline? (1)

- ☐ **A** To advance the coastline
- ☐ **B** To hold the coastline
- ☐ **C** To allow the coastline to retreat
- ☐ **D** To improve the coastline's appearance

(iii) Identify **one** difference between hard and soft engineering in terms of:

(2)

cost

environmental impact

(b) The coast is a natural system.

(i) What is meant by the term **natural system**?

(2)

(ii) Outline **two** physical processes that affect the coast.

(4)

1

2

(c) Explain the threats to **one** named coastal ecosystem.

(6)

Name of coastal ecosystem .....

DO NOT WRITE IN THIS AREA

(Total for Question 2 = 25 marks)

If you answer Question 3 put a cross in the box ☐.

### 3 Hazardous environments

(a) Study Figure 3 which shows how weather varies across a hurricane.

**Figure 3**

(i) Identify the area of lowest pressure.

(1)

(ii) Which **one** of the following is the greatest hazard to people during the passage of a hurricane?

(1)

- ☐ **A** high pressure
- ☐ **B** high wind
- ☐ **C** low visibility
- ☐ **D** low rainfall

(iii) Identify **one** way in which the following features change with pressure:

(2)

visibility

rainfall and wind speed

(b) (i) What is meant by the term **earthquake**?

(2)

(ii) Outline **two** ways in which earthquake damage can be mitigated.

(4)

1 .....

2 .....

(c) Explain the causes of volcanoes.

(6)

## SECTION B – PEOPLE AND THEIR ENVIRONMENTS

Answer TWO questions only from this section.

If you answer Question 4 put a cross in the box ☐.

## 4 Economic activity and energy

(a) Study Figure 4 which shows a high-tech industrial estate and its surrounding area.

Figure 4

(i) Which **one** of the following businesses would you be most likely to find in an area of high-tech industry?

(1)

- ☐ A supermarket
- ☐ B biotechnology firm
- ☐ C builder's merchant
- ☐ D biscuit factory

(ii) Suggest **three** reasons why this location was chosen for a high-tech industrial estate.

(3)

- 1 .....
- 2 .....
- 3 .....

(b) (i) What is meant by the term **de-industrialisation**?

(2)

- .....
- .....
- .....
- .....

(ii) Outline **two** causes of de-industrialisation.

(4)

- 1 .....
- .....
- .....
- .....
- .....

If you answer Question 6 put a cross in the box ☐.

## 6 Urban environments

- (a) Study Figure 6 which shows the regeneration zone around Battersea power station in central London.

**Figure 6**

- (i) Identify **one** piece of evidence from Figure 6 that suggests the area around the power station is being regenerated. (1)

- (ii) Which **one** of the following best describes the term **urban regeneration**? (1)

- ☐ **A** building a new town
- ☐ **B** adding air conditioning to old offices
- ☐ **C** improving an urban area through investment
- ☐ **D** building on a greenfield site

(iii) Suggest **two** reasons why the regeneration zone in Figure 6 might be a suitable location for residential development.

(2)

1 .....

2 .....

(b) (i) What is meant by the term **greenfield site**?

(2)

(ii) Outline **two** reasons why greenfield sites are attractive to modern business.

**SECTION C – PRACTICAL GEOGRAPHICAL ENQUIRY****Answer TWO questions from this section.****EITHER question 7 or 8 AND EITHER question 9 or 10.****If you answer Question 7 put a cross in the box ☐ .****7 River environments fieldwork**

- (a) Study Figure 7a which shows a fieldwork site recording sheet designed for use during a water quality investigation.

<b>Location:</b> <b>Grid reference:</b> <b>Distance from nearest:</b> factory farm sewage treatment plant power station recreational site	
<b>State of the river</b> How clear is the river water? What does the river smell like? Is there anything on the surface? eg. rubbish/vegetation/pollution. Identification of any water plants on bank, surface and river bed. Type of bedload: eg. boulders/gravel/sand/silt.	
<b>Freshwater invertebrates</b> Species and number:	
<b>pH assessment</b> Acid or alkali?	

**Figure 7a**

- (i) Why are freshwater invertebrates identified as part of this investigation?

**(1)**

- ☐ **A** fish only live in unpolluted water
- ☐ **B** invertebrates can be indicators of pollution levels
- ☐ **C** there are no invertebrates in polluted water
- ☐ **D** some fish live in polluted water

(ii) What fieldwork equipment would be required for this investigation?

(3)

(iii) Outline **two** sources of secondary data that could be researched before collecting fieldwork data for this investigation.

(4)

1

2

- (b) Study Figure 7b which shows some of the results of a water quality investigation at three of the sites along a river.

Site	State of river	pH value	Number of freshwater invertebrates					
			Cased caddis	Mayfly	Rat-tailed maggot	Snail	Shrimp	Blood worm
1	River bed clearly visible	7.8	7	5	0	3	2	0
3	Clear water with plants and mixed bedload	6.9	10	15	0	1	6	1
7	River bed not visible at all	5.1	0	0	5	0	1	6

Acidity increases as pH gets lower (7 = neutral).

**Figure 7b**

- (i) Suggest a method that could be used to identify pH values.

(4)

(ii) Explain how ICT could be used in this investigation.

(3)

(iii) On Figure 7c draw a diagram to represent the data for mayfly, rat-tailed maggot and blood worm at sites 3 and 7.

(4)

Figure 7c

(iv) What conclusions about variations in water quality can be reached from an analysis of Figure 7b?

**QUESTION 8 BEGINS ON THE NEXT PAGE.**

If you answer Question 8 put a cross in the box ☐.

## 8 Hazardous environments fieldwork

- (a) Study Figure 8a which shows a fieldwork recording sheet designed for use in a hazard management investigation.

<b>Location of interview:</b> <b>Distance from hazard event:</b> <b>Grid reference:</b>	
<b>What was the hazard event?</b>	
<b>What were the main impacts of the hazard event?</b>	
<b>Who was responsible for managing the impacts of the hazard event?</b>	
<b>What did they do?</b>  Before the event  During the event  After the event	
<b>How well was the hazard event managed? (well/medium/poorly/no opinion)</b>  Before the event  During the event  After the event	
<b>What more could have been done?</b>	

Figure 8a

- (i) Why does the interviewer distinguish between actions before, during and after the hazard event?

(1)

- ☐ **A** Because actions after the event are all that matter.  
☐ **B** Because hazard events always bring disaster.  
☐ **C** Because there are opportunities for action at all three stages.  
☐ **D** Because the investigation is about people's views.

(ii) What fieldwork equipment would be required for this investigation?

(3)

(iii) Outline **two** sources of secondary data that could be researched before collecting fieldwork data for this investigation.

(4)

1

2

- (b) Study Figure 8b which shows the views of 20 people at each of two locations about how a particular hazard event was managed.

Distance from hazard event	Before event			During event			After event		
	Well managed	No opinion	Poorly managed	Well managed	No opinion	Poorly managed	Well managed	No opinion	Poorly managed
10 km	9	10	1	11	6	3	13	6	1
1 km	4	10	6	4	6	10	8	6	6

Some suggestions given for 'what more could have been done':

	Earlier warning should be given
	Wider area should have been evacuated
	Better defensive schemes should be used
	Better emergency supplies should be provided
	Evacuated people were homeless for too long

**Figure 8b**

- (i) Suggest an appropriate method that could be used to collect this data on people's views.

(4)

.....

.....

.....

.....

.....

.....

.....

.....

(ii) Explain how ICT could be used in this investigation.

(3)

(iii) On Figure 8c draw a diagram to represent the data for the site 10km from the hazard event.

(4)

**Figure 8c**

(iv) What conclusions about people's views can be reached from an analysis of Figure 8b?

- (c) Study Figure 11b which shows information about global warming and climate change.

**TWO GREAT CHALLENGES FACE THE EARTH IN THE 21st CENTURY –  
One is climate change.**

A United Nations report on climate change states that:

- Global temperature has risen 0.8°C since 1900 and a further 1°C rise is likely this century.
- Leading scientists are 95% certain that human activities caused most of the global warming.
- Global warming may be irreversible within 30 years.
- Both human society and the Earth's natural life-support systems are vulnerable to climate change.

**Figure 11b**

Explain why people and environments are threatened by continued global warming and climate change.

(6)

(d) Discuss the international measures taken to limit global warming.

### 13 Development and human welfare

- (a) Study Figure 13a which shows Gross Domestic Product per person (GDP pp) and the United Nations (UN) World Happiness rating for eight countries.

UN World Happiness rating: the higher the score out of 10, the more people are satisfied with their lives and well-being.

**Figure 13a**

- (i) Which country has the highest GDP pp?

(1)

- (ii) Which **one** of the following best describes the relationship between GDP pp and the happiness rating?

(1)

- ☐ **A** countries with lower GDP pp have higher happiness ratings
- ☐ **B** countries with higher GDP pp usually have higher happiness ratings
- ☐ **C** countries with very low GDP pp have the highest happiness ratings
- ☐ **D** there is no relationship between GDP pp and happiness ratings

(iii) What evidence is there in Figure 13a that economic development does not always improve happiness rating?

(2)

(iv) The UN World Happiness rating is a way of measuring quality of life.

Suggest **one** other indicator that might be used to measure quality of life.

(1)

(b) (i) What is meant by the term **intermediate technology**?

(2)

(ii) Describe how the use of intermediate technology is encouraging development in LICs.

(c) Study Figure 13b which shows information about world population.

**TWO GREAT CHALLENGES FACE THE EARTH IN THE 21st CENTURY –  
One is a huge and rapid increase in population.**

The world population was 3 billion in 1960. It is now 7.2 billion.

Experts say:

- There is an 80% probability that global population could increase to 12.3 billion by the end of this century.
- Fertility rates are likely to remain high in Sub-Saharan Africa.
- This population increase will exceed the Earth's carrying capacity and threaten natural life-support systems (ecosystems).

**Figure 13b**

Explain the consequences of rapid population growth on quality of life.

(6)

(d) Discuss why there is a global development gap.
