Mathema Paper 1R	tics B	
Thursday 25 May 2017 – N	Aorning	Paper Reference
Time: 1 hour 30 minutes	5	4MB0/01F

Instructions

- Use **black** ink or ball-point pen.
- Fill in the boxes at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided there may be more space than you need.
- Calculators may be used.

Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
 use this as a guide as to how much time to spend on each question.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.
- Without sufficient working, correct answers may be awarded no marks.

	Answer ALL I WENTY EIGHT questions.
	Write your answers in the spaces provided.
	You must write down all the stages in your working.
1	(a) Write the number 57864 correct to 3 significant figures.
	(4)
	(1) (1) (1) (1) (1) (1) (1) (1) (1) (1)
	(b) write the number 0.04749 correct to 2 decimal places.
	(1)
	(Total for Ouestion 1 is 2 marks)
2	Find the value of 20^5
	Give your answer in standard form.
	(Total for Question 2 is 2 marks)
3	Solve $3x + 2 = 7$
	$(\mathbf{T}_{2}4_{2}1\mathbf{f}_{2}\cdots2\mathbf{f}_{2}22\cdots21)$
_	(lotal for Question 3 is 2 marks)

Florian's football team played 30 matches last season. 4 The team won 14 of these matches. Florian drew a pie chart for the results of the 30 matches.

Calculate the size of the angle, in degrees, of the sector for the 14 matches won.

(Total for Question 4 is 2 marks)

At the start of his diet, Julian had a weight of 96 kilograms. 5 After one month, Julian had a weight of 90 kilograms.

Calculate the percentage decrease in Julian's weight.

(b) On the number line below, represent the set of values of x that satisfy both

$$19 + 3x \ge 4 \quad \text{and} \quad \frac{2x}{3} < 4$$

7 Find the inverse of the matrix
$$\begin{pmatrix} 5 & -3 \\ 4 & -2 \end{pmatrix}$$

(Total for Question 7 is 3 marks)

Show that $(2 + \sqrt{6})(\sqrt{3} - \sqrt{2}) = \sqrt{2}$

You must show all your working.

(Total for Question 8 is 3 marks)

A particle is moving along a straight line.

The distance-time graph shows the distance, d metres, of the particle from a fixed point on the line at time t seconds after passing through this fixed point.

Calculate an estimate for the speed of the particle when t = 2

..... m/s

Diagram **NOT** accurately drawn

The diagram shows a square of side length 2r cm and a circle of radius r cm. Each side of the square is a tangent to the circle.

Express the area of the shaded region as a percentage of the area of the square. Give your answer to 3 significant figures.

14 A bag contains 6 black discs and 4 white discs only.

Jasmin takes at random a disc from the bag and records the colour of the disc. If the disc is black, she replaces the black disc in the bag. If the disc is white, she does not replace the white disc in the bag.

Jasmin now takes at random a second disc from the bag and records the colour of the disc.

Calculate the probability that Jasmin records one disc of each colour.

15 P and Q are two similar pyramids.

P has volume 400 cm^3 and surface area 360 cm^2 *Q* has volume 1350 cm^3

Calculate the surface area of Q.

(Total for Question 15 is 3 marks)

16 Simplify fully

 $y \quad \frac{2x^2 + 9x - 5}{12x^2 - 3}$

17 Laurent competed in a triathlon.

The incomplete table gives some information about each of his three stages of the triathlon.

Stage	Distance (km)	Time taken	Average speed (km/h)
Swim	1.5	22 min 30 sec	4
Cycle	40		32
Run	10	37 min 30 sec	16

(a) Calculate, in hours and minutes, the time taken by Laurent to complete the cycle stage.

hours	minutes
(2)	

(b) Calculate, in kilometres per hour, Laurent's overall average speed for all three stages of the triathlon. Give your answer to 3 significant figures.

P 4 8 4 7 5 A 0 1 2

..... km/h

The diagram shows a piece of card in the shape of a sector, OABC, of a circle of radius 5x cm and centre O.

The diagram also shows a hollow, right circular cone.

The cone is formed from the card by joining OA and OC together.

The arc *ABC* of the sector subtends an angle of 216° at *O*.

- (a) Find an expression, in terms of x, for
 - (i) the radius of the cone,

28

radius = cm (2)

(ii) the height of the cone.

height	=	 	cm
		(2)	

Given that the volume of the cone is $\frac{37}{2}$

$$\frac{375\pi}{2}$$
 cm³

(b) find the value of *x*.

x =
