# Mark Scheme (Results)

# October 2022

Pearson Edexcel International Advanced Level
In Economics (WEC12) Paper 01
Unit 2: Macroeconomic performance and policy

**Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

**Pearson: helping people progress, everywhere**

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

**General Marking Guidance**

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

**Section A**

| Question | Quantitative skills assessed | Answer | Mark |
|---|---|---|---|
| 1 | **QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms | **The only correct answer is C**<br><br>*A* is not correct as this does not explain the conflict; shows full employment<br><br>*B* is not correct as it shows the relationship between the price level and real output<br><br>*D* is not correct as it shows the relationship between the price level and real output | **(1)** |
| 2 | **QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms | **The only correct answer is B**<br><br>*A* is not correct as demand deficiency is associated with a recession<br><br>*C* is not correct as seasonal unemployment is associated with jobs at different times of the year<br><br>*D* is not correct as structural unemployment is associated with a change in the sectoral structure of the economy | **(1)** |
| 3 | **QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms | **The only correct answer is A**<br><br>*B* is not correct because withdrawals will be greater than injections<br><br>*C* is not correct because the data relates to the government's budget<br><br>*D* is not correct because the data relates to the government's budget | **(1)** |
| 4 | **QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms | **The only correct answer is C**<br><br>*A* is not correct because this will improve France's trade balance<br><br>*B* is not correct because this will improve France's trade balance<br><br>*D* is not correct because this will improve France's trade balance | **(1)** |

| 5 | **QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms | **The only correct answer is D** <br><br> *A is not correct as QE will increase the availability of credit* <br><br> *B is not correct as QE will increase the rate of inflation* <br><br> *C is not correct as QE will reduce the rate of unemployment* | **(1)** |
|---|---|---|---|
| 6 | **QS5:** Calculate and interpret index numbers <br> **QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms | **The only correct answer is D** <br><br> *A is not correct as this is the index number for 2018 using 2020 as the base year* <br><br> *B is not correct as this is the index number for 2019 using 2020 as the base year* <br><br> *C is not correct as this is the index number for 2020 using 2019 as the base year* | **(1)** |

**Section B**

| Question | With reference to the chart, explain **one** likely effect of this trend in the rate of inflation. | Mark |
|---|---|---|
| | **Answer** | |
| **7** | **Knowledge 1, Analysis 2, Application 1** | |
| | | |
| | **Quantitative skills assessed:** | |
| | **QS2**: Calculate, use and understand percentages, percentage changes and percentage point changes | |
| | **QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms | |
| | **Knowledge and Analysis** 1 knowledge mark for defining inflation, e.g.: | |
| | • Increase in the general price level of the economy / a rise in the average prices of goods and services in an economy **(1K)** | |
| | *OR* 1 knowledge mark for identifying one likely effect of rising inflation and up to 2 marks for linked explanation of the effect identified, e.g.: | |
| | • Increased inequality **(1K)** those who have fixed incomes **(1AN)** who are not protected by inflation – e.g. students, dependents, pensioners are often the poorest **(1AN)** | |
| | • May worsen trade balance **(1K)** as price of Denmark's exports may rise more than the price of other countries' goods **(1AN)** making exports less internationally competitive **(1AN)** | |
| | • Fall in real incomes **(1K)** leading to lower consumer confidence/ decrease in purchasing power **(1AN)** and hence, reducing living standards **(1AN)** | |
| | • Greater uncertainty **(1K)** leading to loss of business confidence **(1AN)** which reduces or postpones investment/spending and hence may reduce economic growth **(1AN)** | |
| | | |
| | **Application** 1 mark for appropriate use of the chart, e.g.: | |
| | • For identifying an increase in the rate of inflation **(1)** | |
| | • Between Jan 2021 and Nov 2021, the rate of inflation increased from approximately 0.6% to 3.4% / by 2.8 *percentage points* **(1)** | **(4)** |

| Question | In 2021 average house prices in the Philippines fell by over 10%. This had a significant impact on existing homeowners.<br><br>Based on this information, draw an AD and LRAS diagram to show the likely impact of this fall in house prices on the price level **and** real output in the Philippines.<br><br>**Answer** | **Mark** |
|---|---|---|
| **8** | **Knowledge 1, Application 3**<br><br>**Quantitative skills assessed:**<br>**QS4:** Construct and interpret a range of standard graphical forms<br>**QS9:** Interpret, apply and analyse information in written, graphical and tabular forms<br><br><br><br>**Knowledge**<br>Correctly drawn diagram with correctly labelled AD/LRAS curves showing the original equilibrium price level and real output **(1)**<br><br>**Application**<br>Up to 3 marks for the following information included on the diagram:<br>• Drawing AD shifted to the left **(1)**<br>• Showing correct lower price level **(1)**<br>  (not rewarded if 'price' is used on the axis)<br>• Showing correct lower real GDP/income/output **(1)**<br>  (not rewarded if 'quantity' is used on the axis)<br><br>**NB: Award a maximum of 2 marks if LRAS shifted along with AD** | **(4)** |

| Question | Calculate the change in Canada's balance of trade between 2019 and 2020. Show your workings.<br><br>**Answer** | **Mark** |
|---|---|---|
| **9** | **Knowledge 1, Application 3**<br><br>**Quantitative Skill assessed**<br>**QS9:** Interpret, apply and analyse information in written, graphical and tabular forms<br><br>**Knowledge**<br>1 mark for correct formula/implicit understanding, e.g.:<br>• Net trade balance = (X-M) /<br>• Value of exports – value of imports **(1)**<br><br>**Application**<br>Up to 3 marks for use of data in calculation from the following, e.g.:<br><br>• 2019 → \$555.8bn - \$583.6bn = -\$27.8bn **(1)**<br>• 2020 → \$477.1bn - \$510.8bn = -\$33.7bn **(1)**<br>• Change → -\$33.7bn – -\$27.8bn = -\$5.9bn **(1)**<br><br>**NB: if correct answer (-\$5.9 billion/\$5.9 billion/21.2%) is given, award full marks regardless of working.**<br><br>**NB: award 3 marks if billion is not included in the final answer** | **(4)** |

| Question | *Ceteris paribus*, calculate the price elasticity of demand for gas from British Gas. Show your workings.<br><br>**Answer** | Mark |
|---|---|---|
| **10** | **Knowledge 1, Application 3**<br>Quantitative skills assessed:<br>**QS8:** Make calculations of elasticity and interpret the result.<br>**QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms.<br><br>**Knowledge**<br>1 mark for definition/the formula for price elasticity of demand<br>$\underline{\text{\% change in quantity demanded}}$<br>% change in price<br>  **OR**<br>1 mark for identifying that the good has relatively price inelastic demand/The PED is inelastic as a fall in price results in a smaller percentage change in quantity demanded **(1)**<br><br>**Application**<br>Up to 3 marks for calculations:<br>• Original quantity<br>  17 000 000 + 350 000 = 17 350 000 **(1)**<br>• Change in quantity ÷ original quantity x 100<br>  -350 000 ÷ 17 350 000 x 100 = -2.017% **(1)**<br><br>$\underline{\text{\% change in quantity demanded}}$<br>% change in price<br>• - 2.017 ÷ 22 = -0.092 **(1)**<br><br>**NB: if correct answer (e.g. -0.09168182) is given, award full marks regardless of working.**<br>**NB: award 3 marks if negative sign is omitted/percentage sign added to final answer**<br>**NB: award 3 marks if negative sign included but error in calculation** | **(4)** |

| Question | Explain the likely impact of this change in price on consumer surplus in the market for nectarines. Illustrate your answer with an appropriate diagram. | Mark |
|---|---|---|
| | **Answer** | |
| 11 | **Knowledge 1, Application 1, Analysis 2** | |

Quantitative skills assessed:

**QS4**: Construct and interpret a range of standard graphical forms

**QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms.

**Knowledge**

- 1 mark for definition of consumer surplus e.g.:

The difference between the price consumers are willing to pay and the price they pay/gap between the equilibrium price and demand curve **(1)**

**Application**

1 mark for the following diagram, showing supply shifting right

**Analysis**

1 mark for the original consumer surplus

- $ABP_e$ **(1)**

1 mark for the new consumer surplus

- $ACP_1$ **(1)**

**OR**

2 marks for the change in consumer surplus
- Consumer surplus increases **(1)** by $BCP_1P_e$ **(1)**

**(4)**

**Section C**

| Question | Define the term 'external costs' (Extract C, line 11). | Mark |
|---|---|---|
| | **Answer** | |
| 12 (a) | **Knowledge 2** <br> Up to 2 marks for defining 'external cost', e.g.: <br><br> • Costs to third parties **(1)** <br> • Negative **(1)** impact on third parties **(1)** <br> • Where MSC > **(1)** MPC **(1)** <br> • Economic agents not involved in the transaction **(1)** experience costs **(1)** <br> • Accept explicit examples from Extract C e.g. causes cancers, contaminated waste water **(1)** | **(2)** |

| Question | With reference to the second paragraph of Extract A, explain the phrase 'the supply of semiconductors is inelastic.'<br><br>**Answer** | Mark |
|---|---|---|
| **12 (b)** | **QS8:** Make calculations of elasticity and interpret the result.<br><br>**QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms.<br><br>**Knowledge 2 Application 2**<br><br>**Knowledge**<br>2 marks for understanding of inelastic supply:<br><br>• Inelastic supply is where a change in price results in a less than proportionate change in quantity supplied **(1)**<br>• Where PES is between 0 and 1 **(1)**<br>• Supply cannot respond quickly to a change in price **(1)**<br>• Percentage change in price is greater than the percentage change in quantity supplied **(1)**<br>• Diagram to show (perfectly or relatively) inelastic supply **(1)**<br><br><br><br>**Application**<br>Up to 2 marks for application:<br><br>• Operating at full capacity **(1)**<br>• Struggled to respond to increased demand **(1)**<br>• Semiconductor manufacturers will take time for additional capacity to become operational **(1)** | **(4)** |

| Question | With reference to Extract A, analyse **two** reasons why semiconductor prices 'increased on average by 20%'.<br><br>Illustrate your answer with a supply and demand diagram.<br><br>**Answer** | Mark |
|---|---|---|
| 12 (c) | **Knowledge 2, Application 2, Analysis 2**<br><br>Quantitative skills assessed:<br>**QS4**: Construct and interpret a range of standard graphical forms<br>**QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms.<br><br>**Knowledge**<br>Up to 2 marks for the diagram showing:<br>• Original supply, demand, equilibrium price and quantity **(1)**<br>• Final equilibrium with both curves shifted correctly showing higher price **(1)**<br><br>**Analysis**<br>1 mark for analysis linked to supply e.g.:<br>• Costs of steel and copper increased **(1)**<br>1 mark for analysis linked to demand e.g.:<br>• Global health crisis led to increased demand for semiconductors used in production of laptops/tablets/smartphones **(1)**<br><br>**Application**<br>2 marks for diagram:<br>• Rightwards shift in demand **(1)**<br>• Leftwards shift in supply **(1)**<br><br> | , |
|  |  | **(6)** |

| Question | With reference to Extract B and Figure 1, examine **two** likely effects of excess demand for semiconductors on car manufacturers. | Mark |
|---|---|---|
| | **Answer** | |
| 12(d) | **QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms | |
| | **Knowledge 2, Application 2, Analysis 2, Evaluation 2** | |
| | **Knowledge, Analysis and Application** | |
| | 1 mark for definition/understanding of excess demand | |
| | • Demand is greater than supply at the current price | |
| | Up to 2 marks for reference to Extract A, Up to 2 marks for identifying two impacts and up to 2 marks for linked explanations, e.g.: | |
| | • Car manufacturers waiting for semiconductors **(1AP)** so unable to complete customer orders (**1K**) leading to reputational damage as customers have to wait longer between ordering and receiving their cars **(1AN)** | |
| | • Volkswagen produced 100 000 fewer cars/GM shut down production/Japan's car production decreased 19% **(1AP)** with less cars supplied **(1K)** it leads to lower revenue/proft **(1AN)** | |
| | • Car manufacturers removed features requiring semiconductors **(1AP)** in order to be able to reduce the need for semiconductors **(1K)** which may disappoint customers as new cars might not have the features they expect leading to reputational damage **(1AN)** | |
| | • Shortage of cars led to increased price of new cars/people switched to used cars market where prices doubled **(1AP)** as car showrooms struggled to purchase new and used cars **(1K)** costs will increase and profits fall **(1AN)** | |
| | • Fall in revenue for car manufacturers in China estimated at $25.5 bn/Europe $13.4 bn/South Asia $9.3 bn/ Japan/South Korea $7.3 bn/ North America $5.2 bn **(1AP)** as quantity of sales of new cars sold falls **(1K)** car manufacturers are likely to employ fewer employees **(1AN)** | |
| | Award 1 mark for accurate excess demand diagram (1AN) | |
| | **Evaluation** | |
| | Up to 2 marks for evaluative comments (2+0 or 1+1), e.g.: | |
| | • Magnitude of impact- widespread affecting Volkswagen, GM, Japanese manufacturers/revenues reduced $100bn **(1+1)** | |
| | • Depends on how important semiconductors are in the production of cars as to how much of a delay there is **(1+1)** | **(8)** |

| | <ul><li>Depends on whether car manufacturers have stockpile of semiconductors which would enable them to increase production **(1+1)**</li><li>Chinese manufacturers have suffered the largest loss in revenue suggesting semiconductor shortages affected some more severely **(1+1)**</li><li>Increased semiconductor production will help resolve issues of excess demand **(1+1)**</li></ul> | |

| Question | With reference to Extract C and your own knowledge, discuss the possible microeconomic effects of the subsidies paid to semiconductor manufacturers in the USA.<br><br>Illustrate your answer with an appropriate diagram.<br><br>**Indicative content** |
|---|---|
| **12(e)** | **Indicative content guidance**<br><br>Answers must be credited by using the level descriptors (below) in line with the general marking guidance.<br><br>The indicative content below exemplifies some of the points that candidates may make but this does not imply that any of these must be included. Other relevant points must also be credited.<br><br>**Quantitative skills assessed**<br>**QS4**: Construct and interpret a range of standard graphical forms<br><br>**QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms.<br><br>**Knowledge, Application and Analysis (8 marks) – indicative content**<br><ul><li>Subsidy- cash grant paid to encourage production</li><li>US Government increased subsidy from \$0 between 2000-20 to \$52 bn in 2021</li><li>To reduce the reliance of US on imports of semiconductors- had increased 63% to 88%</li><li>Increase the number of US semiconductor factories by at least 7</li><li>Helps expand production capacity and reduce risk of car manufacturers having to stop production</li><li>The subsidy will make US production more profitable/able to compete with Asian producers who have lower costs</li><li>Subsidy- decreases costs of production</li><li>Increases supply S to S+Sub</li><li>Decreases price $P_E$ to $P_1$</li><li>Quantity of semiconductors increase/increases quantity $Q_E$ to $Q_1$</li><li>Increases government spending- $ABCP_1$</li><li>Reference to incidence of the subsidy (consumer/producer)</li><li>Consumer surplus increases $FJP_E$ to $FCP_1$</li><li>Producer surplus increases</li><li>Helps improve semiconductor supply enabling car companies to increase production</li><li>Will be cheaper to produce products that use semiconductors</li><li>Increases employment in semiconductor manufacturing in the USA</li><li>Increased production generates external costs- cancer causing and water usage</li></ul> |

Diagram

**NB** Macroeconomic effects e.g. higher tax revenues leading to budget improvement would only achieve Level 1

**NB** Level 3 response requires a diagram

**NB** Positive microeconomic effects may be rewarded as KAA and negative effects as EV or vice versa

| Level | Mark | Descriptor |
|-------|------|------------|
|  | 0 | No rewardable material |
| Level 1 | 1–3 | Displays isolated, superficial or imprecise knowledge and understanding of economic terms, principles, concepts, theories and models. |
|  |  | Use of generic material or irrelevant information or inappropriate examples. |
|  |  | Descriptive approach, which has no chains of reasoning. |
| Level 2 | 4–6 | Displays elements of knowledge and understanding of economic terms, principles, concepts, theories and models. |
|  |  | Ability to apply knowledge and understanding to some elements of the question. Some evidence and contextual references are evident in the answer. |
|  |  | Chains of reasoning in terms of cause and/or consequence are evident but they may not be developed fully or some stages are omitted. |
| Level 3 | 7–8 | Demonstrates accurate and precise knowledge and understanding of economic terms, principles, concepts, theories and models. |
|  |  | Ability to link knowledge and understanding in context using relevant examples which are fully integrated to address the broad elements of the question. |
|  |  | Analysis is clear, coherent, relevant and focused. The answer demonstrates logical and multi-stage chains of reasoning in terms of cause and/or consequence. |

| | **Evaluation (6 marks) – indicative content** |
|---|---|
| | • Magnitude- $52 bn in USA |
| | • Government spending creates an opportunity cost leaving less for other areas of the economy |
| | • Benefits in terms of increased supply of semiconductors takes time as factories take three years to become fully operational |
| | • Value of PED is important, if firms' demand for a particular brand of semiconductors is inelastic they may not demand semiconductors from new suppliers |
| | • Time lag- short-run impact limited as it takes time to manufacture semiconductors so long-run before impact felt |
| | • External costs associated with additional semiconductor manufacturing are difficult to quantify/measure |

| Level | Mark | Descriptor |
|---|---|---|
| | 0 | No rewardable material. |
| Level 1 | 1–2 | Identification of generic evaluative comments. No supporting evidence/reference to context. No evidence of a logical chain of reasoning. |
| Level 2 | 3–4 | Evidence of evaluation of alternative approaches. Some supporting evidence/reference to context. Evaluation is supported by a partially-developed chain of reasoning. |
| Level 3 | 5–6 | Evaluation recognises different viewpoints and/or is critical of the evidence. Appropriate reference to evidence/context. Evaluation is supported by a logical chain of reasoning. |

**Section D**

| Question | Evaluate the advantages of a free market economy. |
|---|---|
| | **Indicative content** |
| **13** | **QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms. |
| | **Indicative content guidance** |
| | Answers must be credited by using the level descriptors (below) in line with the general marking guidance. |
| | The indicative content below exemplifies some of the points that candidates may make, but this does not imply that any of these must be included. Other relevant points must also be credited. |
| | **Knowledge, application and analysis (12 marks) – indicative content** |
| | • Free market economies- where price mechanism/supply and demand determine resource allocation/where government has minimal involvement in decisions |
| | • Hong Kong closest to free market- low tax rates, low government spending and the low level of business regulation |
| | Advantages |
| | • Incentives to work hard in order to increase incomes |
| | • Profit incentive means firms have incentive to be efficient |
| | • Consumers are free to choose the goods and services they desire |
| | • Producers are free to create products to meet customer needs |
| | • Firms are likely to use profits to develop new processes helping to reduce costs and improve efficiency/productivity |
| | • Profits invested in innovative new products which better meet consumer needs |
| | • Government failure avoided e.g. |
| |     ○ surpluses & shortages resulting from price controls |
| |     ○ information gaps meaning the intervention is not always the best option |
| |     ○ can create unintended consequences such as smuggling |
| |     ○ creates excessive administrative costs. |
| | • No expensive central planning |
| | • Competition between firms may help lower price and increase quantity of goods available |
| | • Market forces (invisible hand) helps to clear the market when there is excess demand/excess supply/disequilibrium |
| | • Disadvantages of command economy |

| Level | Mark | Descriptor |
|-------|------|------------|
| | 0 | No rewardable material. |
| Level 1 | 1–3 | Displays isolated, superficial or imprecise knowledge and understanding of economic terms, principles, concepts, theories and models.<br><br>Use of generic material or irrelevant information or inappropriate examples.<br><br>Descriptive approach which has no chains of reasoning. |
| Level 2 | 4–6 | Displays elements of knowledge and understanding of economic terms, principles, concepts, theories and models.<br><br>Limited application of knowledge and understanding to economic problems in context.<br><br>A narrow response or superficial, only two-stage chains of reasoning in terms of cause and/or consequence. |
| Level 3 | 7–9 | Demonstrates accurate knowledge and understanding of economic terms, principles, concepts, theories and models.<br><br>Ability to apply knowledge and understanding to some elements of the question. Some evidence and contextual references are evident in the answer. Analysis is clear and coherent. Chains of reasoning in terms of cause and/or consequence are evident but they may not be developed fully or some stages are omitted. |
| Level 4 | 10–12 | Demonstrates accurate and precise knowledge and understanding of economic terms, principles, concepts, theories and models.<br><br>Ability to link knowledge and understanding in context, using appropriate examples which are fully integrated to address the broad elements of the question.<br><br>Analysis is clear, coherent, relevant and focused. The answer demonstrates logical and multi-stage chains of reasoning in terms of cause and/or consequence. |

**Evaluation (8 marks) – indicative content**

Disadvantages

- Underprovision of public goods- non-rivalry and non-excludability creates a free rider problem and private sector firms cannot generate profits- impacts on the provision of streetlights, roads, defence, sea defences
- Underprovision of healthcare/education- services with external benefits where people underestimate the benefit
- Overconsumption - people may consume goods ignoring external costs of their consumption e.g. pollution and congestion have negative impacts on third parties
- Private sector health care can be inefficient and expensive- US health insurance costs
- Can create inequality:
  - where the rich inherit and have more wealth
  - low skilled/unskilled/disabled/sick have low income with no support from the state in the form of welfare payments
  - free market may result in high levels of unemployment
- Large powerful firms can emerge that exploit customers by charging high prices and restricting output
- When demand is low unemployment may rise leaving some with no income
- Markets can be unstable:
  - Market bubbles can emerge and burst
  - Creates uncertainty for businesses
- Depends on the extent to which an economy acts as a free market economy- even Hong Kong still has taxes and regulation so is not a pure free market economy.

| Level | Mark | Descriptor |
|---|---|---|
| | 0 | No rewardable material. |
| Level 1 | 1–3 | Identification of generic evaluative comments. No supporting evidence/reference to context. No evidence of a logical chain of reasoning. |
| Level 2 | 4–6 | Evidence of evaluation of alternative approaches. Some supporting evidence/reference to context. Evaluation is supported by a partially-developed chain of reasoning. |
| Level 3 | 7–8 | Evaluation recognises different viewpoints and/or is critical of the evidence, leading to an informed judgement. Appropriate reference to evidence/context. Evaluation is supported by a logical chain of reasoning. |

| Question | Evaluate the advantages of state provision of goods and services. |
|---|---|
| | **Indicative content** |
| **14** | **QS9**: Interpret, apply and analyse information in written, graphical, tabular and numerical forms. |

**Indicative content guidance**

Answers must be credited by using the level descriptors (below) in line with the general marking guidance.

The indicative content below exemplifies some of the points that candidates may make but this does not imply that any of these must be included. Other relevant points must also be credited.

**Knowledge, application and analysis (12 marks) – indicative content**

- State provisions is where government uses taxation to provide goods and services
- UAE- provides free education and healthcare, flood defences and world tallest lighthouse

**Advantages**

- Reduces the problem of underconsumption and production of goods with positive externalities- underconsumption as people underestimate the benefits of consuming a good- state provided free healthcare/free primary and secondary education
- Reduces the problem of overconsumption and production of goods with negative externalities- overproduction as firms ignore negative impact on third parties- government imposes indirect taxes on firms producing external costs
- Reduces the problem of underprovision of public goods- non-rival and non-excludable- free rider problem makes provision by the private sector unprofitable so government steps in e.g. lighthouse/flood defences
- Ensures safety of the public by preventing flooding and ships hitting rocks
- Reduces the problem of information gaps/Imperfect market information- information failure means consumers may under-consume goods such as health care and education so the government provides. State provides information to fill gaps- e.g. on impact of high sugar consumption
- Ensures provision for all including those on low incomes who would otherwise be unable to afford the goods/services
- May help to prevent exploitation of consumers by private monopolies
- Can increase the number that are employed in construction/in healthcare/education system

Diagrams may be drawn to illustrate underproduction/overconsumption

| Level | Mark | Descriptor |
|---|---|---|
| | 0 | No rewardable material. |
| Level 1 | 1–3 | Displays isolated, superficial or imprecise knowledge and understanding of economic terms, principles, concepts, theories and models.<br>Use of generic material or irrelevant information or inappropriate examples.<br>Descriptive approach, which has no chains of reasoning. |
| Level 2 | 4–6 | Displays elements of knowledge and understanding of economic terms, principles, concepts, theories and models.<br>Limited application of knowledge and understanding to economic problems in context.<br>A narrow response or superficial, only two-stage chains of reasoning in terms of cause and/or consequence. |
| Level 3 | 7–9 | Demonstrates accurate knowledge and understanding of economic terms, principles, concepts, theories and models.<br>Ability to apply knowledge and understanding to some elements of the question. Some evidence and contextual references are evident in the answer.<br>Analysis is clear and coherent. Chains of reasoning in terms of cause and/or consequence are evident but they may not be developed fully or some stages are omitted. |
| Level 4 | 10–12 | Demonstrates accurate and precise knowledge and understanding of economic terms, principles, concepts, theories and models.<br>Ability to link knowledge and understanding in context using appropriate examples which are fully integrated to address the broad elements of the question.<br>Analysis is clear, coherent, relevant and focused. The answer demonstrates logical and multi-stage chains of reasoning in terms of cause and/or consequence. |

| | | **Evaluation (8 marks) – indicative content** |
|---|---|---|
| | | **Disadvantages** |
| | | • Government failure where there is a net welfare loss through: |
| | |     o information gaps |
| | |     o lack of incentives |
| | |     o unintended consequences |
| | |     o excessive administrative costs |
| | |     o moral hazard |
| | | • Government provision can be less efficient compared to the free market- lack of competition |
| | | • Opportunity costs associated with the government spending leaving less money for other priorities |
| | | • Less choice for consumers |
| | | • Reduction in freedom |
| | | • High levels of taxation to fund spending |
| | | **Other evaluation** |
| | | • It is difficult to place a value on the size of any external benefits/costs to know how much to provide |
| | | • Information failure is increasingly solved by the internet |
| | | • Magnitude of spending e.g. $136 million needs to judge this against the benefit of flood defences |

| Level | Mark | Descriptor |
|---|---|---|
| | 0 | No rewardable material. |
| Level 1 | 1–3 | Identification of generic evaluative comments. No supporting evidence/reference to context. No evidence of a logical chain of reasoning. |
| Level 2 | 4–6 | Evidence of evaluation of alternative approaches. Some supporting evidence/reference to context. Evaluation is supported by a partially-developed chain of reasoning. |
| Level 3 | 7–8 | Evaluation recognises different viewpoints and/or is critical of the evidence, leading to an informed judgement. Appropriate reference to evidence/context. Evaluation is supported by a logical chain of reasoning. |
